# **Excellent Results Continue from Egyptian Gold Concessions**

## Well Positioned in MENA Region with Projects in Egypt and Turkey

**Cairo, Egypt** - 2010 and 2011 have been exciting and interesting times in Egypt and the Middle East North Africa (MENA) region for Nuinsco Resources Limited. Since winning the bid round in early 2010 for two gold concessions, Bukari and Umm Samra, in Egypt's Eastern Desert, Nuinsco has pushed forward with its efforts to explore the projects and solidify its presence in this underexplored part of the world.

Three rounds of field exploration have been completed, and in early March the first assays were released – with very positive results. Multi-gram gold analyses, grading up to 46.30 g/t (1.6 oz/t), were obtained from all six sites visited and almost all samples collected contained significantly anomalous gold (see news release issued March 1, 2011).

Subsequently, additional results have been released with even higher grades, including 2.19 oz/t (75.1 g/t) gold from surface sampling at the Bukari One occurrence (see news release issued March 7, 2011) and 4.34 oz/tonne (135.0 g/t) gold (from the Talat Gadalla occurrence (see news release issued April 19, 2011). Talat Gadalla, Bukari One and Bukari North are only three of the 13 named gold occurrences on the Bukari Concession. They have a combined total of more than 11 km of strike length and all display extensive gold mineralization at surface. "The wide distribution of such an anomalous set of samples demonstrates the tremendous potential for gold discovery at both Bukari and Umm Samra," said Nuinsco President Paul Jones. "Both concessions are essentially unexplored, and more than 20 named

continued on page 7

gold occurrences remain to be visited and sampled.

## • Letter to Shareholders •

# More Active than Ever

#### **To our Shareholders**

Exploration success is typically determined by the ability to identify and define geological settings where significant metal occurrences can be found. Nuinsco has a proven track record with many such successes over the past 40 years. These successes are attributable to the team working for the Company and its ability to identify quality projects and move these projects forward. Nuinsco is fortunate to have been able to keep its people interested and challenged for many years and we can boast that we have two employees with 27 years of service who have been, and continue to be, instrumental in making Nuinsco a success. In addition, we are fortunate to continue to have an individual on our board who is directly responsible for Nuinsco's numerous discoveries and continues to provide guidance – George Archibald.

Today, Nuinsco is more active than ever. Whereas in the past it was typical for exploration companies to work very few projects at a time, modern technologies have improved the ability to explore remote areas, allowing us to effectively focus on a variety of properties. The advantages to having a range of projects include an ability to keep employees busy exploring year-round and to keep these highly-motivated individuals interested. People resources are in short supply these days and it is important to ensure that we have good people and continuity of knowledge to advance all of our projects.

## Who We Are

Nuinsco Resources Limited has over 40 years of exploration success and is a growth-oriented, multicommodity mineral exploration company that today is focused on world-class mineralized belts in Canada, Turkey and Egypt. In addition to its property holdings, Nuinsco owns common shares in Coventry Resources Limited (ASX:CVY) and Victory Nickel Inc. (TSX:NI).

## ... and rising metal and commodity prices

## **OVER 40 YEARS OF EXPLORATION SUCCESS**

- 1970 Management group takes control of "New Insco Mines Ltd."
- **1971** Hebecourt, 1.2 million ton copper rich deposit discovered in Noranda, Quebec.
- •1973 Uranium exploration begins at Prairie Lake.
- 1979 Nuinsco Resources Ltd. is successor to New Insco Mines Ltd.
- •1981 Work begins at Cameron Lake gold deposit, Kenora.
- •1983 Gold resource identified at Cameron Lake.
- **1987** Aldermac 7 and 8 zones (Cu/Zn/Au/Ag) discovered near Rouyn-Noranda, Quebec.
- •1994 Rainy River deposit, 17 Zone (Au) discovered.
- •1995 Rainy River deposit, 34 Zone (Ni/Cu/Au/PGE) discovered.
- •1999 Lac Rocher Ni deposit discovered in Quebec.
- 2000 Mel sulphide nickel property, Manitoba, optioned from Inco Limited.
- 2001 Minago sulphide nickel property, Manitoba, acquired from Black Hawk Mining.
- 2004 Nuinsco expands into Turkey (Berta Cu/Au porphyry) and Saskatchewan (Diabase Peninsula property).
- 2005 Second Turkish property optioned: Elmalaan (Cu/Zn VMS).
- 2006 Chibougamau mining camp entered via agreement with Campbell Resources.
- 2007 Nuinsco creates Victory Nickel inc. through the spin-off of its Minago, Mel and Lac Rocher projects.
- 2009 Nuinsco bids on Egyptian gold concessions Bukari and Umm Samra.
- **2010** 330-360 million tonne ETMI at Prairie Lake Property, announced. Bukari and Umm Samra bid is successful.

Cameron Lake sold to Coventry Resources for \$12 million consideration.

Nuinsco and Ocean Partners gain effective control of Chibougamau mining camp, Quebec.

• 2011 Initial results from exploration at Bukari: grab samples grading up to 4.34 oz/t.

## Our FUTURE ...built on Our PAST

Glance

# Significant Events 2010-2011

## Corporate

- Completed the sale of Cameron Lake Project to a wholly-owned subsidiary of Coventry for aggregate consideration valued at approximately \$12 million.
- Acquired, along with Ocean Partners, substantially all of the remaining debt of Campbell Resources Inc., and with it, effective control of the Chibougamau mining camp.

## Gold

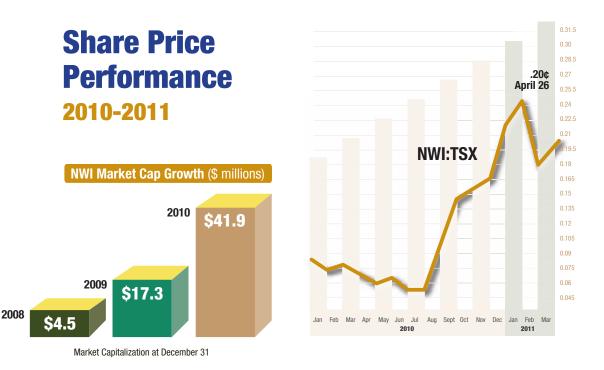

- Won, through Z-Gold Resources Limited, the Company's 50%-owned Egyptian subsidiary, its bid for the Bukari and Umm Samra gold concessions in Egypt's Eastern Desert.
- Negotiated a concession agreement covering the Bukari gold concession and received Egyptian State Council Approval.
- Announced assays from surface sampling on the Bukari concession grading up to 4.34 oz/tonne (135g/tonne) gold.

## **Uranium and Rare Metals**

- Announced an Exploration Target Mineralization Inventory ("ETMI") at the Prairie Lake rare metals project totalling between 330 and 360 million tonnes averaging 3.5% to 3.7% phosphorous ("P205") and 0.12% to 0.14% niobium ("Nb205") (1.2 to 1.4kg/ tonne), along with tantalum, uranium and rare earth elements.
- Announced positive test results that confirm the ability to produce a concentrate, using low-cost flotation methods, grading up to 23.4% P205 and 0.17%, or 1.7kg/tonne, Nb205 at Prairie Lake.
- Completed a large-scale trenching program and a 3,500 m drill program at Prairie Lake.
- Completed 4,000m of diamond drilling at the

## **2011 Objectives**

- Create a new MENA-focused company with Egyptian and Turkish assets.
- Accelerate field exploration in Egypt.
- Implement drill programs in Turkey.
- Continue exploration at the Diabase Peninsula uranium project.
- Continue exploration at the Prairie Lake project and evaluate production of a niobium concentrate.
- Complete CCAA process and implement a plan to create value from Chibougamau assets.
- Continue to evaluate new project opportunities in the MENA region and elsewhere.

nuinsco

## Why Invest in Nuinsco

- One of Canada's most experienced exploration companies.
- Diverse, experienced and respected Board of Directors.
- Continuous history of discoveries over a 40-year period.
- Track record of spinning out projects to create value.
- Well-positioned to create Middle East North Africa ("MENA")-focused company with existing assets.
- Solid base of top-tier Canadian exploration assets in Saskatchewan, Ontario and Quebec.
- Evaluating additional projects worldwide.

Annual Report Edition, May 2011 3

## **Over 40 years of Exploration Success ...and Counting**

### **LETTER TO SHAREHOLDERS**

continued from page 1

I am pleased to say that 2010 saw the return of investors into the junior sector and, more importantly, exploration companies. I would not suggest that activity is back to normal levels as financial turmoil and fragile economies continue to exist around the globe. However, at some point it will be recognized that resources are a depleting asset and exploration is a necessity to ensure supply. The growth of the Chinese economy cannot be overstated and the consumption of metals will only continue to expand as emerging economies flourish. I can only assume that the events occurring in the Middle East and North Africa ("MENA") region will result in similar increased demand for durable goods as the region's overall standard of living improves. It goes without saying that what we are seeing worldwide has never been seen before. We believe that the fundamentals that support metal prices today will continue for some time and should bode well for our business of exploration.

#### **Focus**

Enough philosophizing. Those of you who read our news releases will know that Nuinsco is a growthoriented, multi-commodity mineral exploration company that is focused on world-class mineralized belts in Canada, Turkey and Egypt. It hardly sounds like we are focused when you look at all the metals and all the geographic areas that we are working in. However, I hope my earlier comments explain this diversity.

> Nuinsco is a growthoriented, multi-commodity mineral exploration company that is focused on world-class mineralized belts in Canada, Turkey and Egypt.

As long as our projects are not being negatively impacted by spreading resources too thin, I believe that we should have more projects rather than fewer. All of our projects are active and we will continue to work them until we have a discovery. However, a prudent company must also recognize when to put the brakes on a project and readjust its focus. In 2010, we did this with the Olympian project and previously with Marijane Lake/Huston Lake. Discoveries are only made by exploring; by being active on many fronts. project, particularly given the ease of access and its location near infrastructure including road, rail and power.

#### Diabase Peninsula (Canada)

Exploration at Diabase Peninsula, our uranium project in Saskatchewan's Athabasca basin, continues to generate positive results which point to the potential for high-grade uranium mineralization. Uranium deposits in the Athabasca basin are small and difficult to find, but also contain high grades and are very valuable. In November and December 2010, we completed a drill program, the results of which were announced in early April 2011. These results were sufficiently encouraging that we began another round of drilling. Assay labs continue to be very busy and this, combined with the complexity of uranium assaying, can result in reporting delays. However, as always, we will announce the results as soon as they are available.

#### Berta and Elmalaan (Turkey)

In Turkey, unfortunately very little work was done on both the Elmalaan copper/zinc VMS project and the Berta copper/gold/molybdenum porphyry project during 2010. This is not a reflection on the attractiveness of these projects, but is a direct result of the difficulty in funding exploration during the financial crisis, among other factors. Your board of directors has approved significant programs for 2011 at both Elmalaan and Berta and we will proceed to implement these programs as soon as practicable.

#### Bukari and Umm Samra (Egypt)

In early 2009, we visited Egypt's Eastern Desert and were impressed with the geology and the historical mining activity done in the area during Pharaonic and Roman times. Subsequent participation in the 2009 bid round resulted in winning bids on two gold concessions – Bukari and Umm Samra. During 2010, we, along with our Egyptian partner, devoted considerable time to negotiating a concession agreement with the Egyptian Mineral Resources Authority ("EMRA") for the Bukari project. In January 2011, the State Council, the Egyptian government's

> As a result of getting to know the MENA region and its people, we expect to create a new MENAfocused company with

We have the projects and the dedication of our people – both rare resources. We also have the support of our shareholders, which is truly one of our most valued assets.

As a result of getting to know the MENA region and its people, we expect to create a new MENA-focused company with our Egyptian and Turkish assets as a starting point. We have incorporated a subsidiary, NuMENA Minerals Corp., as a vehicle to move this forward and take it public when appropriate. We are already reviewing additional opportunities in Egypt and other countries in the region to be sure that we are part of the future in this highly mineralized and underexplored part of the world.

#### Chibougamau (Canada)

A suite of valuable assets, for which the market is not giving Nuinsco credit, are the former Campbell Resources Inc. projects in Chibougamau, Quebec. The Chibougamau Camp has produced ore containing over three million ounces of gold and 1.8 billion pounds of copper, and until the financial meltdown Campbell was on the road to becoming a significant copper and gold producer. Nuinsco became involved with Campbell in 2006 because we recognized the potential of not only the Chibougamau area but, more specifically, of Campbell's property holdings. This is why we supported Campbell for as long as we could. However, the support that they needed was too great given the economic circumstances and we had to protect our other assets during a very difficult time.

As part of the CCAA process, the Monitor of Campbell's assets received a number of opportunistic and ultimately unsatisfactory offers for Campbell's assets. In addition, the complexity of Campbell's debt situation made creditors difficult to deal with in an acceptable manner. Nuinsco and Ocean Partners Holdings Limited were two of the secured creditors and we soon realized the need to simplify the structure. As such, together Nuinsco and Ocean Partners purchased substantially all of the secured debt of Campbell, and have made a joint proposal to the Monitor. We expect to have this resolved in the very near future.

Meanwhile, we have been reviewing all of the data available on the Chibougamau properties and will provide a full review of these exciting assets and a plan to take them forward that will realize their value for our shareholders. If you have read this far, you will realize the magnitude of your Company and its assets. We have the projects and the dedication of our people – both rare resources. We also have the support of our shareholders, which is truly one of our most valued assets. With your support, and the support of a dedicated team that keeps us in compliance with regulators and keeps us running, Nuinsco not only made it through what was without a doubt one of the most difficult times in its history, but emerged stronger than ever. Thank you all.

#### Prairie Lake (Canada)

During 2010, we completed a significant trenching program at Prairie Lake, located near Marathon, Ontario. Unfortunately, results were delayed as the assay lab was not able to perform at the expected level. This was rectified and the results of this program have been released. We also completed a drill program, the results of which are pending.

The Prairie lake carbonatite is a complex structure with potential economic values for a variety of minerals including niobium, tantalum, phosphorous and rare earth elements. We have identified several hundred million tonnes of mineralized material on only a small portion of the overall property. We are now embarking on metallurgical studies to establish an economic method to separate the variety of contained minerals. Prairie Lake is a very unique and exciting our Egyptian and Turkish assets as a starting point.

legal branch, approved the Bukari concession agreement for presentation to the Peoples' Assembly (Egyptian Parliament) for passage into law. Once the concession agreement has been approved into law it will supersede all the tax laws, and the project will not be subject to income taxes, custom duties, sales taxes and all other taxes that exist in Egypt. The Bukari concession agreement will form the basis for an Umm Samra concession agreement.

To date, three surface programs have been completed in preparation for a full exploration program as soon as the concession agreements are approved. Thus far, gold assays from Bukari grading up to 4.34 oz Au/t have been announced. We look forward to more exciting news from these projects.

Sincerely,

René R. Galipeau Vice-Chairman and Chief Executive Officer

Building ... on a Proven Track Record

# Chibougamau Camp

## Nuinsco and Ocean Partners Look to Return Mining Region to Former Glory

**Chibougamau, Quebec, Canada** - The Chibougamau mining camp in northern Quebec is one of Canada's major copper and gold regions, producing more than 40 million tonnes of ore containing 3 million ounces of gold and 1.8 billion pounds of copper. In 2011, Nuinsco intends to do its part to make the Chibougamau region's star rise again.

In early 2006, Nuinsco assisted in restructuring Campbell Resources Limited, a gold and copper mining company with operations and exploration projects in Chibougamau.

During 2008, Campbell experienced significant financial difficulties and in January 2009 Campbell announced that it had entered CCAA protection.

In July 2010 Nuinsco, along with Ocean Partners Holdings Limited (Ocean Partners), both of which were secured creditors of Campbell, acquired the \$24 million debt of Campbell they did not previously own. As a result, the two companies hold \$40 million of debt and have effectively gained control over the Chibougamau mining camp.

"It is unfortunate to have a company with such assets be victim to the effects of the financial markets, however Campbell's debt load made it impossible for them to recover in the recent financial environment. This opened the door for Nuinsco and Ocean Partners to advance these assets and bring mining development and mineral exploration back to the Chibougamau area," said René Galipeau, Nuinsco's Vice-Chair and CEO.

The Chibougamau Mining Camp includes 15 past producing gold and copper mines. Key exploration and development assets that form part of the Nuinsco/Ocean Partners holdings include:

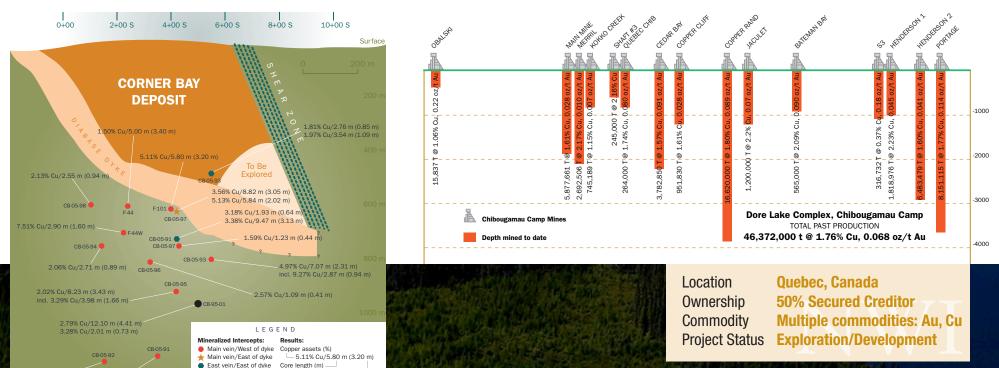

- Corner Bay: 1.9 million tons grading 6.48% Cu near-surface.
- Cedar Bay: produced 3.8 million tons grading 1.57% Cu and 0.091 oz/tonne Au; shaft down to 3,100 feet; exploration potential at depth.
- Copper Rand Mill: permitted 3,000+ tpd mill and tailings facility.

Once court proceedings are complete, these assets are expected to be restructured in a manner that will allow Nuinsco shareholders and Ocean Partners to realize the value of this historic and prolific mining camp.

The Chibougamau mining camp is one of Canada's major copper and gold regions, producing more than 40 million tonnes of ore, 3 million ounces of gold and 1.5 billion pounds of copper.

# **Diabase Peninsula**

**One of the Athabasca Basin's Most Prospective Uranium Projects** 

La Ronde, Saskatchewan, Canada - There were 61 nuclear reactors under construction around the world as of April 1, 2011 in 13 countries, along with 158 on order or planned and another 326 proposed according to the World Nuclear Association. This demand is the impetus for Nuinsco's commitment to exploration in the Athabasca Basin, a region that hosts the world's largest and richest uranium mines and already supplies about 20% of the world's uranium.

Exploration on the 21,900 hectare Diabase Peninsula Project, located approximately five kilometres north of the southern boundary of the Athabasca Basin, has included diamond drilling, airborne and ground geophysical surveys, geochemical surveys and mapping.

"The drilling we've done to date has identified all of the right indicators - highly-anomalous uranium, deformed graphite and sulphide-bearing basement rocks, graphite, arsenic, cobalt, nickel, boron and clay mineralization - all found in conjunction with uranium deposits in the Athabasca basin," said Paul Jones, President. "These results, along with geophysics that shows characteristics similar to deposits such as Key Lake, Rabbit Lake, Midwest Lake and Sue, have led the Diabase Peninsula project to be independently ranked as a premiere exploration project in the region."

Building on this work is a 2,321 metre drill program completed in December 2010 designed to follow up on past results that have returned strongly anomalous uranium mineralization.

All five holes in the 2010 program returned uranium values grading up to 71 parts per million (ppm) uranium (see news release issued April 7, 2011), continuing to indicate the potential for high-grade uranium mineralization.

"Uranium values exceeding 1ppm are accepted as being significant, with values exceeding 10ppm suggesting the presence of an alteration zone and the distinct possibility of a lens of high grade mineralization in the immediate vicinity," Mr. Jones added. "These results continue to enhance our understanding of the geology at Diabase, and are sufficiently encouraging that we have begun another round of drilling, This additional 2,000m program will again concentrate on the core of the property where numerous factors point to the possibility of a nearby uranium deposit."

Marathon, Ontario, Canada - Rare metals have attracted a lot of attention from the investing public lately. With a 330-360 million tonne mineralized domain outlined in an Exploration Target Mineralization Inventory (ETMI<sup>1</sup>) containing the rare metals niobium and tantalum, as well as rare earth elements (REE) and other minerals, Nuinsco is very excited about the potential of its Prairie Lake project.

"The ETMI released in January 2010 demonstrates the huge scale and potential economic significance of this multi-commodity deposit, however with only 12% of the total surface area of the Prairie Lake complex included in the ETMI we have barely scratched the surface," said President Paul Jones.

Setting it apart from other exploration projects that tout their potential for REE mineralization, Nuinsco's 100%-owned Prairie Lake project is easily accessible by road, potentially exploitable by open pit or quarry methods and close to existing rail and shipping infrastructure, and the TransCanada Highway. Located about 45 km northwest of Marathon, Ontario, it covers the entire 2.8 km<sup>2</sup> Prairie Lake Carbonatite Complex at surface.

<sup>&</sup>lt;sup>1</sup> The potential quantity and grade of the ETMI is conceptual in nature and there has been insufficient exploration to define a mineral resource. It is uncertain if further exploration will result in the discovery of a mineral resource.

The National Instrument 43-101 compliant ETMI sets the target estimate for the two areas drill-tested to date, the SW Zone and Jim's Showing, at between 330 and 360 million tonnes averaging 3.5% to 3.7% P2O5 (phosphorous oxide) and 0.12% to 0.14% Nb<sub>2</sub>O<sub>5</sub> (niobium oxide, 1.2 to 1.4 kg/tonne). As well as phosphorous and niobium, the suite of minerals of economic significance includes tantalum (Ta), uranium (U) and REEs (including lanthanum (La), cerium (Ce), samarium (Sm), neodymium (Nd) and yttrium (Y)).

In addition, COREM, a research laboratory in Quebec City, has completed testing, using flotation, dense media and magnetic separation methods, which demonstrates that it is possible to produce a concentrate containing a suite of REEs and grading up to 23.4% P2O5, which is used in high-value fertilizers. The concentrate also contains 0.17% (1.7kg/tonne) Nb2O5, a high-value mineral used in steel alloys, superconducting magnets and the aerospace industry.

#### continued on page 8 PLEASE SEE GAINING MOMENTUM

**Building ...on a Proven Track Record** 

## **EGYPT AND** THE MENA REGION continued from page 1

The exploration programs consisted of mechanical and hand excavation followed by prospecting. Several hundred grab samples of rock were collected from six known occurrences: Bukari One, Abu Muawaad, Talat Gadalla, Daghbag, Kab Hamdalla and Wadi Zeidum.

Very importantly, in mid-February 2011, shortly after the conclusion of the pro-democracy demonstrations in Egypt, approval was received from the Egyptian State Council of the Concession Agreement covering the Bukari Concession Area.

"This is a significant milestone in the approval process and a concrete indication of Egypt's commitment to moving forward with building a mining industry," Mr. Jones said. "We have yet to receive an indication as to when the Bukari Agreement will be presented to the People's Assembly for final approval and passage into law."

The Bukari and Umm Samra concessions, both easily accessible by paved highway, are located some 50 km northwest of Centamin Egypt Limited's multi-million ounce Sukari Gold Mine. Sukari is being expanded to increase annual production to about 500,000 ounces of gold over the next three years.

• BASE METALS •

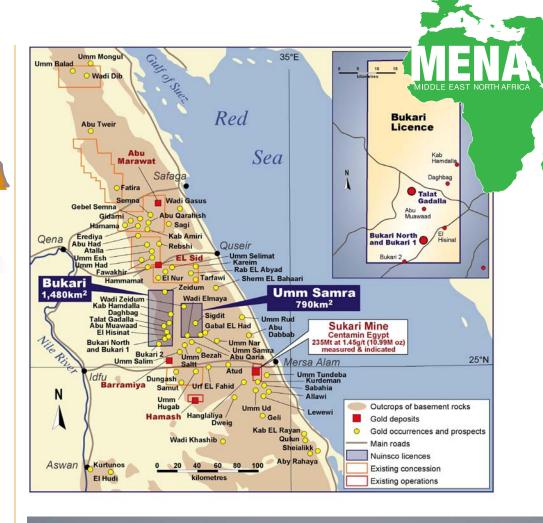

## **Tremendous Potential for Copper Discoveries** in an Underexplored Region

Istanbul, Turkey - Gold and base metal exploration and development have been on the rise in Turkey, in step with an increasing number of foreign investors active in the country. Inmet Mining Corp., Eldorado Gold Corp. and Anatolia Minerals are, along with Nuinsco, among those companies actively evaluating and developing Turkish assets.

For its part, Nuinsco recognized the mineral potential of Turkey in 2005, and acquired two properties: Berta and Elmalaan.

The Berta property, a joint-venture with Xstrata Copper, is located approximately 50 km south of the Black Sea in north-eastern Turkey and lies within the prolifically mineralized Tethyan-Eurasian Metals Belt. This belt hosts numerous ore deposits along its length that traverse several countries. For example, Iran's Sarcheshmeh Mine is one of the world's largest copper mines at 1.2 billion tonnes grading about 1% copper. The Berta porphyry is reputed to be the largest copper anomaly in the Turkish Pontides, covering 15km<sup>3</sup>.

Location **Ownership** Commodity

**Eastern Desert** 50% Au Project Status Exploration

**Drilling at the Berta** property in Turkey

## Berta (Turkey)

Location **Ownership** Commodity **Project Status** 

**Northeastern Turkey NWI/Xstrata Copper JV Porphyry Copper/Gold/Moly Exploration** 

Extraordinarily anomalous copper has been obtained in drilling, most notably from hole SD-07-08 that intersected 710 metres of 0.28% Cu. The results from this highly mineralized hole that ended at 771.5m in mineralization highlight the potential of the Berta property.

Six kilometres south of the Black Sea coast, Nuinsco's Elmalaan VMS Property is easily accessible year-round. Previous work by Nuinsco identified massive sulphides in outcrop and locally-derived boulders grading up to 30.38% copper and 56.30% zinc – exceptionally high grades by any standard.

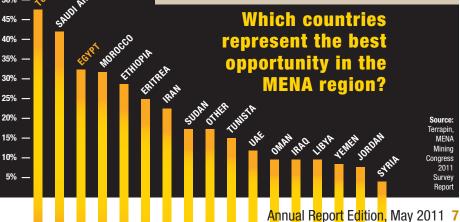

The extraordinary exploration potential of Berta and Elmalaan gave Nuinsco its entry in the burgeoning Middle East-North Africa (MENA) region. With the addition of the Bukari and Umm Samra gold concessions in Egypt's Eastern Desert, the Company has expanded its base on which to move forward in this underexplored part of the world.

"We have established a solid presence and are comfortable doing business in the MENA region," said René Galipeau, Vice-Chairman and CEO. "Our Egyptian concessions, combined with the projects in Turkey, could be significant enough to consider building a new company focused on MENA countries to take advantage of other opportunities in this highly-prospective region."

**Northeastern Turkey** 100% VMS Cu-Zn **Underground potential Exploration** 

## **Equity Holdings Offer Ability to Finance Exploration** While Minimizing Shareholder Dilution

Toronto, Ontario, Canada - Without operating mines, mineral exploration companies typically finance their exploration activities through equity financings. Given its wealth of assets, Nuinsco is in the fortunate position of having the alternative to minimize financing dilution to shareholders by crystallizing the value of certain projects by selling or spinning them off for cash, equity, royalties or a combination of these. At the opportune time, these equity holdings can be sold in the market and royalties can also be monetized to generate the cash to finance operations and exploration activities without issuing additional shares in Nuinsco.

In line with this strategy, Nuinsco currently holds common shares in two publicly traded companies - Coventry Resources Limited (ASX:CVY) and Victory Nickel Inc. (TSX:Ni). These holdings give Nuinsco non-dilutive financing alternatives that other exploration companies don't have.

#### Coventry Resources (ASX: CVY)

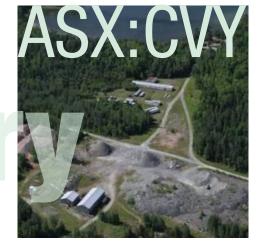

In April 2010, Nuinsco crystallized the value of its Cameron Lake Gold project (now called Cameron Gold Project), located near Kenora, Ontario, through its sale to Coventry Resources. Nuinsco received total consideration valued at approximately \$12 million comprised of cash, Coventry Resources shares and a 3% net smelter return royalty. At March 31, 2011, Nuinsco owned 7% of Coventry shares.

Coventry Resources is focused on gold assets in the Superior Province in Eastern Canada. Coventry Resources' principal asset is the Cameron Gold project. Following the acquisition from Nuinsco, Coventry Resources announced a recalculated JORC-compliant indicated and inferred mineral resource estimate as follows:

Category	Tonnes	<b>Grade</b> (g/t gold)	Gold (Ounces)
Indicated Inferred	4,164,000 7,148,000	3.16 2.54	422,353 583,480
Total	11,312,000	2.77	1,005,833
Source: Coventr	v Resources Limited		

In announcing the sale, René Galipeau, Vice-Chairman and CEO, stated that the transaction places Nuinsco "in a strong position with the financial resources to advance its exploration projects in Canada, Turkey and potentially in Egypt. We are confident that Coventry will be successful in executing its plans to advance the project and expect that Nuinsco's royalty and equity interests will appreciate in value as a result of its efforts."

Equity holdings can be sold in the market and royalties can also be monetized to generate the cash to finance operations and exploration activities without issuing additional shares in Nuinsco.

**Cameron Gold Project** 

Coventry Resources also has another gold exploration asset, the Ardeen Gold Project located about 110km west of Thunder Bay, Ontario, which has historically produced about 30,000 ounces of gold and 140,000 ounces of silver from underground workings, according to Coventry Resources.

## Victory Nickel (TSX: NI)

In 2007, Nuinsco spun off three nickel projects, Minago, Mel and Lac Rocher, to create Victory Nickel. Shares in the new company were distributed to Nuinsco shareholders, creating immediate value, and Nuinsco also retained a stake in Victory Nickel. At March 31, 2011, Nuinsco owned 2.2% of Victory Nickel shares.

Today, Victory Nickel has four sulphide nickel projects, including the Lynn Lake Mine which Victory Nickel has optioned to Prophecy Resource Corp. (TSX-V:PCY) in return for cash and shares in Prophecy. Victory Nickel has one of Canada's largest sulphide nickel inventories, and is focused on becoming a mid-tier nickel producer.

With gold and nickel prices trending upward. Nuinsco is confident that its strategy of using equity in other companies as one means of financing will continue to serve shareholders well and provide the opportunity to effectively explore its projects in Canada and abroad.

#### **GAINING MOMENTUM** continued from page 6 **Prairie Lake**

Additional metallurgical tests will evaluate producing a rare metal concentrate.

Nuinsco completed approximately 4,000 m of diamond drilling and more than 2 km of trenching in 2010 with excellent results. Trench results included grades up to 1.08% REEs, 6.14% P205, 0.27% Nb2O5 and 23.7ppm Ta (see news releases issued March 10 and April 11, 2011).

"This trenching program demonstrates strong niobium and phosphorus mineralization, with REEs and tantalum, over significant sampling lengths, indicating the potential to substantially increase the scale of the ETMI reported previously," Mr. Jones, added. "For instance, the 343.3m long Raspberry Hill Trench includes a 250m interval grading 0.117% Nb2O5 and 3.09% P2O5, while in the 687m long Grouse Trench a 116.7m interval grades 0.1% Nb2O5 and 2.42% P2O5."

The first diamond drill hole reported (see news release issued April 15, 2011) further added to the knowledge base, returning grades up to 0.957% Nb2O5 and 8.68% P2O5 as part of a 246m interval grading 0.118% Nb2O5 and 3.41% P2O5 in addition to REEs and tantalum.

"With interest in rare metals increasing and world supply tightening, Nuinsco's Prairie Lake project is an increasingly important and valuable asset," said René Galipeau, Vice-Chairman and CEO. "We have already delineated a significant tonnage hosting not only REEs but rare metals, phosphates and uranium and we have shown that a high-value concentrate can be produced using low-cost flotation. The drilling and trenching is designed to increase the known tonnage incorporated in the ETMI as well as to help us better understand the project's mineralization."

Forward-Looking Information: This document contains forward-looking information. All statements, other than statements of historical fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future constitute forward-looking information. This forward-looking information reflects the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking information is subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on the Company. Factors that could cause actual results or events to differ materially from current expectations include, among other things: the possibility that actual circumstances will differ from estimates and assumptions; uncertainties relating to the availability and costs of financing needed in the future; failure to establish estimated mineral resources; fluctuations in commodity prices and currency exchange rates; inflation; recoveries being less than those indicated by the testwork carried out to date (there can be no assurance that recoveries in small scale laboratory tests will be duplicated in large tests under on-site conditions or during production); changes in equity markets; operating performance of facilities; environmental and safety risks: delays in obtaining or failure to obtain necessary permits and approvals from government authorities; unavailability of plant, equipment or labour; inability to retain key management and personnel; changes to regulations or policies affecting the Company's activities; the uncertainties involved in interpreting geological data; and the other risks disclosed under the heading "Risk Factors" and elsewhere in the Company's annual information form dated March 31, 2011 filed on SEDAR at www.sedar.com. Currently, Egypt is experiencing a state of civil unrest and political transition, the consequences of which are difficult to determine with certainty at this time and which may adversely affect the ability of Nuinsco and its partners to obtain tenure to its Egyptian projects and may negatively affect exploration activities and/or such projects. There is no assurance that future political and economic conditions in Egypt will not result in the Government of Egypt adopting different policies respecting foreign development and ownership of mineral resources. Any such change in policy may result in changes in laws affecting ownership of assets, land tenure and mineral concessions, taxation, royalties, rates of exchange, environmental protection, labour relations, repatriation of income and return of capital, which may affect the ability to undertake exploration and development activities in respect of its properties. The effect of these factors cannot be accurately predicted. Forward-looking information speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein. All exploration work is supervised by Paul Jones, President, who acts as QP under National Instrument 43-101

## NUINSCO RESOURCES LIMITED

#### CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2010 AND 2009

**DATED MARCH 18, 2011** 

#### MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

All of the information in the annual report and accompanying consolidated financial statements of Nuinsco Resources Limited is the responsibility of management. The consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles. Where necessary, management has made judgments and estimates in preparing the consolidated financial statements, and such statements have been prepared within acceptable limits of materiality. The financial information contained elsewhere in the annual report has been reviewed to ensure that it is consistent with the consolidated financial statements.

Management maintains appropriate systems of internal control to give reasonable assurance that its assets are safeguarded, and the financial records are properly maintained.

The Board of Directors is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal control and exercises this responsibility principally through the Audit Committee. The Audit Committee, which is comprised of independent non-executive Directors, meets with management and the external auditors to review the auditor's report and the consolidated financial statements to satisfy itself that management is properly discharging its responsibilities to the Directors, who approve the consolidated financial statements.

A firm of independent Chartered Accountants, appointed by the shareholders, audits the consolidated financial statements in accordance with Canadian generally accepted auditing standards and provides an independent professional opinion thereon. The external auditors have free and full access to the Audit Committee with respect to their findings regarding the fairness of financial reporting and the adequacy of internal controls.

René R. Galipeau Vice-Chairman and CEO March 18, 2011 Alison J. Sutcliffe Vice-President, Finance and CFO March 18, 2011

#### **INDEPENDENT AUDITOR'S REPORT**

#### To the Shareholders of Nuinsco Resources Limited

We have audited the accompanying consolidated financial statements of Nuinsco Resources Limited and its subsidiaries, which comprise the consolidated balance sheets as at December 31, 2010 and December 31, 2009, and the consolidated statements of operations, comprehensive income, cash flows and shareholders' equity for the years then ended, and a summary of significant accounting policies and other explanatory information.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Nuinsco Resources Limited and its subsidiaries as at December 31, 2010 and December 31, 2009 and the results of its operations and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

#### **Emphasis of Matter**

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which indicates that the company has not commenced commercial production and accordingly the company is dependent upon debt or equity financing and the optioning and/or sale of resource or resource-related assets for its funding. These conditions, along with other matters as set forth in Note 1, indicate the existence of a material uncertainty that may cast significant doubt about the company's ability to continue as a going concern.

The accompanying notes are an integral part of these consolidated financial statements

#### NUINSCO RESOURCES LIMITED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### December 31, 2010 and 2009

(All tabular amounts are in thousands of Canadian dollars)

#### 1. NATURE OF OPERATIONS

Nuinsco Resources Limited ("Nuinsco" or "the Company") is primarily engaged in the acquisition and exploration of precious and base metals in Canada, Turkey and Egypt. The Company conducts its activities on its own or participates with others on a joint venture basis. The Company also makes strategic investments through equity or loan financing to companies engaged in the exploration and development of resource properties.

#### Sale of Cameron Lake Property to Coventry Resources Limited

On December 23, 2009, the Company announced that it had entered into a binding agreement with Coventry Resources Limited ("Coventry"), a company listed on the Australian Stock Exchange, to sell its Cameron Lake property and mill. The transaction was completed on April 20, 2010 and involved the receipt of consideration as follows:

- Cash of \$100,000 received in December 2009;
- Cash of \$5,900,000 received on April 20, 2010;
- 12 million Coventry shares, representing 17% of the then-outstanding shares of that company. Coventry shares had a closing price of A\$0.265 (\$0.247) on April 20, 2010; and
- A 3% net smelter return ("NSR") royalty under which Coventry will have the right to reduce the royalty to a 1% NSR at any time within five years of April 20, 2010 by making, at Coventry's option, either a cash payment of \$2,000,000 or issuing additional Coventry shares with an equivalent market value (Note 8).

The following table illustrates the components of the gain on sale of the Cameron Lake property:

Consideration received				
Cash			\$	6,000
Coventry shares (Note 5)				2,958
Royalty interest (Note 8)				3,000
Aggregate consideration				11,958
Net book value of assets sold (liabilities assumed) and expenses of sale				
Cameron Lake property	\$	1,796		
Mill		54		
Asset retirement obligation ("ARO") assumed		(114)		
		1,736	-	
Transaction expenses		114		
			-	1,850
Gain on sale of Cameron Lake				10,108
Provision for income taxes (drawdown of previously recorded future income tax a	isset)			1,297
Net after-tax gain			\$	8,811

The provision for income taxes is a non-cash item and offsets the recovery for income taxes recognized in the fourth quarter of 2009. Upon sale of Cameron Lake, the Company repaid its interest-bearing promissory note along with accrued interest thereon.

#### Transactions with Jien International Investment, Ltd.

On July 31, 2009, the Company entered into an agreement with Jien International Investment, Ltd. ("JIIL"), a Canadian subsidiary of Jilin Jien Nickel Industry Co. Ltd. of the city of Panshi, Province of Jilin, China, which enabled it to repay a short-term loan and related balances originally due June 15, 2009, in full. The terms of the financing arrangement entered into (the "Arrangement") are as follows:

- The Company sold the 38,500,786 shares of Victory Nickel Inc. ("Victory Nickel") that it then owned, along with certain associated rights pursuant to the rights offering announced by Victory Nickel on June 24, 2009, to JIIL for cash of US\$2,700,000;
- JIIL advanced US\$2,800,000 by way of an interest-bearing promissory note to Nuinsco. The note bore interest at 8% per annum calculated and compounded monthly and was payable upon maturity or acceleration of the term. The term of the loan was two years and the Company was permitted to make prepayments at any time. The loan was secured upon the Company's shareholdings in Gold Hawk Resources Inc. ("Gold Hawk") and Cameron Lake JEX Corporation and the Cameron Lake property.

The Arrangement enabled Nuinsco to settle its short-term loan, provided Victory Nickel with a strategic investor, reduced the rate of interest and eliminated immediate cash debt-servicing requirements. As described above, this loan was settled with funds from the Cameron Lake sale.

#### **Going Concern**

These consolidated financial statements have been prepared using Canadian generally accepted accounting principles (Canadian "GAAP") applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. At December 31, 2010, the Company had working capital of \$4,411,000 (December 31, 2009 – \$2,696,000) available to fund operations and exploration activities. The Company continues to examine a number of strategies to maximize the realization of previously written-down amounts due from past investments in Campbell Resources Inc. ("Campbell").

The Company is subject to the risks and challenges experienced by other companies at a comparable stage. These risks include, but are not limited to, continuing losses, dependence on key individuals and the ability to secure adequate financing or to complete corporate transactions to meet the minimum capital required to successfully complete its projects and fund other operating expenses. Development of the Company's current projects to the production stage will require significant financing which, depending on prevailing market conditions, may prove difficult. These factors represent material uncertainties.

None of the Company's projects has commenced commercial production and, accordingly, the Company is dependent upon debt or equity financings and the optioning and/or sale of resource or resource-related assets for its funding. The recoverability of the carrying value of exploration and development projects, and ultimately the Company's ability to continue as a going concern, is dependent upon exploration results which have the potential for the discovery of economically recoverable reserves and resources, the Company's ability to finance exploitation of its projects through debt or equity financings and the optioning and/or sale of resource or resource-related assets for its funding.

Should the Company not be able to continue to achieve favourable exploration results, obtain the necessary financing or achieve future profitable production or sale of properties, the carrying value of the Company's assets could be subject to material adjustment and, in addition, other adjustments may be necessary to these financial statements should such adverse events impair the Company's ability to continue as a going concern as contemplated under Canadian GAAP.

#### 2. BASIS OF PRESENTATION, USE OF ESTIMATES AND MEASUREMENT UNCERTAINTY

#### **Basis of Presentation**

These consolidated financial statements have been prepared by management in accordance with Canadian GAAP and include the accounts of the Company and those of its subsidiaries using the purchase method of accounting. The Company accounts for its interest in joint ventures using proportionate consolidation.

#### Use of Estimates

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes those estimates are reasonable. The accounting elements which require management to make significant estimates and assumptions include

determining impairment in and values of investments, exploration and development projects, royalty interests and future income tax assets as well as the valuation of stock option compensation. Accounting for these elements is subject to estimates and assumptions regarding, among other things, metal recoveries, future metals prices, future operating costs, future mining activities and future market volatility. Management bases its estimates on historic experience and other assumptions it believes to be reasonable under the circumstances. However, actual results could differ from those estimates.

#### Measurement Uncertainty

The carrying values of the Company's exploration and development projects at December 31, 2010 totalled \$12,266,000 (2009 - \$9,657,000). Management's review of these carrying values indicated that at December 31, 2010, the properties were not impaired, except for the Triggs option which was written down to \$nil in the third quarter of 2010, followed by the remaining options within the Olympian project in the fourth quarter of 2010 (Note 9) and the Marijane and Huston Lakes property which was written down to \$nil in the year ended December 31, 2009. As an exploration company, the results of previous work, including drilling and analysis, provides information which either supports or discredits the potential for discovery. If geological information obtained is positive, the projects' values are not considered impaired. Management's conclusion about impairment is also dependent on assumptions about several factors including future operating costs, metal production levels, future metal prices and capital equipment needs and costs. It is also dependent upon the Company's ability to raise financing to successfully complete its projects as discussed in Note 1. In recent years there has been unprecedented volatility in several of the factors involved in such an analysis including metals prices, costs of fuel, power and other operating supplies and the costs of capital equipment which has resulted in an increased amount of measurement uncertainty. While such volatility appears to have somewhat reduced, future changes in these parameters could give rise to material changes in asset carrying values.

The Company also had investments in marketable securities classified as "level two", as described in Note 3, which involved making estimates on the fair value of its warrants in Victory Nickel which are derivative instruments. The Company utilizes the Black-Scholes option-pricing model to value such securities which involves making estimates on inputs to the model such as stock volatilities.

The Company also made loans to Campbell which are shown as Interest in Campbell Resources Inc. ("Interest in Campbell"), and makes conclusions as to the impairment and future recoverability of such balances. These loans were recorded at an aggregate amount of \$10,423,000 before recording an aggregate provision for writedown of \$7,923,000 in the year ended December 31, 2008 and before the acquisition of Campbell's debt in 2010. The provision for writedown is dependent upon assumptions about several factors or conditions affecting Campbell and the value of its exploration and development projects and may be based on limited information despite the Company's significant involvement in Campbell's CCAA proceedings as a secured creditor (Note 7). Interest in Campbell is classified as a "level three" investment which is subject to the highest degree of measurement uncertainty. Accordingly, future changes in any parameters used in the valuation could give rise to material changes in asset carrying values.

The Royalty Interest acquired pursuant to the Cameron Lake sale (Notes 1 and 8) is also subject to a high degree of measurement uncertainty. Future changes in probabilities of production or any other parameters used in the valuation could give rise to material changes in recorded asset values.

Management will continue to monitor the critical factors impacting its impairment analyses and will reevaluate the carrying value of its long-lived assets as necessary.

#### 3. SIGNIFICANT ACCOUNTING POLICIES

#### **Financial Instruments**

The Company's financial instruments include cash and cash equivalents, restricted cash, marketable securities, accounts receivable, securities held for trading, loans to Campbell, accounts payable and accrued liabilities, amounts due to or from Victory Nickel and certain long-term obligations. Each financial asset and financial liability instrument, other than an asset or liability in a related party transaction, is initially measured at fair value, adjusted for any associated transaction costs. In subsequent periods, the estimated fair values of financial instruments are determined based on the Company's assessment of available market

information and appropriate valuation methodologies including reviews of current interest rates, related market values and current pricing of financial instruments with comparable terms; however, these estimates may not necessarily be indicative of the amounts that could be realized or settled in a current market transaction.

Financial assets and financial liabilities are classified into one of five categories: held to maturity, available for sale, loans and receivables, other financial liabilities and held for trading.

All financial instruments classified as available for sale or held for trading are measured at fair value. Changes in the fair value of financial instruments designated as held for trading and recognized derivative financial instruments such as warrants are charged or credited to the consolidated statement of operations for the relevant period, while changes in the fair value of financial instruments designated as available for sale, excluding impairments that are other than temporary, are charged or credited to other comprehensive income ("OCI") until the instrument is sold. All other financial assets and liabilities are accounted for at cost or at amortized cost depending upon the nature of the instrument. After their initial fair value measurement, they are measured at amortized cost using the effective interest rate method. Transaction costs associated therewith are originally netted against the financial instrument and are amortized to operations using the effective interest rate method.

The Company has classified its cash and cash equivalents, restricted cash and derivative contracts (warrants) as held for trading and its marketable securities as available for sale for accounting purposes. These instruments are measured on the consolidated balance sheet at fair value. Accounts receivable, amounts due from Victory Nickel and loans to Campbell have been designated as loans and receivables and carried at amortized cost adjusted for any impairment provision. Accounts payable and accrued liabilities along with any amounts due to Victory Nickel and long-term obligations are carried at amortized cost and are classified as other financial liabilities.

#### Cash and Cash Equivalents and Restricted Cash

Cash and cash equivalents consist of balances with banks and investments in money market instruments. The investments are recorded at market value and are redeemable on demand. As at December 31, 2010 and 2009, the entire balance consisted of cash held with banks. Restricted cash comprises US\$200,000 held in a GIC supporting a letter of guarantee (Note 9).

#### Investments

Marketable securities, other than equity-accounted investments and derivatives, are classified as available for sale and recorded at fair value. Valuations of the investments have been determined based on a hierarchy of valuation principles, which have been applied based on publicly available information. The valuation approach applied is as follows:

- Fair values of instruments traded in active markets are based on quoted bid prices at the reporting date. Such investments are determined to be categorized as "Level One".
- Where instruments are not traded in an active market, fair value is determined using valuation techniques taking into account market information for financial instruments with similar characteristics as the underlying instrument being valued. Such investments are subject to higher degrees of measurement uncertainty than Level One and are determined to be categorized as "Level Two".
- Where there is no comparable market information to determine the fair value of the instrument, fair value is calculated using other techniques, such as estimated discounted cash flows using contractual terms of the instrument, discount rates considered appropriate for the credit risk of the instrument and the current volatility in the marketplace. Such investments have an even greater degree of uncertainty and are determined to be categorized as "Level Three".

When information or events indicate other than a temporary decline in value, the impairment loss is recognized through operations in the period in which such events occur. Impairment losses recognized in net income for a financial instrument classified as available for sale are not reversed.

The Company accounts for its investment in entities which are not controlled, but over which it has the ability to exercise significant influence, using the equity method of accounting. Such entities included its approximate 15% ownership interest in Victory Nickel to July 31, 2009. Effective July 31, 2009, the Company sold its significant interest in Victory Nickel as described in Note 1. Accordingly, the Company no longer has any equity-accounted investments.

#### Impaired Loans

When a loan is deemed to be impaired, its carrying amount is reduced to its estimated realizeable amount which is measured by either discounting the expected future cash flows at the effective interest rate inherent in the loans or by measuring the fair value of the security underlying the loans, net of expected costs including amounts legally required to be paid to other borrowers. The amount initially recognized as an impaired loan, together with any subsequent change, is charged to the provision for writedown of amounts due.

#### **Royalty Interest**

Royalty interest represents the 3% NSR acquired pursuant to the Cameron Lake sale (Note 1). The fair value of the acquisition cost was determined using estimated net cash flows discounted at management's best estimate of a discount rate taking into account project risk factors. Acquisition costs of development and exploration stage mineral royalty interests are not depleted until such time as royalty-generating production begins.

#### **Exploration and Development Projects**

Exploration and development projects include the direct costs related to the various mineral properties, including cost of acquisition of the properties and deferred exploration and development costs, net of any recoveries. These costs are capitalized and accumulated on a property-by-property basis and will be amortized as operating expenses against future revenue upon commencement of commercial production using a unit-of-production method based upon estimated proven and probable mineral reserves.

The carrying values of exploration and development projects represent unamortized net costs incurred to date and do not necessarily reflect present or future values. The recoverability of these amounts is dependent upon the existence of economically recoverable reserves, upon the Company's ability to obtain the necessary financing to complete the development and upon future profitable production and/or sale.

#### **Government Assistance**

Government assistance is recorded in the financial statements when there is reasonable assurance that the Company has complied with, and will continue to comply with, all conditions necessary to obtain the assistance. Any government assistance relating to the exploration and development properties is recorded as a reduction of those related expenditures.

#### **Property and Equipment**

Property and equipment are recorded at cost less accumulated amortization. Amortization is provided over the related assets' estimated useful life using the declining-balance method at an annual rate of 20% for equipment.

#### **Impairment of Long-Lived Assets**

On an ongoing basis, the Company evaluates each property based on results to date to determine the nature of exploration and development activities that are warranted in the future or if there is any impairment in the carrying value. In the event that facts and circumstances indicate that the Company's long-lived assets may be impaired, an evaluation of recoverability would be performed. Such an evaluation entails comparing the estimated future undiscounted cash flows associated with the asset to the asset's carrying amount to determine if a write-down to fair value is required. Fair value is normally determined using the discounted value of future net cash flows. Where estimates of future net cash flows are not available, such as in the case for exploration assets, management's assessment of the property's estimated fair value is based on exploration results to date, a review of comparable transactions and a consideration of historic costs. Impairment losses on exploration and development projects are recorded as writedown of exploration and development projects in the consolidated statement of operations.

#### **Asset Retirement Obligations**

The fair value of liabilities for any ARO will be recognized in the period in which they are incurred and the fair value can be reasonably estimated. The Company recognized an ARO relating to its Cameron Lake project. Accordingly, an equal and offsetting amount was included in exploration and development projects for Cameron Lake and as an ARO in liabilities at the discounted value of the liability. In subsequent periods to de-recognition in 2010, the Company recorded a charge to operations to accrete the discounted ARO amount to the final expected liability or to de-recognition through sale of the underlying project. As the development of any additional project progresses, the Company will assess whether an additional ARO has arisen.

#### **Stock-based Compensation Plans**

#### Stock Option Plan

The Company has a stock option plan which is described in Note 12. Awards to non-employees are measured at the earliest of the date at which performance is complete, the date at which a commitment for performance by the counterparty to earn the option is reached or the date at which the equity instruments are granted. Awards made to employees are measured at the grant date. All stock-based awards made to employees and non-employees are recognized at the date of grant using a fair-value-based method to calculate compensation expense. Compensation expense is charged to operations over the vesting period of the options or service period, whichever is shorter. Stock options vest either immediately or over a twelvemonth period.

#### Share Incentive Plan

The Company has a share incentive plan (the "Share Incentive Plan"), which includes both a share purchase plan (the "Share Purchase Plan"), and a share bonus plan (the "Share Bonus Plan"). The Share Incentive Plan is administered by the directors of the Company. The Share Incentive Plan provides that eligible persons thereunder include directors, senior officers and employees of the Company and its designated affiliates and consultants who are primarily responsible for the management and profitable growth of the business.

The Share Incentive Plan is described in Note 12. The Company uses the fair value method of accounting for, and to recognize as compensation expense, its stock-based compensation for employees. Shares issued under the Share Incentive Plan are valued based on the quoted market price on the date of the award. This amount is expensed over the vesting period.

#### **Flow-through Shares**

The Company has financed a portion of its exploration and development activities through the issue of flowthrough shares. Under the terms of these share issues, the tax attributes of the related expenditures are renounced to subscribers. When the renunciation is made, the tax value of the renunciation is recorded as a liability and charged against share capital. Where the Company has a valuation allowance, which reduces future income tax assets, the valuation allowance is reduced and an income tax recovery is recorded in the consolidated statement of operations.

#### **Revenue Recognition**

Gains on sales of marketable securities are recognized on the settlement date. Consulting fees are recognized when services are rendered which includes amounts amortized over the non-cancellable term of the agreement. Other income, including interest income, is recognized on an accrual basis using the effective interest rate method.

#### **Foreign Currency Translation**

Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates in effect at the balance sheet date. Non-monetary items are translated at historic rates. Expenses are translated at the average exchange rate during the year (there are no revenues denominated in foreign currencies). Exchange gains and losses arising on the translation of monetary assets and liabilities are included in the determination of income for the current period.

#### **Income Taxes**

The Company accounts for income taxes using the asset and liability method. Under this method of tax allocation, future income tax assets and liabilities are determined based on differences between the financial statement carrying values and their respective income tax bases (temporary differences). Furthermore, temporary differences include the benefit of tax losses available to be carried forward to future years. Future income tax assets and liabilities are measured using the tax rates expected to be in effect when the temporary differences are likely to reverse. The effect on future income tax assets and liabilities of a change in tax rates enacted is included in operations in the period in which the change is enacted or substantively enacted. The amount of future income tax assets recognized is limited to the amount that is more-likely-than-not to be realized.

#### **Income per Share**

The Company uses the treasury stock method in determining the diluted income per share. The diluted income per share data assumes the exercise of all outstanding warrants and options except when the assumed exercise is anti-dilutive. Basic income per share amounts are calculated using the weighted average number of common shares outstanding during the period. The application of the treasury stock method resulted in the weighted average number of shares being increased by 2,903,000 shares in 2010, with respect to options outstanding for purposes of computing the diluted income per share. In 2009, the weighted average number of shares was increased by 226,000 shares, also with respect to options, for purposes of computing the diluted income per share amounts equalled the basic income per share amount in 2010 and 2009. The total options and warrants outstanding as at December 31, 2010 which could dilute future earnings should they be fully exercised is 44,560,962 (2009 – 33,578,016).

#### New Accounting Policies

There have been no new accounting policies adopted in these financial statements. The volume of accounting pronouncements being introduced by The Canadian Institute of Chartered Accountants ("CICA") applicable to the Company has reduced significantly pending the transition to International Financial Reporting Standards ("IFRS").

#### **Future Accounting Changes**

#### International Financial Reporting Standards

The CICA plans to transition Canadian GAAP for public companies to IFRS. The effective changeover date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The Company is working on the transition to IFRS and is developing and refining disclosures for the Company's consolidated financial statements. The effects on the Company's transition date consolidated balance sheet (as at January 1, 2010) and as at December 31, 2010 will be outlined in the Company's first set of unaudited interim consolidated financial statements for the quarter ended March 31, 2011.

#### 4. FINANCIAL RISK MANAGEMENT AND CAPITAL DISCLOSURES

#### **Financial Risk Management**

The Company's financial instruments include cash and cash equivalents, restricted cash, marketable securities (which may include derivative contracts (warrants)), accounts receivable, amounts due from or to Victory Nickel, convertible debenture and loan amounts due from Campbell (included in interest in Campbell), accounts payable and accrued liabilities and certain long-term obligations. The fair value of these financial instruments approximates their carrying value.

The Company's risk exposures with respect to its financial instruments and the impact on the Company's financial statements are summarized below:

#### Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company's cash and cash equivalents, as well as its restricted cash, are held through large Canadian financial institutions. The Company has a corporate policy of investing its available cash in Canadian government instruments and certificates of deposit or other direct obligations of major Canadian banks, unless otherwise specifically approved by the Board. The Company does not own asset-backed

commercial paper. The Company's routine accounts receivable consist primarily of amounts due from federal and provincial governments. Amounts due from or to Victory Nickel are settled on a regular basis.

Concentration of credit risk arises as a result of the loan and convertible debenture due from Campbell totalling \$7,923,000 before impairment writedown and before the acquisition of Campbell debt in 2010. Campbell is in default on its loans to the Company as it has not made the required principal or interest payments. These deficient interest payments have been included in the balance of the loan up to September 30, 2008. The Company acquired additional Campbell debt during 2010 as described in Note 7. Given Campbell's current financial position, there is a significant credit risk associated with these loans. For that, and reasons further described in Note 7, the Company determined that a writedown of the loans was required in 2008.

The maximum credit risk is limited to the carrying amounts of monetary assets and aggregates \$5,714,000 (2009 - \$4,079,000).

#### Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company tries to maintain sufficient capital in order to meet short-term business requirements, after taking into account cash flows from operations and the Company's holdings of available cash and cash equivalents and marketable securities. This is accomplished by budgets and forecasts which are updated on a periodic basis to understand future cash needs and sources. Spending plans are adjusted accordingly when possible to provide for liquidity.

The Company manages its liquidity risk through the mechanisms described above and as part of Capital Disclosures below. The Company has historically relied on issuances of shares to develop projects and to finance day-to-day operations and may do so again in the future.

As referred to in Note 1, the Company has entered into a number of transactions which have enhanced liquidity. The Company does not have any significant long-term liabilities at December 31, 2010 other than the amount payable under the acquisition of Campbell's debt as described in Note 7. All other contractually obligated cash flows are payable within the next fiscal year with the exception of obligations related to the Company's premises (Note 17). Upon ratification of the agreements regarding Egypt (Note 9), there will be significant expenditure commitments to maintain tenure on the property.

#### Market risk

The Company is exposed to interest rate risk, commodity price risk and currency risk with respect to its financial instruments.

#### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash equivalents earn interest at variable short-term rates at December 31, 2010 and 2009. The estimated effect of a 50bps change in interest rate would not have a material effect on the Company's results of operations. The Company's advances to Campbell under the revolving credit facility and its convertible debentures earn interest at fixed rates – accrual of such interest ceased effective September 30, 2008. The Company's loan payable bore fixed rate interest until its repayment in April, 2010. None of the Company's other financial instruments are interest-bearing. The Company is not exposed to any significant interest rate risk which could be caused by a sudden change in market interest rates.

#### Commodity price risk

Commodity price risk is the potential adverse impact on earnings and economic value due to commodity price movements and volatilities.

The value of the Company's mineral resource properties is related to the price of, and outlook for, base and precious metals prices. Historically, such prices have fluctuated and are affected by numerous factors outside of the Company's control, including, but not limited to: industrial and retail demand, central bank lending, forward sales by producers and speculators, levels of worldwide production, short-term changes in supply and demand because of speculative hedging activities and other factors such as significant mine

closures. The Company does not have any hedging or other commodity-based risks respecting its operations. The value of the Company's interest in Campbell is also related to the price of and outlook for base and precious metals.

#### Price risk

The Company's marketable securities are subject to price risk. The values of these investments will fluctuate as a result of changes in market prices, the price of metals or other factors affecting the value of the investments. A 1% change in the market price of available-for-sale securities would have an approximate effect of \$55,000 on OCI before income taxes.

#### Currency risk

Currency risk is the potential adverse impact on earnings and economic value due to movements and volatilities in foreign exchange rates. The Company recognized \$161,000 in net foreign exchange gains in 2010 (2009 - \$897,000).

The Company incurs expenditures related to Turkey and Egypt, and certain general and administrative expenses, in United States ("US") dollars and occasionally in the European Euro, Egyptian Pound and Turkish Lira. As at December 31, 2010, US dollar-denominated balances include: cash and short term investments of approximately US\$208,000 and accounts payable and accruals of US\$641,000. As at December 31, 2009, US dollar-denominated balances include: cash of approximately US\$15,000, accounts payable and accruals of US\$632,000 and loan including accrued interest of US\$2,897,000.

For every \$0.01 change in the US dollar exchange rate there would be an aggregate effect of approximately \$4,000 on the Company's results of operations based on the balances as at December 31, 2010 (December 31, 2009 - \$37,000). The Company's balances denominated in Euros, Egyptian Pounds and Turkish Lira are not significant.

With the closing of the Cameron Lake sale in 2010, the Company has a significant holding of available-forsale marketable securities denominated in Australian dollars (December 31, 2010 - A\$3,600,000). Any change in the value of the securities is reflected through OCI. For every \$0.01 change in the Australian dollar exchange rate there would be an approximate effect of \$37,000 on OCI.

There have been no changes in the Company's financial risk management in the year.

#### **Capital Disclosures**

The Company's objective when managing capital is to safeguard its accumulated capital in order to provide an adequate return to shareholders by maintaining a sufficient level of funds to support continued project development and corporate activities. Capital is defined by the Company as the aggregate of its shareholders' equity as well as any long-term debt, equipment-based and/or project-based financing.

The Company manages its capital structure and makes adjustments to it based on the level of funds available to the Company to manage its operations. In order to maintain or adjust the capital structure, the Company expects that it will be able to obtain equity, long-term debt, equipment-based financing and/or project-based financing sufficient to maintain and expand its operations. There are no assurances that these initiatives will be successful. In order to achieve these objectives, the Company invests its unexpended cash in highly-liquid, rated financial instruments. There are no externally-imposed capital restrictions and there have been no changes in the Company's capital management in the year.

#### 5. MARKETABLE SECURITIES

As at December 31,	2010	2009
Level One Securities: Common Shares		
Gold Hawk Resources Inc.	\$ 991	\$ 945
Victory Nickel Inc.	807	800
Coventry Resources Limited	3,665	-
Other	-	1
	5,463	1,746
Level Two Securities: Warrants	-	353
	\$ 5,463	\$ 2,099

With the exception of the Victory Nickel warrants, which were exercised in 2010, all of the Company's marketable securities are publicly-listed. Accordingly, all of the shares owned by the Company are considered to be valued using Level One methodologies.

In July, 2010, Nuinsco advanced \$366,000 to Victory Nickel as prepayment for the exercise of warrants. The related fee and interest expense of \$33,000 charged to Victory Nickel for the advance represents the difference between the aggregate exercise price of the warrants and the amount of the advance. The warrants were exercised by the Company in September, 2010. As at the exercise date, the value of the warrants had declined. Accordingly, a loss on securities held for trading of \$403,000 was recorded. The Company no longer has any Level Two securities.

The Victory Nickel shares and warrants were acquired through the exercise of rights which had been retained by the Company. The warrants were exercisable at a price of \$0.12 commencing August 18, 2010 for a period of one year. At the date of exercise of the rights, the market price of the Victory Nickel shares was \$0.11 compared with a unit rights price of \$0.06. Since Canadian GAAP requires such shares to be recorded at fair value and since the warrants were determined at that time to have a value of \$nil, the difference between the amount paid and the market value of \$333,000 was recorded through operations as gain on securities held for trading along with the unrealized change in the market value of the warrants of \$353,000 to December 31, 2009.

The amount of unrealized gain recorded in accumulated other comprehensive income for Gold Hawk is approximately \$244,000 as at December 31, 2010 (December 31, 2009 – a loss of \$850,000) and reflects a share price of \$1.99 (2009 - \$0.79). Since the end of December 31, 2010, Gold Hawk's share price has continued to consistently exceed the Company's cost.

In 2009, the Company determined that an other-than-temporary impairment had occurred in its other shares and recorded a writedown of \$16,000 through operations; in 2010, the Company recorded an additional writedown of \$1,000 through operations in its other shares, thereby recording them at \$nil.

#### 6. INVESTMENT IN EQUITY-ACCOUNTED INVESTEE

As at December 31, 2010 and 2009, the Company no longer has any equity-accounted investees. The Company sold its equity interest in Victory Nickel in 2009 for US\$2,700,000 or net proceeds of approximately \$2,734,000 and generated a gain through the consolidated statement of operations of approximately \$1,360,000 after equity-accounting adjustments.

The Company's share of Victory Nickel's loss was \$36,000 to the date of disposition of its ownership interest in 2009.

The dilution loss recorded in 2009 related to the Company's share of Victory Nickel's share capital transactions including share issuances and the tax value of flow-through renunciations. The Company's proportionate share of these amounts has been included in the consolidated statement of operations as a dilution loss of \$322,000 in 2009.

#### 7. INTEREST IN CAMPBELL RESOURCES INC.

The Company holds a convertible debenture and a revolving credit facility in Campbell; the Company ceased recording interest on its loans in 2008. Given the nature of the security underlying these items and the present intentions of Nuinsco, the Company considers these elements together and has recorded them in Interest in Campbell on the consolidated balance sheets. The Company's security on amounts owing by Campbell includes Corner Bay and other exploration and development properties, among other things.

Effective December 31, 2008, the Company determined that its balances with Campbell were impaired and therefore recorded an aggregate impairment allowance against the interest in Campbell of \$7,923,000 through the consolidated statement of operations as a provision for writedown of amounts owing from Campbell.

On January 28, 2009, Campbell announced that it had re-entered protection under the CCAA under which a Court-appointed monitor was engaged. Throughout 2010 and 2009, the Company has been actively involved in trying to protect its interests throughout the CCAA proceedings and has held several meetings with the court-appointed monitors as well as attended court sessions. The Company is continuing to assess its options to best realize on its interests including the debenture and revolving credit facility (collectively, the "loan") and will continue to be actively involved in the process until its conclusion.

In 2010, the Company, along with its partner with respect to Campbell matters Ocean Partners Holdings Limited ("Ocean Partners"), through a jointly-owned subsidiary, acquired substantially all of the remaining secured debt of Campbell (that the Company and Ocean Partners did not already own) for aggregate staged payments over a three-year period of \$4,050,000 (including those deposits already made by each of Nuinsco and Ocean Partners). The face value of the aggregate debt acquired by the Company and Ocean Partners was \$24,245,000. Acquisition of all of the secured debt will facilitate joint exercise of security over the Campbell assets including Corner Bay, the Copper Rand mill and other exploration properties in the Chibougamau mining camp in Québec.

Accordingly, the deposits previously made in the second quarter of 2010 of \$465,000, along with additional cash payments made in the third quarter of \$1,060,000, have been reclassified as acquisition of debt to Interest in Campbell. The agreements require additional staged payments by the Company of \$200,000 by April 20, 2011 and \$300,000 by April 20, 2013; discounted at 8%, the fair value of the long-term payable was \$241,000 at that time. Such amounts are included in Interest in Campbell and in current and long-term liabilities (Note 11).

The Company's share of expenditures incurred in 2010 to protect its interest in Campbell assets amounted to approximately \$343,000 (2009 - \$46,000). Such expenditures included legal fees, court-appointed monitor's fees and other costs and are included in general and administrative expenses.

As at December 31,		2010	2009
Interest in Campbell <sup>(1)</sup>	\$	2,297 \$	2,297
Acquisition of debt	\$ 2,025		
Less: fair value adjustment	(59)		
-		1,966	-
Interest in Campbell	\$	4,263 \$	2,297

(1) The Interest in Campbell at December 31, 2010 and 2009 is shown net of Québec mining duties receivable of \$203,000.

The value of the estimated recoverable amount is based primarily upon a discounted cash flow model of the Corner Bay project, adjusted for other potential claims against the property and taking into account the continuation of the partnership with Ocean Partners. However, additional factors were also taken into account including: the estimated value of a fully-permitted mill, probabilities and risk weightings of outcomes, discussions with potential acquirers and estimated value of possible deals, the length of time of alternatives including time to production and so on. There is a high degree of variability in many of those factors. Accordingly, the Interest in Campbell is a level three investment.

#### 8. ROYALTY INTEREST

On April 20, 2010, pursuant to the sale of Cameron Lake to Coventry, the Company received a royalty interest in the Cameron Lake property. The royalty interest is a 3% NSR under which Coventry has the right to reduce the royalty to a 1% NSR at any time within five years of April 20, 2010 by making, at Coventry's option, either a cash payment of \$2,000,000 or issuing additional Coventry shares with an equivalent market value. As described above, this is an investment which is subject to a high degree of measurement uncertainty.

The valuation of the royalty interest was based upon cash flow models of the project previously developed by the Company as adjusted for metals prices and expectations of Coventry's plans. The Company will continue to monitor Coventry's progress towards bringing the property into production and will review the royalty for impairment on a regular basis.

#### 9. EXPLORATION AND DEVELOPMENT PROJECTS

Cumulative costs relating to the acquisition of mineral properties, and deferred exploration and development expenditures, have been incurred on the following projects:

	]	December 31, 2009	Current Expenditures	Writedowns	December 31, 2010
URANIUM AND RARE METALS					
Diabase Peninsula	\$	5,772	\$ 1,171	\$ - \$	6,943
Prairie Lake		1,217	791	-	2,008
		6,989	1,962	-	8,951
GOLD, COPPER AND ZINC					
Berta and Elmalaan		2,666	167	-	2,833
Egypt		2	480	-	482
Olympian		-	679	(679)	-
Other		-	16	(16)	-
		2,668	1,342	(695)	3,315
	\$	9,657	\$ 3,304	\$ (695) \$	12,266

					Writedowns/	
	D	ecember 31,	Current	Tra	unsfer to Held	December 31,
		2008	Expenditures		for Sale	2009
URANIUM AND RARE METALS						
Diabase Peninsula	\$	5,737	\$ 35	\$	-	\$ 5,772
Prairie Lake		1,136	81		-	1,217
Marijane and Huston Lakes		730	30		(760)	-
		7,603	146		(760)	6,989
GOLD, COPPER AND ZINC						
Cameron Lake <sup>(1)</sup>		1,563	83		(1,646)	-
Berta and Elmalaan		2,521	145		-	2,666
Other		-	121		(119)	2
		4,084	349		(1,765)	2,668
	\$	11,687	\$ 495	\$	(2,525)	\$ 9,657

(1) The expenditures on Cameron Lake are shown net of \$100,000 deposit by Coventry (Note 1) and were transferred to Exploration Property Held for Sale as at December 31, 2009.

#### URANIUM AND RARE METALS

#### Diabase Peninsula

In December, 2004, Nuinsco entered into an agreement with Trend Mining Company ("Trend") to acquire a 50% interest in the Diabase Peninsula property in the Athabasca Basin of northern Saskatchewan upon

the expenditure of 1,000,000. Expenditures to date have increased this ownership interest to approximately 89% (2009 – 87%). Should a participant's interest drop below 10%, that participant will relinquish its entire participating interest and will have the right to receive a royalty equal to 3% of the net value of all mineral products produced from the property; net value is defined as proceeds less processing and treatment charges, transportation costs, sales, marketing and brokerage costs and taxes.

The property consists of ten contiguous claims encompassing 21,949 hectares ("ha"). Three claims are optioned while seven were staked by Nuinsco; all are subject to the option agreement with Trend. Exploration for uranium has been undertaken at Diabase Peninsula since March, 2005 with the most recent work program being completed in the fall/winter of 2010. If the project progresses to a development stage, before its interest drops below 10% as described above, then Trend has a one-time 50% back-in right upon reimbursing Nuinsco for 140% of its total expenditures to that date. In order to maintain the option on one of the claims, the Company must make an option payment of approximately \$935,000 by September 2, 2012. That same claim is subject to a 3% gross production royalty ("GPR") defined as actual metal/mineral sales with no deduction for refining or transportation expenses. The GPR can be purchased before September 2, 2012 for \$11,000,000 as follows: first percentage - \$1,000,000; second percentage - \$3,000,000; third percentage - \$7,000,000.

#### Prairie Lake

The Prairie Lake property consists of nine claims, 38 claim units, encompassing 608 ha of mineral claims. Given the presence of an historic uranium resource, as well as strongly anomalous tantalum-niobium and phosphorous, along with widespread rare metals mineralization, diamond drilling, surface sampling and mapping programs were conducted in 2007, 2008 and 2010. A review and analysis of past results took place during 2009 as did metallurgical testing and the completion of an Estimated Tonnage Mineralized Inventory which was announced in early 2010. The property is subject to a 2% NSR payable on any production from any claim that comprises the property. Up to a maximum of one half of the royalty can be purchased for \$1,000,000 in either cash or common shares of the Company.

#### Marijane and Huston Lakes

In 2009, the Company determined that the results to date on this exploration property did not support additional expenditures and accordingly, decided to writedown the property to \$nil. At that time, the Company advised Temex Resources Corp. ("Temex") that it would not complete its commitment to earn the 50% undivided interest in the property.

#### GOLD, COPPER & ZINC Berta

In October, 2003, the Company entered into the Berta Joint Venture Agreement with Falconbridge Limited, now Xstrata Copper Canada ("Xstrata"). The Berta property is located approximately 50 kilometres south of the Black Sea coast in northeastern Turkey. Pursuant to the agreement, the Company was required to spend US\$350,000 to earn a 50% interest in the project.

As a result of the work programs conducted by Nuinsco during 2005, the Company became vested with 50% of the project. Xstrata participates pro-rata in funding exploration expenditures and is the operator of the project. Nuinsco presently owes Xstrata approximately \$466,000, which is included in accounts payable and accrued liabilities, for its share of expenditures on Berta. Expenditures in 2010 include the Company's share of 2010 expenditures of Berta. Discussions with Xstrata have been ongoing and the Company plans to pay its outstanding share of expenditures in the near future. Discussions are also being held to buy Xstrata's share of the joint venture.

In 2006 and 2007, the Company completed airborne geophysics followed by diamond drilling. Drilling intersected a significant, continuous domain of strong sulphide mineralization with copper, gold, silver and zinc values. Three drill holes were completed in 2008 demonstrating further evidence of widespread copper mineralization. The Berta property is subject to a 2% NSR.

#### Elmalaan

The Company finalized an agreement (the "Elmalaan Agreement") in August 2006 to acquire 100% of the Elmalaan copper-zinc property from Xstrata. The Company has spent US\$250,000 to earn its interest.

Xstrata has back-in rights to reacquire a 50% interest in the project upon incurring expenditures equal to 200% of the aggregate expenditures incurred by the Company and a further 20% interest by incurring additional expenditures of US\$20,000,000. In the event that Xstrata elects not to exercise its back-in right, it will be entitled to a 2% NSR which can be reduced to 1% on the payment by the Company of US\$1,000,000. Mapping, sampling and diamond drilling programs have identified strongly anomalous copper-zinc-gold-silver mineralization on the property. The Elmalaan licenses have been converted to exploitation status and will be transferred to a Turkish subsidiary of Nuinsco. In 2011, the licenses are in the process of being transferred to Nuinsco Madencilik, the Company's Turkish subsidiary.

#### Egypt

In February, 2010, the Company announced that it had been successful, along with its Egyptian partner, in the bid process for gold exploration concessions in Egypt – Bukari and Umm Samra. The receipt of final title is subject to negotiating a suitable production sharing agreement with the Egyptian Mineral Resources Authority ("EMRA"). Negotiations have been completed with EMRA for the Bukari gold concession and, despite recent turmoil, the Egyptian State Council recently advised that it had recommended the agreement be passed into law by the Egyptian People's Assembly. Among other terms, the production sharing agreement sets out the rights and responsibilities of the Company, through a 50%-owned subsidiary, and EMRA, terms of production sharing and cost recovery as well as exploration programs. The first-year expenditure commitment is US\$2,000,000 which is required to be supported by a letter of guarantee upon ratification of the agreement.

The shareholders' agreement between the Company and its partner, Quartz Core for Mineral Resources ("QCC") governing the 50%-owned subsidiary contains dilution provisions. Presently, the Company has exceeded its expenditure commitment. Nuinsco has recorded \$171,000 in accounts receivable for the expenditure difference. Should QCC fail to make the required expenditures, its interest in the subsidiary will be proportionately reduced and Nuinsco will record an increased proportionate interest in the subsidiary.

During the fourth quarter of 2010, the Company finalized a letter of guarantee to EMRA in the amount of US\$200,000 to support initial exploration activities on the Bukari project. The letter of guarantee is supported by an equal amount of cash included as restricted cash on the consolidated balance sheet. This initial letter of guarantee will be replaced by the one pertaining to the first-year expenditure commitment.

#### Olympian

In March, 2010, the Company announced that it had optioned a claim package collectively referred to as the Olympian Project. The Olympian Project consists of 18 mining claims and three patented mining claims totalling 1,405 ha in Ontario's Lake of the Woods region. The claims were assembled through four option agreements with consideration aggregating cash of \$705,000 and 2,450,000 common shares of the Company payable over 2010 to 2012. As at December 31, 2010, payments under the agreements of \$120,000 had been made and 625,000 shares had been issued.

In October 2010, the Company had determined that the results to date on the Triggs option did not support the expenditures to date and accordingly, decided to writedown the property to \$nil effective September 30, 2010. Subsequently, the Company decided that it would not maintain the remaining options comprising the Olympian Project. Accordingly, the Olympian Project has been written down to \$nil and no option commitments are outstanding. A writedown of \$679,000 was recorded through operations.

#### Writedown of Projects

Exploration costs relating to discontinued or impaired projects in the amount of \$695,000 were written off during 2010 (2009 - \$879,000). The amount in 2010 primarily relates to the Olympian Project. In 2009, the amount primarily related to the Marijane and Huston Lakes property.

#### Flow-through Commitment

As at December 31, 2010, the Company had a remaining flow-through commitment outstanding for flow-through share financings in 2010 of approximately \$217,000. This commitment is required to be satisfied by December 31, 2011.

#### **10. PROPERTY AND EQUIPMENT**

As at December 31,	2010	2009
Equipment		
Cost	\$ 355	\$ 331
Accumulated Amortization	285	272
Net Book Value	\$ 70	\$ 59

#### **11. LONG-TERM OBLIGATIONS**

#### Payable from Acquisition of Campbell Debt

The Company has an obligation under a long-term arrangement with respect to the acquisition of debt of Campbell (Note 7). The Company is obliged to pay \$300,000 by the third anniversary of production, assumed to be April, 2013 for the purpose of determining fair value. The fair value of the amount at acquisition, using a discount rate of 8%, was \$241,000. Nuinsco will accrete the value of the obligation by interest charges through operations until its payment. In 2010, \$5,000 accretion was added to long-term obligations and recorded as interest expense.

#### Loan

In 2008, the Company entered into a bridge loan. The aggregate amount of the loan was US\$5,000,000, bore interest at 12.5% on a monthly basis and was secured by the Company's Victory Nickel shares. The loan was due no later than December 15, 2008 and was subject to a prepayment obligation from proceeds of debt or equity financing excluding flow-through shares, warrants and options. The Company was technically in default on the loan until it was renegotiated subsequent to December 31, 2008 with amended terms. The main changes in terms were: the amount of the loan was increased to US\$5,250,000, repayment was extended to June 15, 2009 and the security package was extended to include the Cameron Lake property and shares in Gold Hawk. In consideration for the amendments, the Company issued 10,000,000 shares in the Company. The lenders subsequently agreed to a forbearance on the loan until its repayment in full effective July 31, 2009 as described in Note 1.

In 2009, as described in Note 1, the Company entered into a long-term loan arrangement with JIIL. The loan was due July 31, 2011 and bore interest at 8%, calculated monthly and due upon repayment of the loan. Prepayment of the loan plus outstanding interest was allowed in full or in part. The loan was secured by the Company's shares in Cameron Lake JEX Corporation, the Company's shares in Gold Hawk as well as a mortgage over the Cameron Lake property. The amount of interest on the long-term debt charged through the consolidated statement of operations was \$74,000 (2009 - \$103,000).

The Company repaid the loan and related balances outstanding in full on April 20, 2010 upon closing of the sale of Cameron Lake to Coventry as described in Note 1. The balance of unamortized loan fees at that time of \$121,000 was charged through operations upon repayment of the loan and is included in interest expense in the consolidated statement of operations.

As at December 31,	2010	2009
Advances in US Dollars	\$ 2,800 \$	2,800
Capitalized interest in US Dollars	168	97
	2,968	2,897
Effect of foreign exchange	4	148
Repayment	(2,972)	-
Unamortized loan fees	-	(144)
	\$ - \$	2,901

#### Asset Retirement Obligation

The ARO was estimated using a time horizon of eight years, an estimated closure cost of \$253,000, an inflation rate of 2.0% and a discount rate of 12.5%.

	Amount
Balance as at December 31, 2009	\$ 111
Accretion to de-recognition	3
De-recognition	(114)
Balance as at December 31, 2010	\$ -

The Cameron Lake property was sold to Coventry on April 20, 2010 as described in Note 1 and the ARO was assumed by the purchaser at that time. Accordingly, the ARO was de-recognized upon sale of the property.

#### **12. SHAREHOLDERS' EQUITY**

#### Share Capital

#### Authorized:

The Company is authorized to issue an unlimited number of common shares. The Company is also authorized to issue an unlimited number of Class A special shares, issuable in series, an unlimited number of Class B special shares, issuable in series, an unlimited number of Class C special shares, issuable in series, an unlimited number of Class E special shares, issuable in series, and an unlimited number of Class E special shares, issuable in series.

#### **Issued and Outstanding:**

There are no special shares outstanding. The issued and outstanding common shares are as follows:

	Number of Shares	Amount
Balance as at December 31, 2008	180,873,574 \$	\$ 91,757
Shares issued pursuant to private placements <sup>(a)</sup>	24,701,943	1,560
Shares issued for services <sup>(b)</sup>	10,000,000	297
Shares issued for option in exploration property (c)	100,000	5
Flow-through share renunciation <sup>(d)</sup>	-	(606)
Shares issued pursuant to rights offering (e)	15,259,992	383
Balance as at December 31, 2009	230,935,509	93,396
Shares issued pursuant to private placements (f)	19,576,085	1,088
Flow-through share renunciation (d)	-	(500)
Shares issued for option in exploration property <sup>(g)</sup>	625,000	38
Options exercised <sup>(h)</sup>	575,000	66
Warrants exercised <sup>(i)</sup>	622,098	95
Shares issued pursuant to Share Bonus Plan <sup>(j)</sup>	1,871,600	131
Balance as at December 31, 2010	254,205,292 \$	\$ 94,314

- (a) In June and July 2009, the Company issued 7,441,834 flow-through common shares at a price of \$0.06 per share for gross proceeds of approximately \$447,000. After fees and other out-of-pocket costs, net proceeds aggregated approximately \$428,000. In December, 2009, the Company issued 17,260,109 flow-through common shares at a price of \$0.09 per unit for gross proceeds of approximately \$1,553,000. The units included a half share purchase warrant as described below. After fees and other out-of-pocket costs, net proceeds aggregated approximately \$1,421,000. An apportionment of proceeds to warrants amounted to approximately \$289,000. As at December 31, 2009, accounts receivable included \$33,000 subscriptions receivable from related parties.
- (b) In March, 2009, 10,000,000 shares were issued to the bridge lender with a fair value of \$300,000 with respect to refinancing the loan. Issue costs associated therewith approximated \$3,000.

- (c) In March, 2009, the Company issued 100,000 shares with a fair value at the grant date of \$5,000 in connection with the option to acquire a 50% interest in the contiguous Marijane Lake and Huston Lake properties from Temex.
- (d) In February, 2010, the Company renounced \$2,000,000 (February 2009 \$2,090,000) in Canadian Exploration Expenditures to investors of flow-through shares in 2009 and 2008. The tax value of these renunciations amounted to \$500,000 (2009 \$606,000) and each has been recorded as a future tax liability and charged against share capital. Since the Company has a valuation allowance which reduces the future income tax assets, the valuation allowance was reduced and income tax recoveries were recognized in the consolidated statements of operations in the amount of \$500,000 (2009 \$606,000).
- (e) On April 22, 2009, the Company issued 15,259,992 shares and 7,629,996 share purchase warrants in connection with a rights offering. Aggregate proceeds before issue costs were approximately \$763,000 (excluding any potential proceeds from the exercise of the warrants). An apportionment of proceeds to warrants amounted to \$168,000.
- (f) In October, 2010, the Company issued 7,142,857 flow-through common shares and 10,000,000 common shares at a price of \$0.07 and \$0.05 per share, respectively, for gross proceeds of \$1,000,000. After fees and other out-of-pocket costs, net proceeds aggregated \$911,000, the costs included 600,000 finder warrants with a fair value of \$38,000. The units included a half share purchase warrant as described below. An apportionment of proceeds to warrants amounted to \$194,000.

In December, 2010, the Company issued 2,433,228 flow-through common shares at a price of \$0.18 per share for gross proceeds of approximately \$438,000. After fees and other out-of-pocket costs, net proceeds aggregated \$420,000. The units included a half share purchase warrant as described below. An apportionment of proceeds to warrants amounted to \$49,000.

- (g) In May, 2010, the Company issued 625,000 common shares with a fair value of \$38,000 pursuant to the option agreements entered into with respect to the Olympian property.
- (h) In December, 2010, a total of 575,000 common shares were issued upon the exercise of options for proceeds of \$39,000. This resulted in an increase in share capital of the amount of the proceeds plus the carrying value of the options exercised in the amount of \$27,000.
- (i) Throughout 2010, a total of 622,098 common shares were issued upon the exercise of warrants for proceeds of \$79,000. This resulted in an increase in share capital of the amount of the proceeds plus the carrying value of the warrants exercised in the amount of \$16,000.
- (j) In May, 2010, the Company issued 1,871,600 common shares with a fair value of \$131,000 to employees and consultants as discretionary bonuses pursuant to the Company's Share Bonus Plan.

#### Stock Options

The Company has a stock option plan (the "Plan") to encourage ownership of its shares by directors, officers, employees and others, and to provide compensation for certain services. The terms of the Plan provide that the directors have the right to grant options to acquire common shares of the Company at not less than the closing market price of the shares on the day preceding the grant at terms of up to 10 years. No compensation is recognized when options are exercised. The number of shares reserved for issuance is not to exceed 15% of the aggregate number of common shares issued and outstanding (calculated on a non-diluted basis) from time-to-time. At December 31, 2010, the Company had 20,595,794 (December 31, 2009 – 18,655,326) common shares available for the granting of future options.

A summary of the status of the Plan and changes during 2010 and 2009 is presented below:

	Number of Options Outstanding	Ex	Average ercise Price
Outstanding as at December 31, 2008	13,835,000	5	0.20
Options granted	5,575,000	\$	0.05
Options expired	(3,425,000)	\$	0.16
Outstanding as at December 31, 2009	15,985,000	\$	0.16
Options granted	5,850,000	\$	0.08
Options expired	(3,525,000)	\$	0.13
Options exercised	(575,000)	\$	0.07
Options cancelled	(200,000)	\$	0.25
Balance as at December 31, 2010	17,535,000	5	0.14

The following table summarizes further information about the stock options outstanding at December 31, 2010:

	Options	Options	Years to	Exercise
Range of Exercise Prices	Exercisable	Outstanding	Expiry <sup>(1)</sup>	Price <sup>(1)</sup>
\$0.030 - \$0.050	4,625,000	4,625,000	3.19 \$	0.05
\$0.055 - \$0.055	1,125,000	1,150,000	4.61 \$	0.06
\$0.060 - \$0.100	3,275,000	4,375,000	4.01 \$	0.08
\$0.110 - \$0.150	1,350,000	1,350,000	1.91 \$	0.14
\$0.160 - \$0.210	1,675,000	1,675,000	0.62 \$	0.18
\$0.220 - \$0.260	2,175,000	2,175,000	3.06 \$	0.25
\$0.270 - \$0.350	1,635,000	1,635,000	2.06 \$	0.31
\$0.360 - \$0.488	550,000	550,000	1.07 \$	0.47
	16,410,000	17,535,000	2.96 \$	0.14

(1) In this table, "Years to Expiry" and "Exercise Price" have been calculated on a weighted average basis.

The weighted average grant date fair value of options granted during 2010 was \$0.053 (2009 - \$0.04). A total of 5,850,000 options were granted during 2010 to employees, directors and consultants. Accordingly, compensation expense of \$319,000 was recorded during 2010, compared with 5,575,000 options granted and vesting resulting in compensation expense of \$211,000 during 2009. Of the 17,535,000 options outstanding at December 31, 2010, 1,125,000 are subject to vesting in the next fiscal year. The aggregate fair value of these unvested options not yet charged to operations is \$2,000. The weighted average exercise price of fully-vested options at December 31, 2010 was \$0.14.

During 2010, the Company agreed to extend 850,000 options of a retiring director to their original expiry dates, such options would have otherwise expired 90 days after retirement. The extension was treated as a modification and an expense of \$27,000 was charged to operations. In 2009, option modifications were made with a related expense of \$41,000.

The fair value of options granted and modified has been estimated at the date of grant or modification using the Black-Scholes option-pricing model, with the following assumptions:

Option Assumptions	2010	2009
Dividend yield	-	-
Expected volatility	100% to 104%	87% to 112%
Risk free interest rate	2.0% and 2.5%	1.91% to 2.08%
Expected option term - years	3.75 to 4.5	1.5 to 5
Fair value per share of options granted	\$0.037 to \$0.057	\$0.003 to \$0.037

#### Share Purchase Warrants

			Number of	Average
	Date Issued	Expiry Date	Warrants	Exercise Price
Issued for services rendered:	July 17, 2008	July 17, 2010	233,000	\$ 0.22
	September 10, 2008	September 10, 2010	100,000	\$ 0.20
Expired during 2010			(333,000)	
Issued pursuant to rights offering:	April 22, 2009	April 22, 2011	7,629,996	\$ 0.10
Exercised during 2010			(288,765)	
Issued pursuant to flow-through				
shares issued:	December 21, 2009	December 21, 2011	9,445,020	\$ 0.15
	December 31, 2009	December 31, 2011	185,000	\$ 0.15
Exercised during 2010			(333,333)	
Issued pursuant to private placements:	October 4, 2010	October 4, 2011	3,571,429	\$ 0.10
	October 4, 2010	October 4, 2012	5,600,000	\$ 0.10
	December 31, 2010	December 31, 2011	1,216,615	\$ 0.25
Balance as at December 31, 2010			27.025.962	\$ 0.12

The proceeds attributable to the warrants were valued using the Black-Scholes option pricing model, with the assumptions as described below.

#### Warrant Assumptions

Dividend yield	-
Expected volatility	90% to 126%
Risk free interest rate	1.37% to 1.67%
Expected term - years	1 to 2

#### Share Incentive Plan

The Company has a Share Incentive Plan which includes both a Share Purchase Plan and a Share Bonus Plan.

The purpose of the Share Incentive Plan is to encourage ownership of the common shares by directors, senior officers and employees of the Company and its designated affiliates and consultants who are primarily responsible for the management and profitable growth of its business, to advance the interests of the Company by providing additional incentive for superior performance by such persons and to enable the Company and its designated affiliates to attract and retain valued directors, officers, employees and consultants.

Under the Share Purchase Plan, eligible directors, senior officers and employees of the Company and its designated affiliates and consultants can contribute up to 10% of their annual basic salary before deductions to purchase common shares. The Company matches each participant's contribution. The purchase price per common share is the volume-weighted-average of the trading prices of the common shares on The Toronto Stock Exchange for the calendar quarter in respect of which the common shares are issued. Common shares acquired are held in safekeeping and delivered to employees as soon as practicable following March 31, June 30, September 30 and December 31 in each calendar year. No common shares were issued pursuant to the Share Purchase Plan during 2010 or 2009. The maximum number of common shares issuable under the Share Purchase Plan is the lesser of: (i) that number of common shares that can be purchased with a dollar amount equal to 20% of the annual gross salary of the Participants (as defined in the Share Incentive Plan); and (ii) 1% of the aggregate number of issued and outstanding common shares (calculated on a non-diluted basis) from time-to-time.

The Share Bonus Plan permits common shares to be issued as a discretionary bonus to eligible directors, senior officers and employees of the Company and its designated affiliates, and consultants from time-to-time. In 2009, no common shares were issued under the Share Bonus Plan. The maximum number of common shares issuable under the Share Bonus Plan is the lesser of: (i) 2,000,000 common shares; and (ii)

2% of the aggregate number of issued and outstanding common shares (calculated on a non-diluted basis) from time-to-time.

Entitlements to 1,871,600 common shares were granted under the Share Bonus Plan in May 2010 with immediate vesting. The fair value of the 1,871,600 common share entitlements granted under the Share Bonus Plan was determined using the quoted market value on the date of grant (\$0.07 per share) for an aggregate fair value of \$131,000 which was charged to the consolidated statement of operations.

#### Shareholder Rights Plan

In April, 2007, the Company adopted a shareholder rights plan ("the Plan") which was subsequently confirmed by its shareholders and re-confirmed at the Company's Annual Meeting held on June 2, 2010. In order to implement the adoption of the Plan, the Board of Directors authorized the issuance of one right (a "Right") in respect of each common share outstanding at the close of business on April 23, 2007 (the "Record Time"). In addition, the Board authorized the issuance of one Right in respect of each additional common share issued after the Record Time. Rights trade with and are represented by common share certificates, including certificates issued prior to the Record Time. Until such time as the Rights separate from the common shares and become exercisable, Rights certificates will not be distributed to shareholders.

If a person, or a group acting in concert, acquires (other than pursuant to an exemption available under the Plan) beneficial ownership of 20% or more of the common shares, Rights (other than those held by such acquiring person which will become void) will separate from the common shares and permit the holder therefore to purchase common shares at a 50% discount to their market price. A person, or a group acting in concert, who is the beneficial owner of 20% or more of the outstanding common shares as of the Record Time is exempt from the dilutive effects of the Plan provided such person (or persons) does not increase its beneficial ownership by more than 1% (other than in accordance with the terms of the Plan). At any time prior to the Rights becoming exercisable, the Board may waive the operation of the Plan with respect to certain events before they occur.

The issuance of the Rights is not dilutive until the Rights separate from the underlying common shares and become exercisable or until the exercise of the Rights. The issuance of the Rights will not change the manner in which shareholders currently trade their common shares.

#### **13. INCOME TAXES**

The income tax recovery differs from the amount computed by applying the statutory federal and provincial income tax rates for the years ended December 31, 2010 of 29.0% (2009 - 33.0%), to the income before income taxes. The differences are summarized as follows:

Year ended December 31,		2010	2009
Statutory rate applied to income before income taxes	\$	2,003 \$	(75)
Non-deductible portion of unrealized losses		-	62
Non-taxable income	(1,539)		(511)
Non-deductible items, net	147		103
Effect of rate change	64		281
Change in valuation allowance		17	(1,763)
Future income tax provision (recovery)	\$	<b>692</b> \$	(1,903)

Future income tax assets and liabilities are recognized for temporary differences between the carrying value of the balance sheet items and their corresponding tax values as well as for the benefit of losses available to be carried forward to future years for tax purposes that are likely to be realized.

As at December 31,	2010	2009
Future income tax assets		
Temporary differences		
Equipment	\$ 57 \$	54
Exploration and development	-	521
Share issue costs	108	213
Net tax losses carried forward	885	1,142
Eligible capital property and other	262	333
Capital losses, net	1,239	1,326
	2,551	3,589
Valuation allowance for future income tax assets	(2,180)	(2,292)
	371	1,297
Future income tax liability		
Exploration and development	(371)	-
Future income tax assets, net	\$ - \$	1,297

Significant components of the Company's future income tax assets and liabilities, after applying enacted corporate income tax rates, are as follows:

The income tax amount in 2010 is a provision of \$692,000 (2009 - recovery of \$1,903,000), and relate to a provision for income taxes in 2010 due to the sale of Cameron Lake (a drawdown of a future income tax asset recorded in the fourth quarter of 2009) offset by flow-through share renunciations as described in Note 12 and a future income tax recovery of \$105,000 due to the value of marketable securities being in excess of cost.

A valuation allowance has been recorded in an amount equal to the full amount of the future income tax benefit, after deduction of the tax benefits which have been realized in the second quarter of 2010 due to the sale of Cameron Lake of \$1,297,000, as the likelihood of utilizing the remaining unused tax losses and other tax deductions cannot be determined at this time.

Non-capital losses expire as follows:

	Amount
2028	\$ 111
2029	1,317
2030	2,078
	\$ 3,506

The Company also has capital losses available for carry forward of \$4,982,000.

#### 14. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated other comprehensive income (loss) is comprised of unrealized gains on marketable securities that are classified as available for sale (Note 5) along with related tax effects.

Changes in the components of OCI are summarized as follows:

Year ended December 31,	2010	2009
Accumulated OCI at beginning of year	\$ (617) \$	(1,394)
OCI for the year representing the change in the fair value of financial		
assets available for sale, net of related future income taxes of \$105 (2009 - \$nil)	1,193	1,011
Reclassification through operations upon sale of marketable securities	158	(250)
Determination of change in the fair value as "other than temporary" and		
reclassification through operations (Note 5)	1	16
Accumulated OCI at end of year	\$ 735 \$	(617)

# 15. CHANGES IN NON-CASH WORKING CAPITAL

Changes in non-cash working capital balances related to operations are as follows:

Year ended December 31,	2010	2009
Accounts receivable, prepaid expenses and deposits	\$ (368) \$	3
Due from/to Victory Nickel Inc.	(21)	(15)
Accounts payable and accrued liabilities	61	33
	\$ (328) \$	21

# 16. TRANSACTIONS WITH RELATED PARTIES AND MANAGEMENT AGREEMENT

Included in accounts payable and accrued liabilities at December 31, 2010 are amounts owing to directors and officers of \$111,000 (December 31, 2009 - \$301,000). The amounts consist primarily of directors' fees and reimbursement of expenses incurred by officers and directors.

The Company shares management administrative assistance and facilities with Victory Nickel pursuant to a management agreement. The costs recovered from Victory Nickel are recorded at the exchange amount which is equal to the cost to the Company of such services plus 10 per cent. The management agreement commenced February 1, 2007 and is terminable by the Company upon 90 days notice and by Victory Nickel upon 180 days notice. Costs recovered from Victory Nickel in the year ended December 31, 2010 total \$719,000 (2009 - \$612,000) and have been deducted from general and administrative expenses. In addition, project-related costs aggregating \$38,000 have been charged by the Company to Victory Nickel during the year ended December 31, 2010 (2009 - \$59,000). Furthermore, project-related costs aggregating \$26,000 have been charged to the Company by Victory Nickel and are included in exploration and development costs on the consolidated balance sheet (2009 - \$19,000).

Amounts due to or from Victory Nickel are unsecured, non-interest bearing and due on demand. Amounts due to or from Victory Nickel are settled on a regular basis.

# **17. LEASE COMMITMENT**

The Company is committed under the terms of operating leases for office premises to make future minimum lease payments as follows:

	Minimum Lease	Payments
2011	\$	61
2012		5
	\$	66

#### 18. SEGMENT DISCLOSURE - GEOGRAPHIC INFORMATION

The Company presently operates in one reporting segment in three geographic areas, Canada, Turkey and Egypt. The Company has two major exploration and development projects in Canada, namely Diabase Peninsula and Prairie Lake, as well as the Interest in Campbell which is secured by properties located in Canada. The Company also has four exploration projects in Turkey and Egypt, namely Berta and Elmalaan in Turkey and Bukari and Umm Samra in Egypt.

# **19. CONTINGENCY**

#### **CRA Reassessment**

In March, 2011, the Company advised that it has received notices of reassessment in the aggregate amount of approximately \$4.4 million from the Canada Revenue Agency ("CRA") related to transactions completed in 2006. The Company is in the process of carefully reviewing these reassessments and has consulted legal counsel in this regard. The Company intends to vigorously defend what it and its counsel believe to have been a correct filing position related to these transactions. The appeal process could be lengthy and while the Company believes that its position is correct, the ultimate outcome is unknown.

## 20. SUBSEQUENT EVENTS

Subsequent events not otherwise referred to in these consolidated financial statements are as follows:

#### **Private Placement Financing**

On January 10, 2011, the Company completed a private placement financing of 3,125,000 units of securities at a price of \$0.16 per unit generating gross proceeds of \$500,000. Each unit comprises one common share and one-half of one common share purchase warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of \$0.22 for a period of 12 months from closing.

#### Warrants Exercised

Since December 31, 2010, 528,076 of the Company's warrants issued with respect to the rights offering have been exercised for gross proceeds of approximately \$53,000.

#### **Stock Options Issuance**

On March 18, 2011, the Board of Directors granted 4,400,000 stock options exercisable at \$0.17 per share to directors, officers, employees and consultants. Of the options granted, 3,425,000 vest immediately and 975,000 vest over one year.

# NUINSCO RESOURCES LIMITED

# MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE YEARS ENDED DECEMBER 31, 2010 AND 2009

**DATED MARCH 18, 2011** 

# NUINSCO RESOURCES LIMITED

# MANAGEMENT'S DISCUSSION AND ANALYSIS DECEMBER 31, 2010 AND 2009

The following discussion of the results of operations and financial condition of Nuinsco Resources Limited ("Nuinsco" or "the Company") prepared as of March 18, 2011 consolidates management's review of the factors that affected the Company's financial and operating performance for the years ended December 31, 2010 and 2009, and factors reasonably expected to impact on future operations and results. This discussion is intended to supplement and complement the Company's audited consolidated financial statements as at and for the years ended December 31, 2010 and 2009 ("2010 Audited Consolidated Financial Statements") and the notes thereto. Readers are encouraged to consult the 2010 Audited Consolidated Financial Statements which were prepared in accordance with Canadian generally accepted accounting principles (Canadian "GAAP") and are available at www.sedar.com and at the Company's website www.nuinsco.ca. All amounts disclosed are in Canadian dollars, unless otherwise stated. All tabular amounts are in thousands of Canadian dollars.

# COMPANY OVERVIEW

Nuinsco is focused on identifying and exploiting mineral investment opportunities worldwide using its exploration programs and operating and financial expertise. The Company currently has gold, uranium, rare metals, copper and zinc assets in world-class mineralized belts in Canada, Egypt and Turkey. In 2010, the Company, in conjunction with an Egyptian-based partner, was the winning bidder on two gold exploration concessions in Egypt for which tenure has yet to be granted. In addition to its property holdings, Nuinsco owns common shares of Gold Hawk Resources Inc. ("Gold Hawk") TSXV: GHK, common shares of Victory Nickel") TSX:NI and common shares of Coventry Resources Limited ("Coventry") listed on the Australian Stock Exchange ("ASX") ASX:CVY. These investments are available to be monetized to finance the Company's exploration programs and minimize equity dilution to shareholders. Shares of Nuinsco trade on the Toronto Stock Exchange ("TSX") under the symbol NWI.

# Sale of Cameron Lake Property to Coventry Resources Limited

On December 23, 2009, the Company announced that it had entered into a binding agreement with Coventry to sell its Cameron Lake property and mill ("Cameron Lake"). The transaction was completed on April 20, 2010 and involved the receipt of consideration as follows:

- Cash of \$100,000 received in December 2009;
- Cash of \$5,900,000 received on April 20, 2010;
- 12 million Coventry shares, representing 17% of the then-outstanding shares of that company. Coventry shares had a closing price of A\$0.265 (\$0.247) on April 20, 2010; and
- A 3% net smelter return ("NSR") royalty under which Coventry will have the right to reduce the NSR to 1% at any time within five years of April 20, 2010 by making, at Coventry's option, either a cash payment of \$2,000,000 or issuing additional Coventry shares with an equivalent market value. (Note 8 to the 2010 Audited Consolidated Financial Statements)

The following table illustrates the components of the gain on sale of Cameron Lake:

Consideration received				
Cash			\$	6,000
Coventry shares				2,958
Royalty interest				3,000
Aggregate consideration				11,958
Net book value of assets sold (liabilities assumed) and expenses of sale				
Cameron Lake property	\$	1,796		
Mill		54		
Asset retirement obligation ("ARO") assumed		(114)		
		1,736	-	
Transaction expenses		114		
			-	1,850
Gain on sale of Cameron Lake				10,108
Provision for income taxes (drawdown of previously recorded future income tax a	sset)			1,297
Net after-tax gain			\$	8,811

The provision for income taxes was a non-cash item and offset the recovery for income taxes recognized in the fourth quarter of 2009. Upon completion of the sale of Cameron Lake, the Company repaid its interestbearing promissory note (the "Note") with Jien International Investment, Ltd. ("JIIL") as described below, along with accrued interest thereon. Refer to Liquidity and Capital Resources section.

#### **Transactions with Jien International Investment, Ltd.**

On July 31, 2009, the Company entered into an agreement with JIIL, a Canadian subsidiary of Jilin Jien Nickel Industry Co. Ltd. of the city of Panshi, Province of Jilin, China, which enabled it to repay a short-term loan and related balances, originally due June 15, 2009, in full. The terms of the financing arrangement entered into are described in Note 1 to the 2010 Audited Consolidated Financial Statements and enabled Nuinsco to settle its short-term loan, provided Victory Nickel with a strategic investor, reduced the rate of interest and eliminated immediate cash debt-servicing requirements. As described above, the Note was settled with funds from the Cameron Lake sale.

# **Going Concern**

The transactions described above have resulted in a company with an improved financial condition which should be well-positioned to grow and take advantage of future opportunities presented by its existing complement of properties or through acquisitive growth.

Nonetheless, the Company is subject to the risks and challenges experienced by other companies at a comparable stage. These risks include, but are not limited to, continuing losses, dependence on key individuals and the ability to secure adequate financing or to complete corporate transactions to meet the minimum capital required to successfully complete its projects and fund other operating expenses. Development of the Company's current projects to the production stage will require significant financing. Given the current economic climate, the ability to raise funds may prove difficult. Refer to the Risks and Uncertainties section for additional information.

None of the Company's projects has commenced commercial production and, accordingly, the Company is dependent upon debt and/or equity financings and the optioning and/or sale of resource or resource-related assets for its funding. The recoverability of the carrying value of exploration and development projects, and ultimately the Company's ability to continue as a going concern, is dependent upon exploration results which indicate the potential for the discovery of economically recoverable reserves and resources, the Company's ability to finance exploitation of its projects through debt or equity financings and the optioning and/or sale of resource or resource-related assets for its funding.

The Company has made significant progress in its strategy to maximize the realization of previously written-down amounts due from Campbell Resources Inc. ("Campbell"). In July,2010, the Company announced that it, along with Ocean Partners Holdings Limited ("Ocean Partners"), through a jointly-

owned Canadian subsidiary, had acquired substantially all of the remaining secured debt of Campbell that Nuinsco and Ocean Partners did not previously own. Nuinsco and Ocean Partners will make additional payments over three years to complete the purchase; the Company's payments are described in Note 7 to the 2010 Audited Consolidated Financial Statements. As a result, the two companies now hold Campbell's secured debt and have effectively gained control over one of Canada's major mining camps.

The Company's 2010 Audited Consolidated Financial Statements have been prepared using the going concern assumption which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. If the going concern assumption were not appropriate, then adjustments to the carrying values of assets and liabilities, reported expenses and balance sheet classifications may be necessary. These adjustments could be material. At December 31, 2010, the Company had working capital of \$4,411,000 (December 31, 2009 – \$2,696,000).

# SIGNIFICANT EVENTS

During and subsequent to the year ended December 31, 2010, the Company:

# Corporate

- Completed the sale of Cameron Lake to a wholly-owned subsidiary of Coventry for aggregate consideration valued at approximately \$12,000,000.
- Acquired, along with Ocean Partners, substantially all of the remaining debt of Campbell, and with it, effective control of the Chibougamau mining camp.
- Signed a binding letter agreement to combine the Company with Gold Hawk. Gold Hawk subsequently served notice purporting to terminate the binding letter agreement without cause.
- Appointed three new independent directors: Marvin Singer, Ed Guimaraes and Dr. J.M. Franklin.
- Completed private placements generating gross proceeds of approximately \$2,000,000.
- Received, and commenced an appeal of, notices of reassessment from the Canada Revenue Agency ("CRA").

### Gold

- Won, through Z-Gold Resources Limited ("Z-Gold"), the Company's Egyptian subsidiary, its bid for two gold concessions in Egypt's Eastern Desert.
- Terminated the option agreements on the Olympian gold project, in Kenora, Ontario.
- Finalized a concession agreement with the Egyptian Mineral Resources Authority ("EMRA") covering the Bukari gold concession.
- Began field exploration at the Bukari gold concession.
- Announced that the Egyptian State Council had approved the Bukari Concession Agreement.
- More than doubled the known strike length of the Bukari One gold showing and confirmed the existence of a previously-unknown gold vein system, Bukari North, with a strike length of five kilometres.
- Confirmed a four kilometre strike length at the Talat Gadalla gold showing on the Bukari concession.
- Announced assays from surface sampling on the Bukari concession grading up to 75.1 g/t (2.19 oz/t).

# Uranium and Rare Metals

- Announced an Exploration Target Mineralization Inventory ("ETMI") at the Prairie Lake rare metals project totalling between 330 and 360 million tonnes averaging 3.5% to 3.7% phosphorous ("P<sub>2</sub>O<sub>5</sub>") and 0.12% to 0.14% niobium ("Nb<sub>2</sub>O<sub>5</sub>") (1.2 to 1.4kg/tonne), along with tantalum, uranium and rare earth elements.
- Announced positive test results that confirm the ability to produce a concentrate, using low-cost flotation methods, grading up to 23.4% P<sub>2</sub>O<sub>5</sub> and 0.17%, or 1.7kg/tonne, Nb<sub>2</sub>O<sub>5</sub> at Prairie Lake.
- Completed a large-scale trenching program at Prairie Lake, with initial positive results including intersections grading up to 1,570 ppm Nb<sub>2</sub>O<sub>5</sub>.
- Completed the initial phase of 2010 exploration at the Diabase Peninsula uranium property in Saskatchewan's Athabasca Basin.

- Completed a 3,500m drill program at Prairie Lake.
- Completed an initial 2,000m drill program in November at the Diabase Peninsula property and commenced a further 2,000m of drilling in March 2011.

# OUTLOOK

Economies around the globe remain in a state of confusion. Now, turmoil in the Middle East and North Africa ("MENA") adds to the uncertainty of the world. The U.S. dollar continues to weaken and gold climbs making new highs on a regular basis. Base metal prices have recovered and appear to be holding at attractive levels and copper sits at or near all-time highs. Uranium pricing was also showing signs of recovery and rare earth element shortages are making headlines almost daily.

This can only be good for Nuinsco with its involvement in all of these minerals. Nuinsco is very active with exploration programs ongoing at its Diabase uranium project, its Prairie Lake rare metals project, its copper, zinc, gold projects in Turkey and its Egyptian concessions. The recent turmoil in Egypt will most likely delay our ability to embark on a full exploration program, but Nuinsco is ready when Egypt's politics stabilize. Three surface programs have been completed and a recent news release described the very promising results with gold grades of up to 2.19 oz/t of the first such program. The Egyptian civil service continues to operate as evidenced by the approval from the State Council of the Bukari concession agreement and its recommendation that the People's Assembly enact the agreement into law. When final approval is received, Nuinsco will be in a position to move ahead with its full exploration program at Bukari.

Nuinsco is fortunate to have very attractive projects in world class locations and therefore hopes to have increased investment interest over the next year. While today's confused equity markets appear to be recovering for juniors, a significant disconnect between share price and asset value continues. We believe this disconnect cannot persist. The recent lack of funding available for the exploration activities that are required to replace depleting resources and to fuel growing demand for natural resources will hopefully result in a recovery as the availability of advanced exploration projects disappears.

Unfortunately, financing exploration activities during recessionary times has always been difficult. Exploration is high-risk and investors are disinclined to participate in high-risk activities when cash is tight. The existence of flow-through equity financing in Canada is of vital importance to the exploration industry. It has allowed exploration to continue at unprecedented rates and has kept Canada as a world leader in mining.

Exploration companies must find creative ways to fund their activities. The sale of the Company's Cameron Lake gold project is one such example that accomplished two very important objectives. The first objective was to secure funding to support the Company's ongoing exploration activities; the second was to ensure that the Cameron Lake project will advance without subjecting the Company to the significant dilution that would have been necessary to finance the required start-up costs for the Cameron Lake mine. Over the last couple of years, management attempted to find a non-dilutive transaction which would have maximized the value of Cameron Lake for its shareholders. The decision to sell the asset, while maintaining upside through the equity participation in the purchaser, Coventry, and retention of a royalty interest, was considered the best alternative.

Funding exploration activities outside of Canada is even more difficult. For this reason, the Company is actively taking steps to create a new public company by combining its Turkish and Egyptian assets. This will form the base of a new company focused on the MENA region. We believe MENA countries are significantly underexplored and will provide excellent opportunities in the future. That's why we are establishing our presence now. In addition, creation of a MENA-focussed company will enable direct funding of programs on these projects which will not dilute Nuinsco's other projects and vice versa.

Management continues to look for high-potential projects to add to its already attractive portfolio. The recent property acquisitions in Egypt and the Olympian gold project options in Kenora are examples of these activities. As mentioned earlier, we believe that Egypt and the surrounding region is the next attractive exploration frontier and we want to be there early. Unfortunately, recent exploration results on the options comprising the Olympian project were not sufficiently attractive to support further work. As a

result, these option agreements were terminated. Projects will only be worked and options retained when the Company believes in the potential for discovery in the near term.

Nuinsco continues to be active and currently has several field programs underway. In addition to Egypt, recent programs were undertaken at the Olympian, Prairie Lake and Diabase Peninsula projects. Assay results from the Prairie Lake trenching program were delayed due to problems encountered at the laboratory performing the analysis. This has been resolved and assays are beginning to be released. A diamond drill program was completed in late 2010 at the Diabase uranium project in the Athabasca Basin of Saskatchewan and a second drill program is currently underway. Three surface programs were completed on the Bukari and Umm Samra concessions in Egypt and results for the second and third programs are pending. The first program, as recently reported, indicates very attractive potential. The Board of Directors has approved a budget for 2011 which provides for significant programs at both the Elmalaan and Berta projects in Turkey.

The Company announced the acquisition of substantially all of the secured debt of Campbell not already owned in conjunction with Ocean Partners. Nuinsco and Ocean Partners are now in a position to determine the best approach to take the substantial assets of the Chibougamau camp forward. The Company and Ocean Partners are assembling a comprehensive inventory and evaluation of the substantial assets available. Following this exercise, a decision will be made on the best alternative to realize value from these assets. Alternatives include: a potential sale in aggregate, piecemeal sale of individual assets and creating a new public company and distributing shares to shareholders to name just a few. Management has always believed that the Chibougamau properties not only present production opportunities but also extremely attractive exploration potential.

The share price has significantly recovered from its low over the last 12 months of \$0.04 per share. This would suggest that the markets are beginning to recognize the value of the Company's assets and the asset value/share price disconnect is fixing itself.

The Company is in the exploration business and value can only be generated with good exploration results. The way to get results is by being active. With its activities in Canada, Turkey and Egypt, Nuinsco is very active.

# **RESULTS OF OPERATIONS**

#### Year Ended December 31, 2010, Compared With Year Ended December 31, 2009

In the year ended December 31, 2010, the Company generated net income of \$6,216,000, or \$0.03 per share, compared with net income of \$1,676,000, or \$0.01 per share, in the year ended December 31, 2009. The primary reasons for the significant change relates to the gain on sale of Cameron Lake as described above.

The loss on sale of marketable securities in the year ended December 31, 2010 of \$158,000 relates to the sale of a portion of the Company's holdings of Gold Hawk for liquidity purposes; the sales generated gross proceeds of \$889,000. The gain on sale of marketable securities of \$250,000 in the year ended December 31, 2009 relates primarily to the Rainy River Resources Inc. ("Rainy River Resources") share sale.

General and administrative expenses increased by \$495,000 from \$927,000 in 2009 to \$1,422,000 in 2010. Overhead recoveries through charges to Victory Nickel for services under the management agreement and deducted from operating expenses amounted to \$719,000 in the year ended December 31, 2010, compared with \$612,000 in the same period of 2009. Costs allocated to Victory Nickel pursuant to the management agreement between the Company and Victory Nickel are activity related. Such amounts are recorded at the exchange amount which is equal to the cost to the Company of such services plus 10%. The increase in costs allocated is primarily a function of salary increases in 2010 as well as the hiring of a controller in early July. In 2009, salaries were held at the same base level as in 2008.

It is estimated that approximately \$575,000 of general and administrative expenditures were incurred on supporting the Company's public status in the year ended December 31, 2010 (2009 - \$438,000). The Company has continued to control its regular expenditures but improvements in the Company's financial position have facilitated spending on various initiatives considered essential to preserving asset values and advance its projects.

The main contributing factors to increases in general and administrative expenditures are: legal and other support costs for the preservation of recoverable value of the interest in Campbell of \$343,000 compared with \$46,000 in 2009, other legal costs including those related to the terminated acquisition of Gold Hawk and the effect of employment costs including: salary increases, new hire of controller in the third quarter and statutory benefits on the catch-up of directors' fees paid in 2010.

The Company recognized a net foreign exchange gain of \$161,000 in the year ended December 31, 2010, primarily as a function of loan-related balances; there was a net foreign exchange gain of \$897,000 in the comparative period in 2009. As at December 31, 2010, the Company has US-denominated balances of approximately US\$433,000 in net liabilities; as at December 31, 2009 the Company had US-denominated net liabilities of approximately US\$3,514,000. Accordingly, the impact of US\$ foreign exchange fluctuations has been reduced. The Company also has a significant holding of marketable securities which is denominated in Australian dollars ("A\$"); A\$3,600,000 as at December 31, 2010. Consequently, fluctuations in the Australian dollar impact the fair value of the securities, any changes in which are recorded through other comprehensive income ("OCI").

The Company incurred interest expense of \$224,000 on the loan in the year ended December 31, 2010 compared with \$964,000 in 2009. As noted above, the loan and related balances were repaid in full on April 20, 2010. Although the interest expense in 2010 reflects a charge of \$121,000 related to the unamortized balance of loan fees charged upon repayment, the interest expense is much lower as a function of a reduced rate and lower loan balances across the comparative years.

Stock option compensation across the years increased from \$252,000 in 2009 to \$346,000 in 2010 which is a function of the higher fair value of options in 2010 compared with 2009, options issued to new directors as well as the cost to modify the terms of a retiring director's options which would otherwise have expired. The Company also issued shares under the Share Bonus Plan in the second quarter of 2010, at a cost of \$131,000.

Routine writedowns of exploration and development projects in the year ended December 31, 2010 aggregated \$16,000; combined with the writedown of the Triggs option within the Olympian Project of \$679,000, aggregate writedowns amounted to \$695,000. In 2009, project writedowns of \$879,000 were made, of which \$760,000 was related to the writedown of the Marijane and Huston Lakes projects (refer to Note 9 of the 2010 Audited Consolidated Financial Statements).

The gain on sale of Cameron Lake of \$10,108,000 has been described earlier. The loss on securities held for trading of \$403,000 relates primarily to the change in the fair value of Victory Nickel warrants prior to their exercise in the year ended December 31, 2010. In the year ended December 31, 2009, the gain reflects the difference between the fair value and the purchase cost of Victory Nickel shares acquired under the rights offering as well as the change in fair market value to the end of the year. The warrants were not acquired until August 2009 and were not considered to have any fair value until the fourth quarter of 2009 when they first became "in-the-money".

The Company no longer has any equity-accounted investees. In 2009, the share of losses of equity-accounted investee was \$36,000 and related solely to the Company's investment in Victory Nickel. In addition, the Company recorded a dilution loss of \$322,000 in 2009 which related to the Company's share of Victory Nickel's flow-through renunciations through capital in the first quarter of 2009. In the third quarter of 2009, the Company sold its interest in Victory Nickel except for certain rights from the rights offering completed in August of 2009. A gain on sale of \$1,360,000 was recorded. No such transactions occurred in 2010.

The Company renounced flow-through share expenditures in February of 2010 and 2009. Accordingly, income tax recoveries of \$500,000 and \$606,000 were recorded in 2010 and 2009, respectively, as the Company has recorded a full valuation allowance against its future income tax asset. The amounts are a function of the magnitude of the related flow-through share financings and the expected future income tax rates. In 2009, the Company recorded an additional recovery of \$1,297,000 due to the expected close in 2010 on the sale of Cameron Lake. The recovery of \$500,000 with respect to flow-through renunciation in 2010 is combined with a recovery of \$105,000 recorded for utilization of capital losses offset against a provision for income taxes in the second quarter of \$1,297,000 against the sale of Cameron Lake – these net to a provision of \$692,000 for the year ended December 31, 2010.

OCI of \$1,352,000 in the year ended December 31, 2010 represents net increases in the market value of the Company's available-for-sale securities from December 31, 2009 or date of acquisition, net of amounts transferred through operations upon sale of \$158,000 and after tax effects of \$105,000. The main components are the improvement in the values of Gold Hawk shares and Coventry shares, of approximately \$936,000 and \$706,000, respectively, offset by a reduction in the value of Victory Nickel shares of \$353,000. Note that the fair value of Coventry shares is impacted by the fluctuation in the value of the A\$. Approximately \$169,000 of the OCI in the year is attributable to improvements in the exchange rate since the acquisition of Coventry shares.

The Company has capital loss pools available to it of approximately \$4,982,000 (Note 13 to the 2010 Audited Consolidated Financial Statements). However, Canadian GAAP requires that amounts recorded through OCI are tax-effected, accordingly, a future income tax provision is recorded through OCI for the tax effects of the unrealized gains in market value. Since Nuinsco has valuation allowances against such capital losses, a future income tax recovery of an equal and opposite amount is recorded through operations.

OCI of \$777,000 in the year ended December 31, 2009 represents the net increases in the market value of the Company's marketable securities year-over-year – primarily shares of Gold Hawk and Victory Nickel. Approximately \$642,000 relates to Gold Hawk with the balance attributable to Victory Nickel.

A discussion of the more significant changes not addressed in other sections of this MD&A is as follows:

Marketable securities have increased from \$2,099,000 as at December 31, 2009 to \$5,463,000 as at December 31, 2010. The increase is primarily as a result of the Coventry shares received as part of the consideration for the Cameron Lake sale. At the date of acquisition, the shares had an aggregate market value of \$2,958,000. By the end of 2010, the aggregate fair value had improved to \$3,665,000. The market value of the Gold Hawk shares was \$945,000 at the end of 2009 at a price per share of \$0.79 and improved to a price per share of \$1.99 by the end of 2010, albeit on a smaller portfolio of shares with a market value of \$991,000.

The Company disposed of 698,800 Gold Hawk shares in the year for liquidity purposes, generating gross proceeds of approximately \$889,000. The remaining balance comprises mainly of shares of Victory Nickel which were acquired through the exercise of rights during 2009 at an aggregate cash cost of \$400,000 and through the exercise of warrants in 2010 as described earlier; the shares have a market value of \$807,000 as at the end of 2010, compared with \$800,000 at the end of 2009.

The Company has continued to record the changes in market value on Gold Hawk shares through OCI. Gold Hawk shares have been close to or above the Company's cost since the end of 2010.

The interest in Campbell has increased by \$1,966,000 to \$4,263,000 from \$2,297,000 as at December 31, 2009. As reported in the second quarter of 2010, the Company, along with its partner with respect to Campbell matters, Ocean Partners, has acquired substantially all of the secured debt not collectively already owned. This has been completed primarily through a jointly-controlled subsidiary. The Company paid \$1,525,000 in the year ended December 31, 2010 and has two scheduled payments outstanding; \$200,000 due within one year (included in accounts payable and accrued liabilities) and \$300,000 due no earlier than April 2013; recorded at a discounted value of \$246,000 – this amount is being accreted over time using the effective interest method. The latter amount is included in long-term obligations. Refer to the Investments section for additional discussion.

The sale of Cameron Lake in April, 2010, has accounted for other significant changes in the consolidated balance sheets. For example, the exploration property held for sale has been derecognized. The consideration included a royalty interest in Cameron Lake with an estimated fair value of \$3,000,000. The future income tax asset recorded in 2009 was eliminated through recognition of a provision for income taxes on the sale in 2010. The ARO was also eliminated and the loan payable and related balances were repaid in full.

Accounts payable and accrued liabilities have increased to \$2,453,000 from \$1,243,000 as at December 31, 2009. This is due to project related payables on the two drilling programs at Diabase and Prairie Lake; project activity at the end of December 31, 2009 was quite limited, accordingly, project payables were low.

Share capital has increased by \$918,000. This is as a result of the shares issued for the Olympian option, the Company's Share Bonus Plan and two flow-through financings closing in October and December 2010, partly offset by the tax effect of the renunciation of flow-through expenditures in February, 2010. All of which are discussed under Liquidity and Capital Resources.

Accumulated other comprehensive income (loss) improved significantly over the period from a loss of \$617,000 to income of \$735,000. This is as a result of the net after-tax improvements in the market value of securities as discussed above.

# Year Ended December 31, 2009, Compared With Year Ended December 31, 2008

In 2009, the Company had net income of \$1,676,000, or \$0.01 per share, compared with a net loss of \$15,792,000, or \$0.09 per share, in 2008. The primary reasons for the significant change relates to gains on the sale of securities of Victory Nickel aggregating \$2,046,000, as well as the recognition of future income tax recoveries of \$1,297,000 related to the recognition of income tax benefits that were to be realized on the sale of Cameron Lake in April 2010. In 2008, the Company wrote down amounts related to Campbell of

\$8,359,000 and had an unrealized loss on the Company's equity-accounted investment in Victory Nickel of \$3,785,000, both of which were related to the significant deterioration of capital markets.

Consulting fees in 2008 were \$225,000 which represents nine months of fees from Campbell; there were no such fees in 2009. An operating consulting agreement with Campbell was terminated in November, 2008.

Interest income of \$548,000 was earned in 2008, which compares with \$1,000 in 2009. In 2009, there were minimal invested cash balances and interest rates were significantly lower. In 2008, interest was recorded on amounts due from Campbell until the fourth quarter.

In 2009, other income was comprised solely of realized gains on the sales of securities: \$296,000 was realized on the sale of Rainy River Resources shares and a loss of \$46,000 on the sale of Victory Nickel shares (refer also to discussion below on gain on securities held for trading). Other income in 2008 of \$998,000 included a number of items. In 2008, the Company sold its royalty interest on the Rainy River exploration property which it formerly owned. The aggregate proceeds were \$630,000 which comprised cash of \$500,000 and 200,000 shares of Rainy River Resources, all of which were sold in 2009. In addition, a royalty interest related to the Bucko nickel property in Manitoba was sold for cash of \$300,000.

General and administrative expenses were reduced in 2009, being \$927,000 compared with \$1,488,000 in 2008. Overhead recoveries through charges to Victory Nickel for services under the management contract and deducted from operating expenses aggregated \$612,000 in 2009, compared with \$650,000 in 2008. In addition, other charges amounting to \$59,000 for project-related costs (2008 - \$66,000) were charged to Victory Nickel. Such amounts are recorded at the exchange amount which is equal to the cost to the Company of such services plus 10%. Amounts charged to Victory Nickel are activity based. On average, activity was relatively comparable year-over-year, except that in 2008 there was a lot of activity towards the latter half of the year supporting an acquisition made by Victory Nickel. That increase is offset by the fact that costs in 2008 are shown net of amounts charged to Nuinsco by Victory Nickel for financial reporting personnel. In 2009, the overall finance staff complement reduced by one individual; furthermore, costs in 2008 included a portion of severance related to service time earned at Nuinsco amounting to \$120,000.

The Company has continued to reduce its expenditures through a concerted effort to eliminate discretionary spending and defer cash outlays. Directors attend meetings telephonically where possible, payment of directors' fees, while being accrued, have been deferred since mid-2008 and management agreed to defer a portion of salaries until financial circumstances further improve. The aggregate amount of such deferrals included in general and administrative expenses in the year ended December 31, 2009, is approximately \$172,000. The number of directors' fees otherwise due. In aggregate, the fees for directors' meetings, including travel costs, was reduced by approximately \$70,000 year-over-year.

Couriers are used sparingly (\$20,000 reduction year-over-year), consultants have, to a great extent, been eliminated unless absolutely necessary for compliance purposes and so on (discretionary consulting reduced by almost \$40,000). Nonetheless, it is estimated that approximately \$438,000 of general and administrative expenditures were incurred on supporting the Company's public status in the year ended December 31, 2009 (2008 - \$700,000). Certain non-discretionary consultants have been challenged to revisit costs and reductions have been attained in 2009 which related to the cost of services accrued in 2008. Furthermore, in 2009, the Company eliminated the formal review process on its interim financial statements. Approximately \$52,000 was saved through a combination of cost concessions and service level changes.

Lower levels of exploration activity and the expenditure controls outlined above have resulted in reduced general and administrative expenditures including expenses incurred on investor and public relations where reporting is performed in as cost-effective a manner as possible and by taking advantage of mailing exemptions in order to conserve cash resources. The annual report in 2009 was a very simple document and production costs were reduced through lower quantities and simplicity of content. Approximately \$100,000 was saved year-over-year on investor relations and shareholder support costs. Lower general activity also meant reduced legal costs.

In July, 2008, the Company entered into a loan agreement denominated in US dollars which was advanced in several tranches and aggregated US\$5,000,000 as at December 31, 2008. Due to a weakening Canadian dollar, the Company incurred a net foreign exchange loss of \$881,000 in 2008, primarily due to the loan. Effective July 31, 2009, that loan and related accrued interest was repaid and replaced by one with a US\$2,800,000 principal, a lower interest rate and an extended two-year term with no cash servicing costs. A strengthening Canadian dollar across 2009 resulted in a gain on foreign exchange of \$897,000, also primarily due to the loan.

The Company incurred interest expense of \$964,000 on the loans in 2009 (2008 – \$576,000). These amounts include amortization of loan fees pertaining to each loan as required under Canadian GAAP. The loan was repaid in April 2010 upon consummation of the sale of Cameron Lake. Refer also to the Liquidity and Capital Resources discussion.

The share of losses of equity-accounted investees decreased significantly in 2009 to \$36,000 from \$4,203,000, in 2008. Effective July 31, 2009, the Company sold its then equity-accounted interest in Victory Nickel and thus no longer had any equity-accounted investees. The Company had ceased having significant influence over Campbell in the fourth quarter of 2008. Effective September 30, 2008, the Company considered that there was no value to its equity investment in Campbell and made an adjustment of \$436,000 through operations (which is included in the writedown of amounts related to Campbell in the table above), as well as reversing an amount of \$910,000 formerly recorded through OCI to record its interest at \$nil.

Other amounts related to equity-accounted investees include a dilution loss of \$322,000 in 2009 for Victory Nickel, compared with a net gain of \$102,000 in 2008. This relates to a net dilution loss of \$153,000 in 2008 on Victory Nickel with a dilution gain of \$255,000 arising from Campbell. Dilution gains and losses arise as a consequence of a net increase or decrease in the share of an equity-investee's net assets resulting from transactions through share capital.

The gain on sale of Victory Nickel of \$1,360,000 occurred upon the sale to JIIL of the whole of Nuinsco's then interest in shares of Victory Nickel along with certain rights. The rights retained by Nuinsco were exercised in August 2009 resulting in the Company owning 6,662,477 shares and 3,331,238 warrants of Victory Nickel for an aggregate cash payment of approximately \$400,000 or \$0.06 per unit (each unit comprised one share and one half a share purchase warrant; each warrant exercisable for one year commencing August 18, 2010 at \$0.12 per share). At that time, Victory Nickel shares had a market value of \$0.11 per share and the Company determined that the warrants had a fair value of \$nil.

Accordingly, the Company recorded the Victory Nickel shares at their aggregate fair value of \$733,000 (using \$0.11 per share) and recorded the difference of \$333,000 through operations as gain on securities held for trading – effectively this represents a value associated with the rights then exercised and realized. Note that any gain or loss on sale of Victory Nickel shares is calculated using \$0.11 as cost rather than the cash purchase price of \$0.06 which explains the loss on sale of \$46,000 referred to above even though the sale price exceeded the cash cost. Effective December 31, 2009, the Company determined that the warrants had appreciated in fair value using the Black-Scholes option-pricing model which indicated a fair value of \$0.106 per warrant. This unrealized amount of \$353,000 is also recorded as gain on securities held for trading through the consolidated statement of operations; any subsequent change in value will also be reflected through operations. No similar gains were recorded in 2008.

Campbell announced that it had re-entered CCAA protection in January 2009. Accordingly, the Company recorded a writedown of \$7,923,000 in the fourth quarter of 2008 against its interest in Campbell. The Company continues to work with legal advisors to protect its interests and to maximize potential recoveries from any liquidated assets or ensure it benefits from restructuring of Campbell. No similar writedowns were required for impairment in 2009 primarily because of improvements in the outlook for copper and the consequent effect on cash flow models for Corner Bay.

While the Company has security over other assets, including other exploration properties owned by Campbell and the permitted mill and tailings facility at the Copper Rand Mine, the primary asset which is most amenable to valuation is considered to be the high-grade Corner Bay copper project. As at December 31,

2009, the Company recorded its aggregate estimated recoverable amount as Interest in Campbell on the consolidated balance sheets at a carrying value net of Québec mining duties receivable of \$2,297,000.

In 2008, Victory Nickel suffered a significant decline in market value which required an adjustment of \$3,785,000 through the consolidated statement of operations, thereby recording its investment at market value on December 31, 2008. No such unrealized losses were recorded in 2009.

The Company recorded income tax recoveries of \$1,903,000 in 2009 (2008 - \$1,740,000). Income tax recoveries of \$606,000 were recorded (2008 - \$1,740,000) as a function of renunciation of flow-through share expenditures as the Company has recorded a valuation allowance against its future income tax assets. In addition, in 2009, the Company recorded an additional recovery of \$1,297,000 since the sale of Cameron Lake was expected to close in 2010 which meant that it was more-likely-than-not that the income tax benefits would be realized. Generally speaking, since the Company has no recurrent source of operating revenue, income tax recoveries are only recorded upon renunciation of flow-through share expenditures or when income tax provisions are recorded on net gains on marketable securities through OCI.

Comprehensive income totals \$2,453,000. This includes net income of \$1,676,000 as well as \$777,000 OCI which represents the net increases in the market value of the Company's marketable securities year-over-year – primarily shares of Gold Hawk and Victory Nickel. Approximately \$642,000 relates to Gold Hawk with the balance attributable to Victory Nickel. In 2008, comprehensive loss of \$18,086,000 included a net loss of \$15,792,000 and OCI of a loss of \$2,294,000. The primary components are a decrease in the market value of Gold Hawk from acquisition to December 31, 2008 of \$1,384,000 combined with the reversal of \$910,000 of OCI related to Campbell.

A discussion of the more significant changes not addressed in other sections of this MD&A is as follows:

Cash and cash equivalents have improved to \$1,490,000 in 2009 from \$793,000 in 2008.

Marketable securities have improved from \$548,000 in 2008 to \$2,099,000 as at December 31, 2009. The market value of Gold Hawk shares was \$299,000 in 2008 and improved to \$945,000 by the end of 2009. The Rainy River Resources shares had a market value of \$248,000 at the end of 2008 and were sold for net proceeds of \$426,000 during 2009. The remaining securities are shares and warrants of Victory Nickel which were acquired through the exercise of rights during the year at an aggregate cash cost of \$400,000; the shares (after sales during 2009) have a market value of \$800,000; the warrants were "in-the-money" as at December 31, 2009 and were valued using the Black-Scholes option-pricing model at \$354,000. The warrants could not be exercised until August 18, 2010.

The Company continued to believe in the value of Gold Hawk, as evidenced by its offer to merge with that company at a then-premium of approximately 98%, and therefore considered the loss to be temporary. As such, it has continued to record the changes in the market value of Gold Hawk shares through OCI. This view was supported by the markets in 2010 when the market value of Gold Hawk recovered significantly and the price exceeded the Company's cost.

The exploration property held for sale of \$1,700,000 represents the Cameron Lake project and related assets which were sold or otherwise eliminated upon consummation of the deal with Coventry. Given that the deal was expected to close in April 2010, it is more-likely-than-not that certain tax pools and non-capital tax losses will be utilized. In accordance with Canadian GAAP, a future income tax asset related to the tax recovery on the deal has been recognized as discussed above.

The investment in equity-accounted investees balance in 2008 was \$1,732,000 which represented the market value of Victory Nickel as at December 31, 2008. This interest was eliminated upon the sale of the interest in Victory Nickel to JIIL on July 31, 2009.

Total assets have increased year-over-year due to the recognition of future income taxes related to the Cameron Lake sale to Coventry and as described above.

Current liabilities of \$1,243,000 have decreased from \$7,526,000 in 2008 largely as a result of repayment of the short-term US-denominated loan during the year. At that time, the Company had a long-term US-

denominated loan with a principal of US\$2,800,000 and a stronger Canadian dollar exchange rate. However, the debt was repaid in early 2010, as expected, from a portion of the proceeds of the sale of Cameron Lake.

Shareholders' equity has increased by approximately \$4,800,000. This is as a result of net income in the year, improvements in the market value of securities available for sale, the rights offering which closed in April and the two flow-through financings closing in 2009 and which are discussed under Liquidity and Capital Resources.

#### SUMMARY OF QUARTERLY RESULTS

Selected financial information for each of the last eight quarters ended December 31, 2010 is as follows:

Fiscal year 2010	$4^{\text{th}}$	Quarter_	$3^{rd}$	Quarter_	$2^{nc}$	<sup>1</sup> Quarter	$1^{st}$	Quarter_
Revenue and other income	\$	58	\$	(182)	\$	1	\$	1
Net (loss) income	\$	(248)	\$	(1,391) (2)	\$	8,060	<sup>(4)</sup> \$	(205) (6)
Other comprehensive income (loss)	\$	1,158 <sup>(1)</sup>	\$	1,212 (3)	\$	(1,130)	<sup>(5)</sup> \$	112
Loss (income) per share - basic and diluted	\$	(0.00)	\$	(0.01)	\$	0.03	\$	(0.00)
Fiscal year 2009	<u>4</u> <sup>th</sup> (	Quarter		Quarter estated) <sup>(8)</sup>	<u>2<sup>nc</sup></u>	<sup>1</sup> Quarter	<u>1<sup>st</sup></u>	Quarter
Revenue and other income	\$	(46)	\$	-	\$	297	\$	-
Net income (loss)	\$	429 (7)	\$	1,798 <sup>(9)</sup>	\$	194 (	<sup>10)</sup> \$	(745) <sup>(11)</sup>
Other comprehensive income (loss)	\$	181	\$	(842)	\$	557	\$	881
Income (loss) per share - basic and diluted	\$	0.00	\$	0.01	\$	0.00	\$	(0.00)

(1) Includes improvements in the fair values of Coventry and Gold Hawk securities of \$924,000 and \$438,000, respectively, net of income taxes of \$105,000.

(2) Includes a loss on sale of marketable securities of \$215,000, writedown of exploration and development projects of \$635,000, primarily related to the Triggs option, as well as a loss on securities held for trading of \$183,000.

- (3) Includes improvements in the fair values of Coventry and Gold Hawk securities of \$805,000 and \$234,000, respectively.
- (4) Reflects a gross gain on the sale of Cameron Lake of \$10,108,000 partially offset by a non-cash future income tax provision of \$1,297,000.
- (5) Includes a decrease in the fair value of Coventry from the date of acquisition of \$1,023,000.
- (6) Includes the tax effect of renunciation of flow-through expenditures in February 2010 of \$500,000.
- (7) Includes recognition of a future income tax recovery of \$1,297,000 related to tax benefits that were expected to be realized upon the closing of the sale of Cameron Lake to Coventry in April 2010.
- (8) Restated in the fourth quarter to include a gain on securities held for trading of \$333,000 in net income which had previously been included in other comprehensive income.
- (9) Includes \$1,360,000 gain on sale of Victory Nickel as well as \$493,000 foreign exchange gain primarily on the Company's loan-related balances.
- (10) Includes \$538,000 net foreign exchange gain primarily on the Company's loan payable as well as \$296,000 gain on sale of Rainy River Resources shares.
- (11) Includes \$606,000 of income tax recoveries on flow-through share renunciations offset by a dilution loss of \$322,000 on the share of Victory Nickel's flow-through share renunciations.

Variations in the quarterly results of operations are largely a function of the timing of property and other writedowns, gains on sales of marketable securities or properties, tax recoveries or provisions and the recording of losses of equity-accounted investees and dilution gains and losses therein. Variations in comprehensive income are primarily a function of the changes in the fair values of the Company's available-for-sale securities.

# LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2010, the Company had working capital of \$4,411,000 (December 31, 2009 - \$2,696,000).

The improvement is as a result of the Cameron Lake sale which closed in April 2010. The Company repaid its loan from cash proceeds of \$5,900,000 (\$100,000 was received in 2009) and received marketable securities of Coventry with a closing-date fair value of approximately \$2,958,000. The sale also facilitated the removal of encumbrances over the Gold Hawk shares and enabled the Company (along with Ocean Partners) to acquire substantially all of the secured debt of Campbell which they did not previously own.

The Company used cash in the year ended December 31, 2010 of \$862,000, compared with an increase in cash of \$697,000 during 2009.

In the year ended December 31, 2010, the Company used cash of \$1,701,000 in operating activities, compared with the use of cash totalling \$953,000 in 2009. The Company has no recurring sources of revenue and no regular operations and the change in non-cash working capital in the year ended December 31, 2010 was a use of \$328,000 compared with a source of \$21,000 in 2009. The main reason for the change in non-cash working capital relates to changes in accounts receivable partly offset by changes in non-project accounts payable and accruals.

The non-routine nature of the Company's transactions is further highlighted by the fact that the most significant elements of the change in operating activities are non-recurring items such as gains on sales of marketable securities and projects, writedown of exploration and development projects, interest capitalization, tax recoveries on renunciation of flow-through expenditures and loan-related items.

In the year ended December 31, 2010, by far the most significant transactions related to the Cameron Lake sale. The gross gain on sale was \$10,108,000. The gains and losses on securities held for trading relate to the warrants and shares of Victory Nickel acquired pursuant to the rights offering; the warrants were exercised in September 2010 as described earlier therefore the Company no longer holds any securities held for trading, any changes in fair value of which are accounted for through operations. Accordingly, unless circumstances change, there should be no further fair value changes through operations causing volatility in the Company's results under Canadian GAAP.

Cash used by financing activities was \$1,485,000 in 2010, compared with cash used of \$655,000 in 2009. To December 31, 2010, shares and warrants have been issued for net cash proceeds of \$1,487,000, compared with \$2,424,000 in 2009. In 2009, there were \$5,915,000 in repayments on the bridge loan and the then-new two-year facility was entered into for net proceeds of \$2,836,000. In 2010, the loan and related balances were repaid in full on April 20, 2010 upon receipt of funds from the Cameron Lake sale. The Company is now debt-free and has no significant encumbrances over its assets. The only other long-term payable is the \$300,000 due in April 2013 with respect to the acquisition of debt of Campbell (recorded at a discounted value of \$246,000 after non-cash accretion during 2010 of \$5,000 recorded in interest expense).

Despite the improvement in financial position, management is continuing to actively pursue additional ways to realize on the potential of its assets or secure financing in order to provide funds for operations and continue its return to active exploration in Canada and elsewhere. In October, 2010, the Company announced the closing of two private placements raising aggregate gross proceeds of approximately \$1,000,000. One financing was issued on a flow-through basis to progress Canadian exploration projects and the other was on a "hard-dollar" basis for the Company's foreign projects in Turkey and Egypt. In December, 2010, the Company announced another closing of private placements, raising gross proceeds of approximately \$438,000, on a flow-through basis to further progress Canadian exploration projects. The terms of the financings are described in Note 12 to the 2010 Audited Consolidated Financial Statements.

Other cash proceeds were raised pursuant to the exercise of warrants and options. In 2009, the Company completed a rights offering which included warrants which could be exercised after one year and up to two years after the rights offering date. The warrants are exercisable at \$0.10 and expire in April 2011. Due to improvements in the Company's share price, most of the Company's warrants are "in-the-money" and are presently exercisable (Note 12 to the 2010 Audited Consolidated Financial Statements). Should all the 27,025,962 warrants outstanding be exercised, this would generate approximately \$3,350,000 for the

Company. Of this amount, approximately \$734,000 relates to the warrants under the rights offering which expire in April 2011. Subsequent to the end of December and to March 18, 2011, 528,076 warrants have been exercised for aggregate cash proceeds of approximately \$53,000.

In January 2011, the Company completed a private placement which generated approximately \$500,000 in gross proceeds. Details of the offering are shown in Note 20 to the 2010 Audited Consolidated Financial Statements.

Investing activities in 2010 provided funds of \$2,324,000, compared with provision of funds of \$2,305,000 in the 2009 year. Aggregate payments of \$1,525,000 were made by the Company with respect to Campbell debt acquisition. This amount includes deposits reported previously as under the confidential bid process for Campbell's assets in conjunction with Ocean Partners. The Company, along with Ocean Partners, through a jointly-controlled Canadian subsidiary, has acquired substantially all of the remaining secured debt of Campbell that Nuinsco and Ocean Partners did not previously own. Nuinsco will make a further payment of \$200,000 by April 2011 (which is included in accounts payable and accrued liabilities) and \$300,000 no earlier than April 2013 (which is included in long-term liabilities at a fair value of \$246,000 using a discount rate of 8%). As a result, the two companies have effectively gained control over a significant Canadian mining camp. The Chibougamau mining camp in Québec historically has produced over 40 million tonnes of ore, 3 million ounces of gold and 1.5 billion pounds of copper.

As discussed in the Outlook, there are several alternatives available to Nuinsco and Ocean Partners once the courts have completed the CCAA proceedings and ownership of assets is transferred to Nuinsco and Ocean Partners.

Expenditures on exploration and development projects amounted to \$2,367,000 in 2010, compared with \$673,000 in 2009. Refer to the Exploration and Development Activities section for additional discussion.

In 2010, the Company received the remaining cash proceeds from the sale of Cameron Lake totalling \$5,900,000 (\$100,000 had been received in December of 2009). In 2010, gross proceeds of \$889,000 on sale of Gold Hawk shares were received; the Company no longer considers this a strategic investment. Accordingly, shares are being sold for liquidity purposes. As at December 31, 2010, the Company owned 498,000 Gold Hawk shares. As at March 18, 2011, the Company owns 184,500 shares of Gold Hawk. In 2009, \$426,000 and \$120,000 in proceeds was generated from the sale of Rainy River and Victory Nickel shares, respectively.

The purchase of marketable securities used funds of \$366,000 in 2010 and \$400,000 in 2009. In the prior year, the funds were used to exercise the rights which the Company had retained from its prior ownership of Victory Nickel. In 2010, the purchase represented the cash cost of exercising the warrants which were acquired in 2009 along with Victory Nickel shares (net of loan fee of \$33,000 - Note 5 to the 2010 Audited Consolidated Financial Statements). The Company currently owns 8,493,715 shares of Victory Nickel. The portfolio also includes 12,000,000 shares of Coventry which are no longer subject to any hold periods and are available for sale.

In order to facilitate exploration on the Bukari project in Egypt, the Company was required to issue a letter of guarantee supported by US\$200,000. Accordingly, the Company deposited funds with its bank supporting the guarantee. Such funds are restricted until either one year from issue date of the letter of guarantee or upon EMRA providing official notification that the concession agreement has been ratified by the Egyptian People's Assembly.

At December 31, 2010, the Company had an outstanding flow-through expenditure commitment of \$217,000. This commitment is expected to be fulfilled through expenditures on the Diabase and Prairie Lake projects as announced in December 2010.

In 2011, upon ratification of the Bukari concession agreement by the Egyptian People's Assembly, Nuinsco will have a commitment of US\$2,000,000 of expenditures in the first year of exploration on the Bukari concession. The Company is actively considering financing alternatives for this commitment, as discussed earlier. Due to the decision to not pursue the projects collectively known as the Olympian project shortly after the end of the third quarter of 2010, the Company no longer has any expenditure commitment for that

option. In order to maintain the option on one of the Diabase Peninsula claims, the Company must make an option payment of approximately \$935,000 by September 2, 2012.

Nuinsco does not own asset-backed commercial paper. The Company has a corporate policy of investing its available cash in cash equivalents comprising Canadian government instruments and certificates of deposit or other direct obligations of major Canadian banks, unless otherwise approved by the Board. The portfolio of marketable securities is available to fund the Company's activities.

As described above, exploration and development companies such as Nuinsco are heavily reliant upon the equity markets to fund their activities as they typically have no short-term sources of revenue other than through monetization of assets. Opportunities available to Nuinsco for financing would normally be through private placements in the equity markets. However, today's equity markets continue to make this alternative difficult if not impossible without incurring significant dilution to existing shareholders. The Company sold the Cameron Lake property in April 2010 and has closed two financings in October and one in December 2010 generating approximately \$1,438,000 in gross proceeds with an additional financing in January 2011 of \$500,000. However, additional financings will be required to properly exploit the Company's Canadian and foreign assets. The Company will consider all alternatives given appropriate pricing and other market conditions. Such alternatives could include earn-in options with third parties, other partnership arrangements, corporate transactions and further sales of marketable securities or project assets.

The Company's estimated monthly commitments, net of recoveries from Victory Nickel for ongoing administrative support in 2011, are approximately \$136,000. The Company's working capital requirements continue to be modest. At December 31, 2010, the major routine item requiring financing was an HST/GST receivable of \$120,000 which averaged approximately \$50,000 per quarter in 2010 – this is activity-related and has increased with higher Canadian-based expenditures and the higher-rated HST which came into force on July 1, 2010. We estimate that approximately \$600,000 is required on an ongoing annual basis to support the Company as a public entity. Although such costs were reduced significantly to a "bare bones" level in 2009, this would not be recommended as a sustainable measure. Such expenditures are not eligible for flow-through funding and must be financed through other means.

Given its current cash and marketable securities position with no significant debt, the Company is in a relatively strong financial position. The Company will continue to make expenditures on Canadian exploration activities to fulfil flow-through commitments. Partners are also being sought for certain of the Company's projects where significant funding would be required for proper exploration programming.

The Company is taking active steps towards creating a new company focussed on the MENA region which will include the Company's Turkish and Egyptian interests. Nuinsco believes the MENA region is underexplored and this makes it an interesting proposition for the Company and should attract prospective investors.

As mentioned above, the Company, along with Ocean Partners, has considerably advanced the prospects of realizing value from the Campbell assets. Nuinsco and Ocean Partners hold substantially all of the secured debt of Campbell and are in a position to execute the security in order to restructure the assets in the manner most advantageous for our shareholders. Nuinsco and Ocean Partners are exploring several alternatives.

Measures which were implemented to control costs in 2010 remain in place as described above to ensure the Company remains viable and exploits its assets at an appropriate level until market conditions further improve in the junior resource sector.

# EXPLORATION AND DEVELOPMENT ACTIVITIES

In the year ended December 31, 2010, the Company incurred exploration and development costs of \$3,304,000 on its mineral interests, compared with \$595,000 in 2009 (shown gross of \$100,000 deposit from Coventry). Expenditures were significantly lower in 2009 due to the general economic and financing environment experienced during that year. The most significant expenditures in 2010 were on the Diabase Peninsula project in the amount of \$1,171,000 (2009 - \$35,000). Programs at Prairie Lake cost \$791,000

(2009 - \$81,000); Olympian \$679,000 (2009 - \$nil) and Egypt \$480,000 (2009 - \$2,000, included in "other").

Paul Jones, President, is a "qualified person" as defined under NI-43-101, and he has supervised the preparation, and has approved, the information relating to the material mineral projects of the Company described herein.

A synopsis of the Company's properties follows; complete details of the mineral properties are available on the Company's website at www.nuinsco.ca.

#### URANIUM AND RARE METALS

### Diabase Peninsula Property, Saskatchewan

Nuinsco's Diabase Peninsula uranium project is located 150km northwest of La Ronge, Saskatchewan within the Athabasca Basin; the region that hosts the world's richest uranium mines. The 21,900ha Diabase Peninsula property is located on the western shore of Cree Lake approximately 5km from the southern boundary of the Athabasca Basin. The property encompasses a 35km strike length covering a north-easterly-trending graphite-bearing conductive horizon of regional extent lying beneath the Athabasca sandstones, and the sub-parallel oft-juxtaposed Cable Bay Shear Zone – a major terrane boundary within the Proterozoic basement sequence which is considered to be an important potential host structure for uranium mineralization in this part of the Athabasca Basin.

The Diabase Peninsula project is a joint venture with Trend Mining Company of Denver ("Trend") whose interest approximates 11%. Should a participant's interest drop below 10%, that participant will relinquish its entire participating interest and will have the right to receive a royalty equal to 3% of the net value of all mineral products produced from the property; net value is defined as proceeds less processing and treatment charges, transportation costs, sales, marketing and brokerage costs and taxes. If the project progresses to a development stage before its interest drops below 10% as described above, Trend has a one-time 50% back-in right upon reimbursing Nuinsco for 140% of its total expenditures to that date. In order to maintain the option on one of the claims, the Company must make an option payment of approximately \$935,000 by September 2, 2012. That same claim is subject to a 3% gross production royalty ("GPR") defined as actual metal/mineral sales with no deduction for refining or transportation expenses. The GPR can be purchased before September 2, 2012 for \$11,000,000 as follows: first percentage - \$1,000,000; second percentage - \$3,000,000; third percentage - \$7,000,000.

Since acquiring the property in early 2005, as uranium demand began to drive prices into a steep climb from their US\$15-US\$20 per pound historic range, Nuinsco has completed a property-wide deeppenetrating MEGATEM survey which mapped the regional graphite-pyrite conductor the length of the property. This was followed by ground geophysical TEM surveys over two priority target areas (the Main and Rowan Lake grids) located 8km apart, and has been complemented by both widespread geophysical gravity-survey profiling to map fault structures along the length of the Cable Bay trend and detailed gravity work upon both gridded priority targets.

Initial diamond drilling (10 holes) in 2005-2006 confirmed the highly-prospective nature of the geology and structure present within the Main grid area, and has focussed the Company's attention upon a 1.5km length segment of the 6km of strike covered by the Main grid. Geochemical evidence of uranium-related mineralizing processes and significantly anomalous radioactivity and uranium values were encountered in several holes. A radon gas survey in summer 2006 revealed a strong anomaly at the northern end of the 1.5km target area, but thick glaciofluvial esker cover elsewhere along the segment may have obscured additional bedrock sources. A winter 2007-2008 \$2,500,000 drilling program consisted of 17 holes (plus extending a 2006 hole which had failed to reach basement), with 5 holes devoted to follow-up on the Main grid and the remainder testing four high-ranking gravity survey/fault structure targets scattered the length of the property.

Two of the 2007-2008 holes returned sub-ore grade uranium intercepts of particular significance, 707ppm U at the unconformity in hole ND0801 and 410ppm U well below the unconformity in hole ND0807 (total dissolution-ICP methods). Uranium values in excess of only 10ppm are generally regarded by the exploration and academic community as representative of the alteration halo surrounding a potential ore-

grade deposit. ND0801 is within the core of the main grid target, while ND0807 is 2.8km to the north within a water-covered portion of the Main grid. A further 8km to the north ND0808, the first upon the Rowan Lake grid target, encountered evidence of similar alteration processes and encountered a peak value of 247ppm U in a single sample 3.5m above the unconformity. Given that this hole was the first to be directed at a target over 450m below surface, the results are deemed extremely encouraging.

Following completion of this work, which aggregated 28 drill-holes totalling 11,205m, all parts of the project area have sufficient assessment work filed to hold the property 10-12 years without additional work. Key dispositions, where the bulk of the drilling has been undertaken, are in good standing for 15-20 years.

No new field work was conducted at Diabase Peninsula in 2009. In March, 2010, a gravity survey at 100m line-spacing was completed upon the segment of interest on the Main grid, and lake sediment Soil Gas Hydrocarbon ("SGH") surveys were completed over the water-covered target in the northern Main grid area, and across the Rowan Lake grid, nearly entirely water-covered, with the samples tested by proprietary methods developed by Actlabs of Ancaster, Ontario.

The 2010 gravity survey revealed two 200m long, 100m wide anomalies in the southern portion of the Main grid segment, coincident with the area where Nuinsco's drilling has found the strongest alteration and highest uranium values in drilling completed to date. The SGH lake sediment work has confirmed the high potential of the Main grid north water-covered target and, as well, identified three areas within the Rowan Lake grid where coincident geophysical and geochemical responses suggest the presence of uranium. To quote Dale Sutherland Ph.D., Organics Manager and Director of Research for Actlabs, "the SGH data is not only indicating redox cell trends, it is indicating trends which have an organic signature associated specifically with uranium mineralization".

The November-December 2010 2,000m drill program was completed and we are awaiting assay results. The March-April 2011 drill programs which budgeted for 2,000m in 8-10 drill-holes is presently underway to examine in detail the vicinity of both the gravity and the radon anomalies upon the land-based portion of the Main grid. Due to the small size of uranium orebodies relative to most other types of economic mineral deposits, tight drill-hole spacing is necessary in order to adequately evaluate prospective targets.

Although the potential for discovery in the Main grid north and Rowan Lake grid areas is assessed as excellent, further work in these areas has been deferred for the present time due to the arduous permitting process and technically-challenging nature of drilling from the frozen lake surface, plus the time requirement and cost per hole for greater hole lengths in the northward-thickening sandstone sequence. Nonetheless, the work to date in these areas has clearly demonstrated their high potential to host uranium mineralization and, as Nuinsco's priorities and general economic conditions dictate, these most attractive targets will be drill tested in due course.

# Prairie Lake Property, Ontario

Prairie Lake, located near Marathon, Ontario, hosts a near-surface historic (non-NI-43-101-compliant) uranium resource of over 180,000 tonnes grading 0.09% U<sub>3</sub>O<sub>8</sub> (and 0.25% niobium) identified in exploration dating from the mid-1960s.

On January 13, 2010, the Company announced the results of an ETMI that demonstrated the presence of between 330 million and 360 million tonnes averaging 3.5% to 3.7% P<sub>2</sub>O<sub>5</sub> and 0.12% to 0.14% Nb<sub>2</sub>O<sub>5</sub>. The surface area used for the ETMI covers just 12% of the total project surface area.

In a substantial backhoe trenching program completed during the summer of 2010, approximately 2km of trenches were excavated. Four trenches, ranging in length from 340m to 685m, were excavated mainly in parts of the Prairie Lake complex that to date have seen little systematic sampling. More than 1,000 samples were collected from the trenches. Samples were analyzed for a suite of elements of economic interest in the complex including phosphorus, tantalum, niobium, uranium and rare metals. Channel sampling results from the first of the four trenches, the Dragonfly Trench, included values of up to 13.67%  $P_2O_5$  and 0.356%  $Nb_2O_5$ , and an intersection of 3.03%  $P_2O_5$  and 0.157%  $Nb_2O_5$  over 46.5m.

In December, 2010, the Company completed a 4,000m drilling program in the western half of the Prairie Lake complex. The drill program was designed to test the northward extension of the SW target defined in the ETMI and included 7 holes, each 500m to 600m in length. Approximately 1,800 core samples were collected. Analytical results for the drill program and the balance of the trenching program are still pending.

The property is subject to a 2% NSR payable on any production from any claim that comprises the property. Up to a maximum of one half of the royalty can be purchased for \$1,000,000 in either cash or common shares of the Company.

### Marijane and Huston Lakes Property

In 2009, the Company determined that the results to date on this exploration property did not support further expenditures and accordingly, decided to writedown the property to \$nil. The Company advised Temex Resources Corp. ("Temex") that it will not complete its commitment to earn the 50% undivided interest in the property.

# GOLD, COPPER AND ZINC

#### Turkish Properties

Nuinsco has two properties in northeastern Turkey: the Berta copper project and the Elmalaan copper-zinc project. Berta is a 50:50 joint venture with Xstrata Copper Canada ("Xstrata"), one of the commodity business units within Xstrata plc. Exploration began at Berta in 2004. The Company completed its 100% earn-in at Elmalaan in 2007 subject to Xstrata's back-in right to reacquire a 50% interest. Xstrata's back-in right is exercisable upon, among other things, incurring expenditures equal to 200% of the aggregate expenditures incurred by the Company. In addition, Xstrata is entitled to acquire a further 20% interest in the property by incurring an additional US\$20,000,000 in expenditures. In the event that Xstrata elects not to exercise its back-in right, it will be entitled to a 2% NSR which can be reduced to 1% on payment by the Company of US\$1,000,000. Under the terms of the joint venture agreement, Xstrata is the operator.

At Berta during 2007, the Company intersected a significant, continuous domain of strong sulphide mineralization grading up to 30.0% copper and 7.19% zinc. Copper, gold, silver and zinc values occurred over the entire 771.5m length of Hole SD-07-08, which was drilled adjacent to the interpreted Berta copper porphyry system and ended in mineralization.

Highlights of Hole SD-07-08 include: 710.9m grading 0.28% copper and 0.07g/t gold between 3.80m and 714.7m, including: 6.85m grading 3.79% copper, 0.22g/t gold, 11.6g/t silver and 1.05% zinc; 5.90m grading 2.60% copper, 1.14g/t gold and 8.3g/t silver; and 9.0m grading 1.03% copper. Copper values peaked at 30% over 0.25m between 592.10m and 592.35m down hole.

The results in this spectacularly mineralized hole were followed up by further positive drill results in 2008, including Hole SD-08-09 which returned 459m of continuous copper-gold mineralization starting from only four metres below surface and grades of up to 5.07% copper over 4.5m. Results from this hole include 179.9m grading 0.31% copper and 0.31g/t gold within a longer interval of 459m grading 0.17% copper and 0.17g/t gold.

Of particular note is the presence of mineralization near surface in both drill holes. These results highlight the tremendous potential of the essentially unexplored Berta property.

Nuinsco presently owes Xstrata approximately \$466,000, which is included in accounts payable and accrued liabilities in the consolidated balance sheet at December 31, 2010, for its share of expenditures on Berta. Discussions with Xstrata have been ongoing and the Company plans to pay its share of expenditures in the near future. Discussions are also being held to buy Xstrata's share of the joint venture. The Berta property is subject to a 2% NSR.

The Elmalaan licence, covering 947ha, is located 6km south of the Black Sea coast and is easily accessible year round. Previous work identified massive sulphide in outcrop and locally-derived boulders that graded up to 3.38% copper and 6.30% zinc. Drilling during the second quarter of 2007 continued to return high-grade polymetallic mineralization over significant widths. For example, drill hole EKD-07-06 intersected

2.43% zinc, 0.50g/t gold and 31.07g/t silver over 10.10m between 98.9m-109.0m; between 102.6m-103.2m, zinc values peaked at 9.25%, gold at 2.85g/t and silver at 211g/t. With completion of its earn-in, the Company is in the process of transferring ownership of the Elmalaan property to a wholly-owned Turkish subsidiary and is awaiting the necessary documentation from Noranda Madencilik (the Xstrata subsidiary that currently holds the licence).

# Egypt

In February, 2010, the Company announced that it had been successful, along with its Egyptian partner, in the bid process for two gold exploration concession areas in Egypt. The receipt of final title is subject to initially negotiating suitable production sharing agreements (individually the "Agreement" and collectively the "Agreements") with the government of Egypt through EMRA. Among other terms, the Agreements set out the rights and responsibilities of the Company and EMRA, tax implications (as a result of the provisions of the Agreements, no tax is incurred on activities related to the concession areas), terms of production sharing and cost recovery.

On February 19, 2011, the Company announced that the Egyptian State Council has reviewed and approved the Agreement covering the Bukari Concession Area, Eastern Desert, Egypt. Approval by the State Council signifies that the Agreement is in compliance with Egyptian law and with Egypt's regulatory framework. The Agreement will now be forwarded to the Egyptian People's Assembly for passage into law followed by execution by the Minister of Petroleum and Mines. At that time, formal title will be granted to Z-Gold, Nuinsco's Egyptian subsidiary, and tax-free status in Egypt will be attained. Nuinsco will also be able to proceed with its full exploration program. Given recent events in Egypt, State Council approval of the Agreement demonstrates that Egypt's civil service is functioning and indicates that Egypt is open for business and remains committed to developing a modern mining sector and to foreign investment in general.

In anticipation of the Bukari Agreement's passage into law, a third program of field work was completed in late January 2011 in preparation for a systematic and comprehensive exploration program that will begin as soon as possible. The results obtained from the sampling and mapping to date provide ample reason for the Company to consider the Bukari and Umm Samra licences to be very prospective; three occurrences have now been evaluated, with a combined total of at least 11km of strike, comprising a system of gold-mineralized quartz veins within sheared and altered host rock. There is uncertainty as to when the Bukari Agreement will be presented to the People's Assembly for final approval.

#### **Olympian Project Option**

In March, 2010, the Company announced that it had optioned a claim package hosting significant, highgrade, gold occurrences collectively referred to as the "Olympian Project". The property consists of 18 mining claims and three patented mining claims totalling 14.05 km<sup>2</sup> in Ontario's Lake of the Woods region. The claims were assembled through four option agreements with consideration aggregating cash of \$705,000 and 2,450,000 common shares of the Company payable through 2012.

A work program commenced during the winter of 2010. To date, grid control has been established over the main surface exposures and ground geophysics have been conducted (magnetic induced polarization surveys). Trenching, mapping and prospecting have also been undertaken on the gridded area. The Company received the results of a 1,164m diamond drilling program targeting both geology and geophysics in November. At that time, the Company determined that it would not continue with the Triggs option agreement and one of the optioned properties will be returned to its owners. Subsequently, the Company decided not to pursue any of the Olympian options. Accordingly, a writedown of \$679,000 was taken to bring the value of the property to \$nil and no future option payments will be made.

#### **Cameron Lake Project, Ontario**

Cameron Lake was sold effective April 20, 2010. Refer to Note 8 to the 2009 Audited Consolidated Financial Statements for a description of this project.

# INVESTMENTS

#### Interest in Campbell

In early 2006, Nuinsco acquired a significant equity interest in Campbell and entered into an agreement to provide consulting services to Campbell for its copper and gold mines in the Chibougamau mining camp. The Company also acquired a 50% interest in future cash flows, as defined, from the high-grade Corner Bay copper deposit. In late 2008, the Company acquired a royalty interest in Corner Bay comprising 10% of operating cash flow from the Corner Bay copper deposit from production at the 145-metre level and above.

Campbell experienced significant financial difficulties resulting from production delays, falling metal prices and the inability to obtain financing and in January, 2009 Campbell announced that it had re-entered CCAA protection.

Pursuant to the acquisition of substantially all of the remaining secured debt of Campbell by Ocean Partners and Nuinsco as described above, the Company and Ocean Partners are now in a position to exercise the security over all of Campbell's assets and to realize upon the value of the Chibougamau mining camp.

Campbell had an arrangement with the Société de développement de la Baie-James ("SDBJ") with respect to funding any environmental restoration. Ocean Partners and Nuinsco are discussing an arrangement with the SDBJ to satisfy future environmental requirements.

#### **Gold Hawk Resources Inc.**

In July, 2008, the Company acquired 1,196,800 shares (post-consolidation) in Gold Hawk, an approximate 13% interest, with a view to a possible combination of Gold Hawk's mine with Cameron Lake. Gold Hawk has since sold its mine therefore the Company's ownership of Gold Hawk is no longer considered strategic and will be sold. As referred to above, the Company sold 698,800 shares in 2010 and has continued to sell shares in 2011 to date.

#### Victory Nickel Inc.

As described in Note 1 to the Company's 2010 Audited Consolidated Financial Statements, the approximate 15% interest in Victory Nickel which the Company then owned was sold effective July 31, 2009. Additional information on Victory Nickel's Minago, Lynn Lake and Mel projects in Manitoba and Lac Rocher project in Québec can be obtained from Nuinsco's previous financial reports and regulatory filings and directly from Victory Nickel at www.victorynickel.ca. The Company presently owns 8,493,715 shares, an approximate 2% interest in Victory Nickel, which is held as marketable securities.

#### **Coventry Resources Limited**

Pursuant to the sale of Cameron Lake, Nuinsco now owns 12,000,000 shares in Coventry (an approximate 6.9% interest) as well as a 3% NSR royalty over future production from the property. By selling the asset but retaining an interest in Coventry, as well as the royalty, Nuinsco is able to participate in any upside potential of the Cameron Lake property without having to finance additional exploration or the development of the mine. Coventry is focussed on acquiring, finding and developing high-quality gold assets in the Superior Province geological region in eastern Canada. Coventry is based in Perth, Western Australia and its principal asset is the 100% interest in Cameron Lake. It also has interests in the Ardeen Gold Project in Northern Ontario.

# IMPAIRMENT ANALYSIS

While the metals markets and other general economic factors have improved over 2009, the Company performed a detailed impairment analysis on each of its exploration and development projects as at December 31, 2010. An initial indicator of impairment considers the market capitalization of a company compared with its net book value. At and around the end of December 31, 2010, the Company's market capitalization exceeded its book value.

The analysis reviewed historic expenditures recorded on each project along with any purchase price allocations from acquisitions, reflected the existence of previous writedowns and also considered the

existence of any economic studies which had been performed. The assumptions used in such studies were reviewed for such factors as: forecast metals prices, foreign exchange rates, changes in resource and/or cost estimates, changes in royalty arrangements, the existence of significant by-products and other matters as necessary. In addition, any exploration results were also taken into consideration.

Where appropriate, forecast metal prices were estimated from third-party sources such as analyst consensus reports and other available documentation which were considered to be reasonable by management. Capital and operating cost estimates generally were reduced from those used in prior studies if documentary evidence had recently been obtained as part of the review work presently being undertaken for other current studies. Often cost estimates used in previous studies had been derived when such were universally recognized to be at historic highs.

Furthermore, management's intentions with respect to future expenditures and plans for the projects were considered. The results from the Triggs option, part of the Olympian project, were determined, effective the end of the third quarter of 2010, not to meet expectations and accordingly, the Company decided to write down the value of that property to \$nil. In the fourth quarter, the Company decided not to pursue the other options within Olympian and expenditures thereon in the fourth quarter were also written off. All other projects have had recent expenditures or are otherwise considered to be active.

Despite recent turmoil being experienced in Egypt, approval by the State Council was received in February 2011 and the Company remains confident that the Bukari Agreement will be ratified by the Egyptian People's Assembly. The benefits of the Agreements enure both to Egypt and to the Company and this remains unchanged. However, the Company, along with its Egyptian-based partner, will continue to monitor developments and will respond appropriately.

Management concluded that no impairment existed in each of its projects effective December 31, 2010, except that the estimated recoverable amount of the Company's interest in the Olympian option is \$nil, and that costs incurred to date on all other projects are recoverable. The Company will continue to monitor developments as they occur in the metals markets and the economy and will update its impairment analysis to take account of any such changes, as appropriate.

# CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates used in the preparation of the consolidated financial statements include the Company's estimate of the recoverable value of its exploration and development projects, assessing the fair value of royalty interests, assessing the impairment of long-lived assets and the fair value estimates for stock options and warrants and assessing the value of future income tax assets and valuation reserves. These estimates involve considerable judgment and are, or could be, affected by significant factors that are out of the Company's control. The Company's financial statements have been prepared using the going concern assumption; reference should be made to Note 1 to the Company's 2010 Audited Consolidated Financial Statements.

For a complete list of the significant accounting policies as well as information concerning the use of estimates and measurement uncertainty, reference should be made to Notes 2 and 3 of the Company's 2010 Audited Consolidated Financial Statements.

The Company's recorded value of its exploration and development projects is based on historic costs that are expected to be recovered in the underlying mineral resources associated with the properties and future costs that may be required for ultimate realization through mining operations or by sale. The Company is in an industry that is exposed to a number of risks and uncertainties. Accordingly, there is always the potential for a material adjustment to the value assigned to these assets.

The fair value of the stock options and warrants, until exercise, is calculated using an option-pricing model that takes into account the exercise price, the expected life of the option/warrant, expected volatility of the underlying shares, expected dividend yield and the risk free interest rate for the term of the option/warrant.

### **NEW ACCOUNTING POLICIES**

The volume of accounting pronouncements being introduced by the CICA applicable to the Company has reduced significantly pending the transition to International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") discussed in more detail below. These are the last financial statements that the Company will issue in accordance with what is generally termed "predecessor Canadian GAAP".

There have been no new accounting policies adopted in the 2010 Audited Consolidated Financial Statements.

#### FUTURE ACCOUNTING CHANGES

#### International Financial Reporting Standards Overview

The Company is reaching completion of its IFRS Project although it is a continual process as emerging practices and the accounting industry develops its consensus approach. Senior financial management has continued to expand its knowledge through attendance at training courses on IFRS designed to be industry-specific. The Company has hired additional accounting staff to assist with the conversion to IFRS among other things and has continued to add literature to its expanding source material on IFRS. The Company will be required to produce IFRS-compliant financial statements for the quarter ended March 31, 2011 which will include the applicable disclosures and information for the comparative 2010 period.

# The high-level project plan described in the 2009 Annual MD&A and as updated in the interim financial reports prepared throughout 2010 has been followed and Phase 2: Detailed Planning and Implementation is drawing to a close. The Company chose to involve its auditors in the process in order to mitigate the risks involved in such a significant accounting implementation and the Audit Committee has been advised of the Company's progress throughout the year. The project plan included three main phases, which were expected to overlap:

Phase 1: Preliminary Impact Assessment – this included the preparation of a diagnostic review, the identification of preliminary GAAP differences, defined additional information requirements, defined the preliminary approach for managing dual reporting, included a project timeline and a training plan.

Phase 2: Detailed Planning and Implementation – this included determination of accounting policies and transition elections, development of statement and note disclosure templates, development of transition balance sheet, identification of new system requirements and their design.

Phase 3: Post Implementation Review – this includes an analysis of ongoing roles, continuous improvement process and ongoing monitoring of future IFRS changes.

#### Status of Project

The Company has completed Phase 1 as outlined above and has completed most of Phase 2 of its IFRS transition. The project was carried out primarily on a "business as usual" basis which has proved to be an effective approach. Any new processes or worksheets developed during the year have been made or updated with IFRS transition in mind in order to manage differential accounting treatments until full conversion is achieved.

As mentioned above, the IFRS Project is a continual process. In particular, final guidance may not have been issued – for example, that relating to joint ventures and jointly-controlled operations is still pending, although the Company does not believe that final guidance will have a significant impact on the Company – and the accounting profession still has not developed a consensus approach with respect to accounting for flow-through financing. That said, the Company has developed a number of accounting adjustments which will be used to create a preliminary consolidated transition date balance sheet effective January 1, 2010 ("Preliminary Consolidated Transition Balance Sheet"). The adjustments and descriptions detailed below reflect the Company's best efforts to produce meaningful information under IFRS excluding any required adjustments for pending accounting determinations.

Management understands that a number of firms in the accounting profession are in the process of developing a joint industry paper on accounting for the mining industry under IFRS (the "Joint Mining Paper"). Because of this and the reasons outlined above, management believes that it would be premature to report a Preliminary Consolidated Transition Balance Sheet at this time.

Recognizing that Canadian public companies are the first entities to initially adopt IFRS for financial statements at an interim reporting date, the IASB has provided an accommodation with respect to accounting for any accounting policy changes made during the conversion process. This facilitates changes to initially-selected accounting policies which are subsequently determined not to be suitable or appropriate. In addition, the securities regulators have provided an extension period for filing a company's first set of interim financial statements under IFRS – for the Company this extends the filing from May 16, 2011 to June 14, 2011. Absent unexpected circumstances, the Company does not presently expect to take full advantage of the extension period allowed for the filing of the March 31, 2011 interim financial statements.

# Anticipated Adjustments for the Preliminary Consolidated Transition Balance Sheet

In preparing its Preliminary Consolidated Transition Balance Sheet (the opening IFRS consolidated balance sheet), the Company will adjust amounts reported previously in financial statements prepared in accordance with predecessor Canadian GAAP in effect for the Company prior to the transition date. The narrative which follows explains the anticipated adjustments developed to date and outlines the transition elections which the Company expects to make. The Company has not presently identified any material errors in its application of predecessor Canadian GAAP in effect prior to transition date.

## a) IFRS 3 Business combinations ("IFRS 3")

The Company has elected under IFRS 1, First Time Adoption of International Financial Reporting Standards ("IFRS 1"), not to apply IFRS 3 retrospectively to business combinations that occurred prior to January 1, 2010 (the date of transition to IFRS). Accordingly, the Company has continued with the same accounting treatment of the business combinations under predecessor Canadian GAAP.

#### b) Assets classified as held for sale

Under IFRS, upon management's determination of a plan to divest assets, such assets should be classified as current assets. As at the transition date, a binding agreement had been reached with Coventry to sell the Cameron Lake project and mill. Accordingly, a reclassification from non-current to current assets is required to conform with IFRS.

Furthermore, the Cameron Lake project had been written down in 1999 by \$17,705,000 and a further \$250,000 in 2005. Under IFRS, reversals of writedowns are permitted and required where the recoverable value of the project is supported. Accordingly, because terms of the sales agreement had been reached, the Company has increased the value of the Cameron Lake project which is included in exploration and evaluation projects by \$9,850,000 to reflect the then-fair-value of the sales consideration. Note that the difference between the gain on sale of Cameron Lake recorded under predecessor Canadian GAAP in the second quarter of 2010 of \$10,108,000 is effectively accounted for by the difference in the market value of the Coventry shares between January 1, 2010 and April 20, 2010 when the sale actually occurred. Further note that this is a timing difference; under IFRS, the gain on sale of Cameron Lake will be eliminated in the June 30, 2010 comparative interim financial statements. At that time, the net effect of this adjustment on the Company's deficit will be \$nil.

The effect of the above is summarized as follows:

	January 1,
ease in assets classified as held for sale - current assets rease in assets classified as held for sale - non-current assets	 2010
Increase in assets classified as held for sale - current assets due to reversal of impairment	\$ 9,850
Increase in assets classified as held for sale - current assets	1,700
Decrease in assets classified as held for sale - non-current assets	(1,700)
Decrease in deficit	\$ 9,850

# c) Property and equipment

In accordance with IFRS 1, the Company has elected to continue to account for its property and equipment using the cost model. The Company reviewed its property and equipment for impairment as at the transition date and determined that no impairment existed.

#### d) Expenditures on exploration and evaluation projects

The Company has elected to continue to capitalize exploration costs; furthermore, the Company believes that the value of exploration and evaluation costs does not contain any material costs which were incurred prior to securing the legal right to explore the properties, except for certain expenditures incurred in Egypt prior to the terms of the concession agreement being reached with EMRA.

The impact arising from the change in capitalization of exploration costs is summarized as follows:

	J	anuary 1,
Consolidated Balance Sheet		2010
Decrease in exploration and evaluation projects - Egypt	\$	(2)
Increase in deficit	\$	(2)

# e) Impairment of exploration and evaluation projects

Under predecessor Canadian GAAP in effect prior to transition date, the Company evaluated its exploration and evaluation projects for impairment using information including projected cash flows. Such cash flows were not discounted. Under IFRS, impairment evaluations are performed using discounted cash flows. At the date of transition, the Company assessed its exploration and evaluation projects using discounted cash flows at a rate of 8% where such cash flows were available and determined that no adjustment was required to writedown the value of its projects.

In the year ended December 31, 2005, Nuinsco recorded a writedown of its Prairie Lake property in the amount of \$325,000 due to a change in recoverable value at that time. Under IFRS, reversals of writedowns are permitted and required where the recoverable value of the project is supported. Accordingly, given the inherent value in the property, the Company has increased the value of the Prairie Lake project which is included in exploration and evaluation projects by the amount of the previous writedown.

The impact arising from the reversal of the writedown is summarized as follows:

	January 1,
Consolidated Balance Sheet	2010
Increase in exploration and evaluation projects - Prairie Lake	\$ 325
Decrease in deficit	\$ 325

Also refer to note b) for discussion of the reversal of impairment on the Cameron Lake project which was included in assets held for sale.

# f) Reclassification of provisions

The asset retirement obligation related to the Cameron Lake project which was subject to a sales agreement in force at January 1, 2010. The liability would be de-recognized upon sale of the project to Coventry in April 2010. Accordingly, it was reclassified as a current liability at the transition date since the liability attaches to the project which was an asset held for sale within current assets.

The impact arising from the reclassification is as follows:

	January 1,
Consolidated Balance Sheet	2010
Increase in provisions - current liabilities	\$ 111
Decrease in asset retirement obligation - non-current liabilities	(111)
	\$ -

# g) Flow-through share financing

Under predecessor Canadian GAAP, the Company accounted for the tax effects of renouncing expenditures in favour of its investors upon formal notice of renunciation filed with the CRA on or before its deadline of February 28 in each year. The Company expects that there may be several changes in respect of accounting for flow-through shares under IFRS. The Joint Mining Paper is expected to include recommendations on this uniquely-Canadian form of financing.

#### h) Options and warrants

The Company has elected under IFRS 1 not to adopt retroactive application of fair value accounting on options granted prior to November 2002.

Accordingly, there are no differences arising from the transition to IFRS.

#### i) Borrowing costs

Under predecessor Canadian GAAP, the Company's policy was to expense borrowing costs as incurred. At the date of transition, the Company had no debt which was assumed for the purposes of project financing. However, it expects to elect to capitalize any future project-development-related borrowing costs in respect of qualifying assets upon the assumption of any future debt.

Accordingly, there are no differences arising from the transition to IFRS.

#### j) Deficit

The impact arising from the above changes had the following effects on the Company's deficit:

	January 1,
Consolidated Balance Sheet	2010
Increase in fair value of assets classified as held for sale - Cameron Lake	\$ 9,850
Decrease in value of exploration and evaluation projects - pre-exploration write-offs - Egypt	(2)
Increase in fair value of exploration and evaluation projects - Prairie Lake	325
Decrease in deficit	\$ 10,173

# Future considerations

The Company has joint venture arrangements with third parties. Presently, the Company's accounting policy is to account for these using the proportionate consolidation method. IFRS may remove this alternative and require equity accounting. This is not expected to represent a major change for the Company.

Accounting practice is always evolving, the Company will monitor accounting treatment of flow-through financings as consensus forms within the accounting profession as well as the recommendations within the Joint Mining Paper when issued.

The Company expects to early-adopt the provisions of IFRS 9, whereby it will make a determination for each of its marketable securities as to whether it will be accounted for through operations or through OCI. This will not be a retroactive adjustment but will be treated as if in force from January 1, 2010. Once a choice is made, all gains or losses arising on that marketable security will be recorded either through operations, or through OCI; the concepts of realized and unrealized gains being treated differently will no longer exist, nor will the concept of permanent impairment. The Company expects that changes in value of its portfolio of shares will be accounted for through OCI and changes in value of its warrants will be accounted for through operations.

Should the Company raise debt financing in the future for any of its specific projects, under IFRS interest must be capitalized to that project.

During 2010, the Company incurred expenditures on its Egypt project prior to the terms of the Agreements being reached with EMRA which occurred in the third quarter of 2010 with respect to the Bukari Agreement. Accordingly, additional writedowns of expenditures will be made in accordance with IFRS.

The Company has three foreign subsidiaries and the volume of transactions in the subsidiaries is expected to increase with increased activity in Turkey and Egypt. Presently, the amounts in the cumulative translation

accounts are immaterial and insignificant. Should transactions and balances increase, foreign exchange differences may increase and the Company will commence recording these through the translation reserve through OCI.

### Involvement by advisers

The Company engaged its auditors, BDO Canada LLP, to conduct a special engagement with respect to its IFRS transition project. While the engagement was neither an audit nor a review, as such terms are formally defined and therefore cannot and should not be relied upon, it was undertaken to assist the Company in ensuring that its IFRS adjustments were complete and appropriate and that its proforma interim financial statements for the quarter ended March 31, 2011 contain materially complete and appropriate disclosures. The IFRS engagement is continuing.

#### Conclusion

The Company continues to believe that it is well-positioned to meet the transition to IFRS on a timely basis.

# AUDITOR'S REPORT

Effective December 31, 2010, the CICA has amended the form of the auditor's report. In particular, it emphasises the nature of responsibilities among management and auditors and introduces the concept of an additional paragraph to the report. The additional paragraph is referred to as an "emphasis of matter" paragraph and is not to be used by the auditor to avoid a qualified opinion where that would be necessary.

The prime use of the emphasis of matter is to highlight certain information contained in the financial statements to the reader. Such a paragraph has been utilized in other auditing jurisdictions for many years.

For Nuinsco, the emphasis of matter refers the reader to Note 1 to the 2010 Audited Consolidated Financial Statements wherein the Company highlights the fact that the statements have been prepared following the going concern concept. The emphasis of matter should not be considered to be, nor is it, a qualification of the auditor's opinion.

# CORPORATE GOVERNANCE

The Company's Board of Directors is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal control and exercises this responsibility principally through the Audit Committee. The Audit Committee, which is comprised of directors, none of whom are employees or officers of the Company, meets with management to review the 2010 Audited Consolidated Financial Statements to satisfy itself that management is properly discharging its responsibilities to the directors who approve the Audited Consolidated Financial Statements. The Board of Directors has also appointed compensation and corporate governance and nominating committees composed of non-executive directors.

#### **Evaluation of Disclosure Controls and Procedures**

The Company's Chief Executive Officer and Chief Financial Officer, (collectively, the "Certifying Officers"), are responsible for designing a system of disclosure controls and procedures, or causing them to be designed under their supervision, to provide reasonable assurance that information required to be disclosed in reports filed with or submitted to, securities regulatory authorities is recorded, processed, summarized and reported within the time periods specified under Canadian securities laws and that material information relating to the Company is made known to them with respect to financial and operational conditions to allow timely decisions regarding required disclosure. For the fiscal year ended December 31, 2010, an evaluation was commissioned by the Company under the supervision of the Certifying Officers and with the participation of management of the effectiveness of the Company's disclosure controls and procedures as defined under the rules adopted by the Canadian securities regulatory authorities. Based on this evaluation, the Certifying Officers have concluded that the design and operation of the Company's disclosure controls and procedures were effective as at December 31, 2010. Such controls are facilitated by the small size of the Company's senior management team and their access to material information.

There were no changes to the Company's disclosure controls and procedures that occurred during the year ended December 31, 2010 that materially affected, or are reasonably likely to affect, the Company's disclosure controls and procedures.

#### **Evaluation of Internal Control over Financial Reporting**

The Company's Certifying Officers are responsible for designing a system of internal controls over financial reporting, or causing them to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and preparation of consolidated financial statements for external purposes in accordance with Canadian GAAP. The Company used the COSO control framework. For the fiscal year ended December 31, 2010, an evaluation was commissioned by the Company under the supervision of the Certifying Officers and with the participation of management of the effectiveness of the Company's internal control over financial reporting. Based on this evaluation, the Certifying Officers have concluded that the design and operation of the Company's internal controls over financial reporting. During the evaluation process, the Company made improvements to the internal controls over financial reporting. Furthermore, segregation of duties has been improved during the year with the hiring of a controller.

The management of the Company was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. The result of the inherent limitations in all control systems means no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

There were no changes to the Company's internal controls over financial reporting that occurred during the year ended December 31, 2010 that materially affected, or are reasonably likely to affect, the Company's internal controls over financial reporting.

# TRANSACTIONS WITH RELATED PARTIES AND MANAGEMENT AGREEMENT

Included in accounts payable and accrued liabilities at December 31, 2010 are amounts owing to directors and officers of \$111,000 (December 31, 2009 - \$301,000). The amounts consist primarily of directors' fees and reimbursement of expenses incurred by officers and directors.

The Company shares management administrative assistance and facilities with Victory Nickel pursuant to a management agreement. The costs recovered from Victory Nickel are recorded at the exchange amount which is equal to the cost to the Company of such services plus 10 per cent. The management agreement commenced February 1, 2007 and is terminable by the Company upon 90 days notice and by Victory Nickel upon 180 days notice. Costs recovered from Victory Nickel in the year ended December 31, 2010 total \$719,000 (2009 - \$612,000) and have been deducted from general and administrative expenses. In addition, project-related costs aggregating \$38,000 have been charged by the Company to Victory Nickel during the year ended December 31, 2010 (2009 - \$59,000). Furthermore, project-related costs aggregating \$26,000 have been charged to the Company by Victory Nickel and are included in exploration and development costs on the balance sheet (2009 - \$19,000).

Amounts due to or from Victory Nickel are unsecured, non-interest bearing and due on demand. Amounts due to or from Victory Nickel are settled on a regular basis.

# OUTSTANDING SHARE DATA

At December 31, 2010, the Company had 254,205,292 common shares outstanding. At March 18, 2011, the Company had 257,908,368 common shares issued and outstanding. In addition, there were 22,460,000 stock options outstanding at March 18, 2011 (including those options approved on that date as referred to below) as well as 28,060,386 warrants, which if exercised and issued would bring the fully diluted issued common shares to a total of 308,428,754 and would generate approximately \$6,917,000.

# **RECENT DEVELOPMENTS**

Recent developments for the Company, not covered elsewhere in this MD&A are as follows:

#### **Private Placement Financing**

On January 10, 2011, the Company completed a private placement financing of 3,125,000 units of securities at a price of \$0.16 per unit generating gross proceeds of \$500,000. Each unit comprises one

common share and one-half of one common share purchase warrant. Each whole warrant entitles the holder to purchase one common share at an exercise price of \$0.22 for a period of 12 months from closing.

#### **CRA Reassessment**

In March, 2011, the Company advised that it has received notices of reassessment in the aggregate amount of approximately \$4.4 million from the CRA related to transactions completed in 2006. The Company is in the process of carefully reviewing these reassessments and has consulted legal counsel in this regard. The Company intends to vigorously defend what it and its counsel believe to have been a correct filing position related to these transactions. The appeal process could be lengthy and while the Company believes that its position is correct, the ultimate outcome is unknown.

#### Warrants Exercised

Since December 31, 2010, 528,076 of the Company's warrants issued with respect to the rights offering have been exercised for gross proceeds of approximately \$53,000.

#### **Stock Options Issuance**

On March 18, 2011, the Board of Directors granted 4,400,000 stock options exercisable at \$0.17 per share to directors, officers, employees and consultants. Of the options granted, 3,425,000 vest immediately and 975,000 vest over one year.

#### **RISKS AND UNCERTAINTIES**

The exploration and development of natural resources are speculative activities that involve a high degree of financial risk. The risk factors which should be taken into account in assessing Nuinsco's activities and an investment in its securities include, but are not necessarily limited to, those set out below.

The relative significance of each risk described below will vary as a function of several factors including, but not limited to, the state of the economy, the stage of Nuinsco's projects, the availability of financing on acceptable terms and other matters.

Any one or more of these risks could have a material adverse effect on the value of any investment in Nuinsco and the business, financial condition or operating results or prospects of Nuinsco and should be taken into account in assessing Nuinsco's activities.

#### **Industry Risks**

# Speculative Nature of Mineral Exploration

Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that Nuinsco's exploration efforts will be successful. Few properties that are explored are ultimately developed into economically viable operating mines. Success in establishing reserves is a result of a number of factors, including the quality of Nuinsco's management, level of geological and technical expertise, the quality of land available for exploration and other factors. Once mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling to determine the optimal extraction method for the ore and the metallurgical process to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities. It is possible that even preliminary due diligence will show adverse results, leading to the abandonment of projects. It is impossible to ensure that preliminary feasibility studies or full feasibility studies, on Nuinsco's projects or the current or proposed exploration programs on any of the properties in which Nuinsco has exploration rights will result in a profitable commercial mining operation. As a result of these uncertainties, no assurance can be given that Nuinsco's exploration programs will result in the establishment or expansion of resources or reserves. Furthermore, Nuinsco cannot give any assurance that its current and future exploration activities will result in the discovery of mineral deposits containing mineral reserves.

#### **Development Projects**

In general, development projects have no operating history upon which to base estimates of future cash operating costs. For development projects such as those projects that Nuinsco has an interest in, estimates

of proven and probable reserves are, to a large extent, based upon the interpretation of geological data obtained from drill holes and other sampling techniques and feasibility studies. This information is used to calculate estimates of the capital cost, cash operating costs based upon anticipated tonnage and grades of ore to be mined and processed, the configuration of the ore body, expected recovery rates, comparable facility and equipment operating costs, anticipated climatic conditions and other factors. In addition, there remains to be undertaken certain feasibility and development preparation work on the projects that could adversely impact estimates of capital and operating costs required for the development of the projects. Costs necessary to develop the projects could be significant and will have a direct impact on the economic evaluation of the projects. As a result, it is possible that the actual capital cost, cash operating costs and economic returns of the projects may differ from those currently estimated.

#### Competition

The mineral exploration business is highly competitive in all of its phases. Nuinsco competes with numerous other companies and individuals, including competitors with greater financial, technical and other resources than Nuinsco, in the search for and acquisition of exploration and development rights on attractive mineral properties. Nuinsco's ability to acquire exploration and development rights in the future will depend not only on its ability to develop the properties on which it currently has exploration and development rights, but also on its ability to select and acquire exploration and development rights on other suitable properties. There is no assurance that Nuinsco will compete successfully in acquiring exploration and development rights on such other properties.

#### **Operational Risks**

#### Limited History of Operations

Nuinsco has a limited history of earnings and limited financial resources. Nuinsco currently has no operating mines and its ultimate success will depend on its ability to generate cash flow from active mining operations in the future, as well as its ability to access capital markets for its development requirements. There is no assurance that Nuinsco will earn profits in the future. Significant capital investment will be required to achieve commercial production from Nuinsco's existing projects from successful exploration efforts. There is no assurance that Nuinsco will be able to raise the required funds to continue these activities.

#### Development Targets, Permitting and Operational Delays

There can be no assurance that Nuinsco will be able to complete the planned development of the projects on time or on budget due to, among other things, delays in receiving required consents, permits and registrations, the delivery and installation of plant and equipment and cost overruns, or that the current personnel, systems, procedures and controls will be adequate to support Nuinsco's operations. Any failure to meet development targets or other operational delays or inadequacies could have a material adverse effect.

#### **Resources, Reserves and Production**

Figures relating to mineral resources and mineral reserves are estimates and no assurance can be given that the anticipated level of recovery and/or grades of mineral reserves or mineral resources will be realized. Moreover, short-term operating factors relating to ore reserves and resources, such as the need for orderly development of an ore body or the processing of new or different ore grades, may cause a mining operation to be unprofitable in any particular accounting period.

#### Title Risks

Nuinsco's ability to hold various mineral rights require licences, permits and authorizations and, in some cases, renewals of existing licences, permits and authorizations from various governmental and quasi-governmental authorities. Management believes that Nuinsco currently holds or has applied for all necessary licences, permits and authorizations to carry on the activities which Nuinsco is currently conducting and to hold the mineral rights Nuinsco currently holds under applicable laws and regulations in effect at the present time. Management also believes that Nuinsco is complying in all material respects with the terms of such licences, permits and authorizations. However, Nuinsco's ability to obtain, sustain or renew such licences, permits and authorizations on acceptable terms is subject to changes in regulations and policies and to the discretion of the applicable governmental and quasi-governmental bodies.

No assurance can be given that Nuinsco's properties are not subject to prior unregistered agreements or interests or undetected claims or interests which could be material and adverse to Nuinsco. Additionally, mineral properties may carry with them significant development costs and abandonment and site restoration obligations for which Nuinsco may, or will, become responsible for in the future.

#### Insurance Risk

Nuinsco faces all of the hazards and risks normally incidental to the exploration of precious and base metals, any of which could result in damage to life or property, environmental damage and possible legal liability for any or all such damage caused. Nuinsco's activities may be subject to prolonged disruptions due to weather conditions depending on the location of operations in which Nuinsco has interests; not all such risks are insurable.

#### **Financial and Investment Risks**

#### Substantial Capital Requirements

Nuinsco will have to make substantial capital expenditures for the development of and to achieve production from the projects. There can be no assurance that any debt or equity financing or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to Nuinsco. Moreover, future activities may require Nuinsco to alter its capitalization significantly. The inability of Nuinsco to access sufficient capital for its operations could have a material adverse effect on its financial condition, results of operations or prospects. Flow-through financing cannot be used to fund the Company's corporate costs.

#### Market Perception

Market perception of junior exploration, development and mining companies may shift such that these companies are viewed less favourably. This factor could impact the value of investors' holdings and Nuinsco's ability to raise further funds by issue of additional securities or debt.

#### Metal Prices

There is no assurance that, even if commercial quantities of mineral resources are developed, a profitable market will exist for the sale of such product. Metal prices fluctuate on a daily basis and are affected by numerous factors beyond Nuinsco's control – including factors which are influenced by worldwide circumstances. The level of interest rates, the rate of inflation, world supply of precious and base metals and stability of exchange rates can all cause significant fluctuations in precious and base metal prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems and political developments. The price of precious and base metals has historically fluctuated widely and future price declines could cause commercial production to be uneconomical and such fluctuations could have a material adverse effect on Nuinsco's business, financial condition and prospects. Given the stage of development of Nuinsco's projects, the above factors have had no material impact on present operations but are considered in evaluating the impairment of long-lived assets.

#### Areas of Investment Risk

Nuinsco's Common Shares are listed on the TSX. The share prices of publicly traded companies can be volatile as the price of shares is dependent upon a number of factors, some of which are general or market or sector specific and others that are specific to Nuinsco.

The market for shares in small public companies is less liquid than for large public companies. Investors should be aware that the value of the Company's common shares may be volatile and may go down as well as up and investors may therefore not recover their original investment.

The market price of the Company's common shares may not reflect the underlying value of Nuinsco's net assets. The price at which investors may dispose of their securities may be influenced by a number of factors, some of which may pertain to Nuinsco and others of which are extraneous. On any disposal of their common shares, investors may realize less than the original amount invested.

#### **Regulatory Risks**

#### **Government Regulation**

Existing and possible future environmental and social impact legislation, regulations and actions, including the regulation of air and water quality, mining reclamation, solid and hazardous waste handling and disposal, the promotion of occupational health and safety, the protection of wildlife and ecological systems and the protection of the societies and communities of indigenous peoples, could cause significant expense, capital expenditures, restrictions and delays in the Company's activities, the extent of which cannot be predicted and which may well be beyond Nuinsco's capacity to fund. Environmental laws are becoming more actively enforced. Environmental and social impact studies may be required for some operations and significant fines and clean up responsibilities may be assessed for companies causing damage to the environment in the course of their activities.

# Economic, Political, Judicial, Administrative, Taxation or Other Regulatory Factors

Nuinsco may be adversely affected by changes in economic, political, judicial, administrative, taxation or other regulatory factors in the areas in which Nuinsco does or will operate and holds its interests, as well as unforeseen matters.

#### **Other Risks**

# Environmental and Health Risks

The Company has no significant exposure to environmental or health risks, although this will change should any of the Company's projects approach production (a normal characteristic of mineral industry projects).

#### Key Personnel

Nuinsco relies on a limited number of key consultants and there is no assurance that Nuinsco will be able to retain such key consultants or other senior management. The loss of one or more of such key consultants or members of senior management, if not replaced, could have a material adverse effect on Nuinsco's business, financial condition and prospects. Directors and management have previously accepted deferrals of remuneration in order to assist the Company through the economic turmoil; however, this potentially adds to the risk of losing experienced personnel.

#### **Conflicts of Interest**

Certain of Nuinsco's directors and officers are also directors and officers of other natural resource companies. Consequently, there exists the possibility for such directors and officers to be in a position of conflict. Any decision made by any of such directors and officers relating to Nuinsco will be made in accordance with their duties and obligations to deal fairly and in good faith with Nuinsco and such other companies.

#### Foreign Operations

In 2004, the Company initiated exploration work in Turkey. While the Company believes that the risks associated with operating in Turkey are very acceptable, most investors would attribute a higher degree of risk to operating in Turkey as compared to operating in Canada. In early 2010, the Company announced that it has, with its Egyptian partner, been successful in the bid process for gold exploration concessions in Egypt; a similar caveat to that expressed for Turkey is appropriate.

Currently, Egypt is experiencing a state of civil unrest and political transition, the consequences of which are difficult to determine with certainty at this time and which may adversely affect the ability of Nuinsco to obtain tenure to its Egyptian projects and may negatively affect the Company's exploration activities and/or such projects. The possibility that the current, or a future, government may adopt substantially different policies or take arbitrary action which might halt exploration, nationalize private assets, cancel contracts or mining and exploration rights and/or enact changes in taxation treatment cannot be ruled out.

There is no assurance that future political and economic conditions in Egypt will not result in the Government of Egypt adopting different policies respecting foreign development and ownership of mineral resources. Any such change in policy may result in changes in laws affecting ownership of assets, land tenure and mineral concessions, taxation, royalties, rates of exchange, environmental protection, labour relations, repatriation of income and return of capital, some or all of which may affect the Company's ability to undertake exploration and development activities in respect of its properties.

Economic and political conditions in Egypt and Turkey could adversely affect the business activities of the Company. These conditions are beyond Nuinsco's control, and there can be no assurances that any mitigating actions by Nuinsco will be effective. Any potential adverse impacts as a result of political volatility in Egypt or Turkey cannot be predicted. The mineral interests of Nuinsco and the ultimate ability to generate cash flow and profits from operations may be affected in varying degrees by political or economic instability. The enforcement by Nuinsco of its legal rights to exploit its properties may not be recognized by the government of Egypt or Turkey or by its respective court system.

Other risks include, but are not limited to: terrorist acts, corruption attempts, military repression, extreme fluctuations in currency exchange rates and high rates of inflation. Operations may also be affected in varying degrees by such factors as government regulations (or changes thereto) with respect to the restrictions on production, export controls, income taxes, other taxes and fees, incentive programs, expropriation or condemnation of property, repatriation of profits, land use, environmental legislation, water use, land claims of local people and mine safety. The effect of these factors cannot be accurately predicted.

Turkey is seeking membership to the European Union (the "EU") and is progressing to conform to EU standards and develop greater political and economic stability. However, Turkey has historically, and to some degree continues to experience heightened levels of political and economic instability due to regional geopolitical instability. These conditions may be exacerbated by current global economic conditions. This instability may have a material adverse effect on Nuinsco.

Nuinsco's activities are subject to extensive laws and regulations governing worker health and safety, employment standards, waste disposal, protection of historic and archaeological sites, mine development, protection of endangered and protected species and other matters. Exploration and development activities in Turkey are subject to regulation by the General Directorate of Forestry of the Ministry of Environment and Forestry. The judiciary in Turkey has substantial discretion to impose injunctions.

Nuinsco's investments in foreign countries such as Egypt and Turkey carry certain risks associated with different political, business, social and economic environments. The ability to carry on business in Turkey can be affected by possible political or economic instability in that country. Changes in mining or investment policies or shifts in political attitude in Egypt or Turkey may adversely affect private business. The effect of these factors cannot be accurately predicted. Should the government later seek to control any aspect of production, distribution or pricing of gold or precious metals, Nuinsco runs the risk that, at any time, its operations may be terminated for failure to comply with any permit, rule or regulation; or that its operations may prove to be unprofitable if the costs of compliance with such governmental regulations prove to be excessive.

There is a risk that the necessary permits, consents, authorizations and agreements to implement planned exploration, project development or mining may not be obtained under conditions, or within time frames, that make such plans economic, that applicable laws, regulations or the governing authorities will change or that such changes will result in additional material expenditures or time delays.

As with Canadian projects, the acquisition and retention of title to mineral rights is a detailed and time consuming process. Title to, and the area of, mineral resource claims may be disputed or challenged. Nuinsco's right to explore for, mine, produce and sell gold from the Bukari Concession will be based on the Bukari Concession Agreement. Should Nuinsco's rights under the Agreements not be honoured or be unenforceable for any reason, or if any material term of the Agreements is unilaterally changed or not honoured, including the boundaries of the property, Nuinsco's ability to explore and produce gold in the future would be materially and adversely affected.

#### Investments and Other Agreements with Resource Companies

In addition, Nuinsco makes, from time-to-time, investments in the common shares of publicly-traded companies in the junior natural resources sector or may enter into option or other agreements therewith. These companies are subject to similar risks and uncertainties as is Nuinsco, and Nuinsco's investments in and agreements with these companies are subject to similar areas of risk as noted above. Nuinsco seeks to

manage its exposure by ensuring that appropriate recourse is included in such agreements upon the counterparty's failure to meet contractual obligations.

#### Summary

The future success of the Company is subject to a number of risk factors that are common to the junior natural resources sector. These include the extent to which it can outline natural resources on its properties and establish the economic viability of developing those properties and the political, economic and legislative stability of the territories in which the Company's interests are located. Another significant factor is the ability of the Company to obtain necessary financing or to find strategic partners to fund expenditure commitments as they fall due, as the Company currently has limited funds. Furthermore, the development of any natural resources produced by the Company is largely dependent upon factors that are beyond its control, such as costs of development, operating costs and the market value of the end product. Such risks are likely to be more extensive in foreign jurisdictions.

#### FORWARD-LOOKING STATEMENTS

**Forward-Looking Information:** This MD&A contains forward-looking information. All statements, other than statements of historic fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding estimates and/or assumptions in respect of production, revenue, cash flow, costs, economic return, net present value, mine life and financial models, mineral resource estimates, potential mineralization, potential mineral resources, timing of possible production and the Company's development plans and objectives) constitute forward-looking information. This forward-looking information reflects the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking information is subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on the Company.

Factors that could cause actual results or events to differ materially from current expectations include, among other things: uncertainty of estimates of capital and operating costs, production estimates and estimated economic return; the possibility that actual circumstances will differ from estimates and assumptions; uncertainties relating to the availability and costs of financing needed in the future; failure to establish estimated mineral resources; fluctuations in commodity prices and currency exchange rates; inflation; recoveries being less than those indicated by the testwork carried out to date (there can be no assurance that recoveries in small scale laboratory tests will be duplicated in large tests under on-site conditions or during production); changes in equity markets; operating performance of facilities; environmental and safety risks; delays in obtaining or failure to obtain necessary permits and approvals from government authorities; unavailability of plant, equipment or labour; inability to retain key management and personnel: changes to regulations or policies affecting the Company's activities: the uncertainties involved in interpreting geological data; and the other risks disclosed under the heading "Risks and Uncertainties" and elsewhere. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.
